# Contents

<b>Preface</b>	xi
<b>Acknowledgements</b>	xv
<b>PART ONE</b>	<b>1</b>
<b>1 Introduction</b>	<b>3</b>
1.1 Specification Process for 3G	5
1.2 Introduction to the 3G Network Architecture	8
1.2.1 Conceptual Network Model	8
1.2.2 Structural Network Architecture	9
1.2.3 Resource Management Architecture	11
1.2.4 Bearer Architecture	13
<b>2 Evolution from GSM to UMTS Multi-access</b>	<b>15</b>
2.1 From Analogue to Digital	16
2.2 From Digital to Reachability	18
2.3 Jump to Packet World and Higher Speeds	19
2.4 3GPP Release 99	21
2.5 3GPP Release 4	24
2.6 3GPP Release 5	25
2.7 Trends beyond 3GPP Release 5	26
<b>PART TWO</b>	<b>29</b>
<b>3 The Key Challenges Facing the Mobile Network Architecture</b>	<b>31</b>
3.1 Radio Communication Constraints	31
3.2 Cellular Radio Communication Principles	36

3.3	Multi-access Techniques	39
3.4	Device Mobility	44
3.5	Network Transport	45
3.6	Transport Alternatives for UMTS	46
3.6.1	Asynchronous Transfer Mode in UMTS	48
3.6.2	IP Transport	49
3.7	Network Management	51
3.7.1	High-level Architecture of a Network Management System	51
3.8	Spectrum and Regulatory	53
3.8.1	UMTS Spectrum Allocation	56
<b>4</b>	<b>Overview of UMTS Radio Access Technologies</b>	<b>59</b>
4.1	WCDMA Essentials	59
4.1.1	Basic Concepts	60
4.1.2	WCDMA Radio Channels	65
4.1.3	WCDMA Frame Structure	72
4.2	WCDMA Enhancement—HSDPA	75
4.2.1	Introduction	75
4.2.2	The Benefits and Impacts	76
4.2.3	Basic Concept	78
4.2.4	Adaptive Modulation and Coding	78
4.2.5	Hybrid Automatic Repeat Request	80
4.2.6	Fast Scheduling	80
4.2.7	Seamless Cell Change	81
4.2.8	Basic Operation and Architectural Considerations	81
4.3	GSM/EDGE	83
4.3.1	Basic Concepts	83
4.3.2	Radio Channels and Frame Structures	85
4.3.3	General Packet Radio Service (GPRS)	89
4.3.4	Enhanced Data Rates for Global/GSM Evolution (EDGE)	91
4.4	WLAN Technology	93
4.4.1	Physical Technology	93
4.4.2	Medium Access Control	94
4.4.3	Network Formation	97
<b>5</b>	<b>UMTS Radio Access Network</b>	<b>99</b>
5.1	UTRAN Architecture	100
5.2	Base Station (BS, Node B)	101
5.2.1	Base Station Structure	101
5.2.2	Modulation Method	103
5.2.3	Receiver Technique	106
5.2.4	Cell Capacity	108
5.2.5	Control Functions in BS	110
5.3	Radio Network Controller (RNC)	110
5.3.1	Radio Resource Management (RRM)	112
5.3.2	UTRAN Control Functions	134

<b>6</b>	<b>UMTS Core Network</b>	<b>143</b>
6.1	UMTS Core Network Architecture	145
6.1.1	Core Network Entities that Are Common to All Domains and Subsystems	146
6.1.2	CS Domain	148
6.1.3	PS Domain	150
6.2	CN Management Tasks and Control Duties	152
6.2.1	Mobility Management (MM)	153
6.2.2	Communication Management (CM)	167
6.3	Charging, Billing and Accounting	173
6.3.1	Charging and Accounting	173
6.3.2	Billing	176
6.4	IP Multimedia Subsystem (IMS)	180
6.5	IP Multimedia Subsystem Fundamentals	181
6.6	IMS Entities and Functionalities	185
6.6.1	Call Session Control Functions (CSCFs)	185
6.6.2	Databases	188
6.6.3	Interworking Functions	189
6.6.4	Service-related Functions	190
6.6.5	Support Functions	191
6.6.6	Charging Functions	193
<b>7</b>	<b>The UMTS Terminal</b>	<b>195</b>
7.1	Terminal Architecture	195
7.2	Differentiation of Terminals	199
7.3	Terminal Capabilities	203
7.4	UMTS Subscription	203
7.5	User Interface	205
<b>8</b>	<b>Services in the UMTS Environment</b>	<b>207</b>
8.1	About Services in General	207
8.1.1	What Do Users Really Want?	208
8.1.2	How Can We Make Money out of This?	209
8.1.3	What Are the Most Adequate Design Principles in a Complex System?	210
8.1.4	Do Service-related Facts in Mobile Networks Differ from Those in Fixed Networks?	211
8.2	Quality of Service (QoS)	211
8.2.1	Traffic Classes and QoS Attributes	211
8.2.2	About QoS Mechanisms	216
8.2.3	ReSerVation Protocol (RSVP)	217
8.2.4	Differentiated Services (DiffServ)	218
8.2.5	Multi Protocol Label Switching (MPLS)	219
8.3	About Service Subsystems	221
8.3.1	Services Inherited from the GSM	221

