CONTENTS

<i>PREFACE</i>	xiii
<i>ACKNOWLEDGMENTS</i>	xvii
<i>ACRONYMS</i>	xix
CHAPTER 1 <i>INTRODUCTION TO CDMA2000 STANDARDS EVOLUTION</i>	1
1.1 Introduction	1
1.2 3GPP2 and CDMA2000 Standardization	4
1.3 CDMAONE Evolution to CDMA2000	6
1.4 References	10
CHAPTER 2 <i>CDMA CONCEPTS</i>	11
2.1 Introduction	11
2.2 Spread Spectrum Concept	11
2.3 Spreading Codes	14
2.3.1 Walsh Codes	15
2.3.2 PN Codes	16
2.4 Multipath Diversity and the Rake Receiver	19
2.5 Universal Frequency Reuse	21
2.6 Soft Handoff	22
2.7 Power Control and Soft Capacity	23
2.8 References	28
CHAPTER 3 <i>OVERVIEW OF IS95A</i>	29
3.1 Introduction	29
3.2 Radio and Physical Channelization	29
3.3 Reverse Link Physical Channels	32
3.3.1 Access Channel	32
3.3.2 Reverse Traffic Channels	33
3.3.3 Reverse Link Physical Layer Processing	36
3.4 Forward Link Channels	38
3.4.1 Pilot Channel and PN Offsets	38
3.4.2 Sync Channel	39
3.4.3 Paging Channel	41
3.4.4 Forward Traffic Channel	43
3.4.5 Forward Physical Channel Processing	45
3.5 Random-Access Channel Operation	48
3.6 Power Control Schemes in IS95A	52
3.6.1 Access Power Control	52
3.6.2 Open-Loop Power Control on the Traffic Channel	53

3.6.3	Closed-Loop Power Control on the Reverse Traffic Channel	54
3.6.4	Forward Link Power Control	56
3.7	Traffic Channel Handoff in IS95A	59
3.7.1	Soft Handoff Scenarios	59
3.7.2	Soft Handoff Process and Parameters	60
3.8	References	64

CHAPTER 4 NEW CONCEPTS AND TECHNOLOGIES IN CDMA2000

65

4.1	Introduction	65
4.2	Link Adaptation	66
4.2.1	Adaptive Modulation and Coding	66
4.2.2	Variable Channelization Spreading	69
4.2.3	Physical Layer Hybrid ARQ and Incremental Redundancy	71
4.3	Multisuser Diversity	76
4.4	Beam-Forming	80
4.5	Turbo Codes	82
4.6	Transmit Diversity	85
4.7	Network-Controlled Selectable Mode Vocoder (SMV)	88
4.8	References	96

CHAPTER 5 CDMA2000 PROTOCOL LAYERS AND CHANNELIZATION

97

5.1	Introduction	97
5.2	Physical Layer	97
5.3	Link Layer (Layer 2)	100
5.3.1	MAC Sublayer	100
5.3.2	LAC Sublayer	101
5.4	Layer 3 Signaling	104
5.5	CDMA2000 Physical Channelization	106
5.5.1	Reverse Link Physical Channels	106
5.5.2	Forward Link Physical Channels	109
5.6	References	112

CHAPTER 6 CDMA2000 PHYSICAL LAYER FEATURES

113

6.1	Introduction	113
6.2	Spectrum Support and Radio Configurations	113
6.3	Radio Configurations and Traffic Channel Data Rates	115
6.4	Data Rates on Reverse Common Physical Channels	120
6.5	Data Rates on Forward Common Physical Channels	122
6.6	Reverse and Forward Link Channel Coding	123
6.6.1	Convolutional Encoders	125
6.6.2	Turbo Encoder	125
6.7	Reverse Link Spreading and Modulation	128
6.7.1	Reverse Link Orthogonal Channelization Spreading	129
6.7.2	Reverse Link Quadrature Spreading and Modulation	131
6.8	Spreading and Modulation in the Forward Link	133
6.8.1	Forward Link Orthogonal Channelization Spreading	133
6.8.2	Forward Link Quadrature Spreading and Modulation	136
6.9	References	140

CHAPTER 7 IS2000 CALL PROCESSING**141**

- 7.1 Introduction 141
- 7.2 Mobile Station Initialization State 142
- 7.3 Mobile Station Idle State 145
 - 7.3.1 Monitoring the Forward Common and Broadcast Channels 146
 - 7.3.2 Monitoring Broadcast Messages on F-PCH 147
 - 7.3.3 Monitoring Broadcast Messages on F-BCCH and F-CCCH 149
 - 7.3.4 Monitoring the Quick Paging Channel 149
 - 7.3.5 Response to Overhead Information 152
 - 7.3.6 Idle Handoff 153
- 7.4 System Access State 155
 - 7.4.1 Enhanced Random and Reservation Access Procedures 156
 - 7.4.2 Access State Handoffs 162
 - 7.4.3 Registration 165
- 7.5 References 167