8.3.2	UMTS SIM Application Toolkit (USAT)	223
8.3.3	Browsing Facilities	224
8.3.4	Location Communication Services (LCS)	226
8.3.5	IMS Service Mechanism—Messaging	248
8.3.6	IMS Service Mechanism—Presence	249
8.4	Conclusions	251
<b>9</b>	<b>Security in the UMTS Environment</b>	<b>253</b>
9.1	Access Security in UMTS	254
9.1.1	Legacy from 2G	255
9.1.2	Mutual Authentication	256
9.1.3	Cryptography for Authentication	258
9.1.4	Temporary Identities	261
9.1.5	UTRAN Encryption	262
9.1.6	Integrity Protection of Radio Resource Control (RRC) Signalling	264
9.1.7	Summary of Access Security	266
9.2	Additional Security Features in 3GPP R99	266
9.2.1	Ciphering Indicator	266
9.2.2	Identification of the UE	266
9.2.3	Security for Location Services (LCSs)	268
9.2.4	User-to-USIM Authentication	268
9.2.5	Security in Universal Subscriber Identity Module (USIM) Application Toolkit	268
9.3	Security Aspects at the System and Network Level	268
9.3.1	Typical Security Attacks	269
9.3.2	Overview of 3GPP Network Domain Security	271
9.3.3	IP Security (IPSec)	271
9.3.4	MAPSec	274
9.4	Protection of Applications and Services	274
9.4.1	IP Multimedia CN Subsystem (IMS) Security	275
9.4.2	Examples of Application-layer Security Mechanisms	279
9.4.3	Security for Session Layer	279
9.4.4	AAA Mechanisms	280
9.5	Lawful Interception	280
<b>PART THREE</b>		<b>285</b>
<b>10</b>	<b>UMTS Protocols</b>	<b>287</b>
10.1	Protocol Reference Architectures at 3GPP	287
10.1.1	The Radio Interface Protocol Reference Model	287
10.1.2	UTRAN Protocol Reference Model	289
10.1.3	The CN Protocol Reference Model	291
10.2	UMTS Protocol Interworking Architecture	294

10.3	Transport Network Protocols	297
10.3.1	Transport Network Protocol Architecture	297
10.3.2	WCDMA Physical Layer in the Uu Interface	299
10.3.3	Backbone Networking in Other Interfaces	300
10.3.4	UMTS Transport Network Protocols	308
10.4	Radio Network Protocols	318
10.4.1	Radio Network Control Plane	318
10.4.2	Radio Network User Plane	326
10.5	System Network Protocols	330
10.5.1	Non-Access Stratum Protocols	330
10.5.2	Control Plane between CN Nodes	339
10.5.3	The User Plane in the System Network	341
10.6	Summary of UMTS Network Protocols	341
10.7	Overview of IMS Protocols	345
<b>11</b>	<b>Procedure Examples</b>	<b>351</b>
11.1	Elementary Procedures	351
11.1.1	Paging	353
11.1.2	RRC Connection Set-up	354
11.1.3	Transaction Reasoning	356
11.1.4	Authentication and Security Control	357
11.1.5	Transaction Set-up with Radio Access Bearer (RAB) Allocation	358
11.1.6	Transaction	360
11.1.7	Transaction Clearing and RAB Release	360
11.1.8	RRC Connection Release	364
11.2	RRM Procedure Examples	364
11.2.1	Soft Handover—Link Addition and Link Deletion	364
11.2.2	SRNS Relocation—Circuit Switched	367
11.2.3	Inter-System Handover from UMTS to GSM—Circuit Switched	369
11.3	MM Procedure Examples	371
11.3.1	Cell Update	371
11.3.2	URA Update	373
11.3.3	Location Update to the CN CS Domain	373
11.3.4	Routing Area Update to the CN PS Domain	374
11.4	CC Procedure Example	376
11.5	Packet Data Example	378
11.6	IMS Examples	379
11.6.1	IMS Registration Example	380
11.6.2	IMS Session Example	383
	<b>List of Abbreviations</b>	<b>387</b>
	<b>Bibliography</b>	<b>399</b>
	<b>Index</b>	<b>401</b>