CHAPTER 8 TRAFFIC CHANNEL OPERATION**169**

- 8.1 Introduction 169
- 8.2 Traffic Channel Service Configuration and Negotiation 170
- 8.3 Voice and Data Transmission on Traffic Channels 171
 - 8.3.1 Forward SCH Assignment 174
 - 8.3.2 Reverse SCH Assignment 177
 - 8.3.3 Admission Control and Traffic Channel Allocation 177
- 8.4 Traffic Channel Handoff 180
 - 8.4.1 Traffic Channel Soft Handoff 181
 - 8.4.2 Dynamic Thresholds for Soft Handoff 182
 - 8.4.3 Soft Handoff for Supplemental Channels 188
 - 8.4.4 CDMA-to-CDMA Hard Handoff 189
- 8.5 Traffic Channel Power Control 192
 - 8.5.1 Forward Traffic Channel Power Control 193
 - 8.5.2 Reverse Traffic Channel Power Control 196
- 8.6 References 199

CHAPTER 9 CDMA2000 NETWORK ARCHITECTURE**201**

- 9.1 Introduction 201
- 9.2 Legacy CDMAONE Networks 201
- 9.3 New Network Elements in CDMA2000 203
- 9.4 New Network Element Interfaces in CDMA2000 206
- 9.5 Mobility Management for Packet Data Services 207
 - 9.5.1 Inter-PCF and Intra-PDSN Handoff 209
 - 9.5.2 Inter-PDSN Handoff 210
 - 9.5.3 Inter-PDSN Fast Handoff 212
- 9.6 3GPP2 CDMA2000 Network Model 213
- 9.7 3GPP2 All-IP Network Model 217
- 9.8 End-to-End QoS Network Model 222
- 9.9 Positioning System in CDMA2000 225
- 9.10 References 228

CHAPTER 10 *1xEV-DO (HRPD) AIR INTERFACE*

229

- 10.1 Introduction 229
- 10.2 Air Interface Protocol Layers 230
- 10.3 Physical and Logical Channelization 234
 - 10.3.1 Forward Link Channels 234
 - 10.3.2 Reverse Link Channels 236
- 10.4 Forward Physical Channel Structure 237
 - 10.4.1 Forward Traffic Channel Structure 239
 - 10.4.2 Forward MAC Channel Structure 241
 - 10.4.3 Quadrature Spreading and Modulation 243
- 10.5 Reverse Physical Channel Structure 243
 - 10.5.1 Reverse Traffic Channel Structure 244
 - 10.5.2 Reverse Access Channel Structure 247
 - 10.5.3 Quadrature Spreading and Modulation 247
- 10.6 Data Transmission on the Forward Link 248
 - 10.6.1 Forward Rate Selection 248
 - 10.6.2 Forward Link Packet Scheduling 250
 - 10.6.3 Hybrid ARQ and Multislot Data Transmission on the Forward Link 251
- 10.7 Data Transmission on the Reverse Link 252
 - 10.7.1 Data Rate Selection for Reverse Data Channel 253
 - 10.7.2 Power Control on the Reverse Traffic Channel 255
 - 10.7.3 Cell/Sector Reselection 255
- 10.8 Enhancements in HRPD/IS856 Release A 257
 - 10.8.1 Reverse Link Enhancements 257
 - 10.8.2 Forward Link Enhancements 260
 - 10.8.3 Improved QoS, Handoff and Call Set Up 263
- 10.9 HRPD Network Architecture 264
- 10.10 HRPD-IS2000 Hybrid Networks 265
- 10.11 References 268

CHAPTER 11 *CDMA2000 RELEASE D (1xEV-DV)*

269

- 11.1 Introduction 269
- 11.2 1x-EV DV Protocol Layers 271
- 11.3 New Physical Channels in 1xEV-DV (Releases C and D) 272
- 11.4 Channel Configuration Capabilities for Release D 275
- 11.5 Forward Packet Data Channel Operation 276
 - 11.5.1 F-PDCCH Processing 278
 - 11.5.2 Hybrid ARQ on F-PDCH 281
- 11.6 Channel Quality Measurement and Cell Switch 284
- 11.7 Reverse Packet Data Channel Operation 286
- 11.8 Physical Layer Structure for the New Channels 290
 - 11.8.1 Forward Packet Data Control Channel Structure 290
 - 11.8.2 Forward Packet Data Channel Structure 291
 - 11.8.3 Reverse Packet Data and Control Channels 296
- 11.9 Other Enhancements in 1xEV-DV 302
 - 11.9.1 Broadcast/Multicast Service (BCMCS) 302
 - 11.9.2 Fast Call Setup 304
 - 11.9.3 Other Signaling Enhancements 304
- 11.10 References 306

CHAPTER 12	<i>RADIO PERFORMANCE AND NETWORK PLANNING</i>	307
12.1	Introduction	307
12.2	CDMA2000 Coverage and Link Budget Analysis	308
12.2.1	IS2000 Reverse Link Budget Analysis	308
12.2.2	IS2000 Forward Link Budget Analysis	314
12.3	CDMA2000 Voice and Data Capacity Performance	318
12.4	1xEV-DO Coverage and Capacity Performance	320
12.5	Radio Network Dimensioning and Planning Issues	323
12.5.1	Greenfield Deployment	323
12.5.2	Migration or Expansion of an Existing Network	328
12.6	References	330
CHAPTER 13	<i>OVERVIEW OF OTHER IMT2000 STANDARDS</i>	331
13.1	Introduction	331
13.2	IMT2000-Direct Spread, UMTS-FDD (WCDMA)	331
13.3	High-Speed Downlink Packet Access (HSDPA)	332
13.4	IMT2000-TDD (TD-CDMA)	334
13.5	UMTS Network Architecture	336
13.6	References	338
INDEX		339
