Trenchless Technology

PIPELINE AND UTILITY
DESIGN, CONSTRUCTION,
AND RENEWAL

*Complete Reference
for the Engineering
and Construction
Industry*

- Construction Details
- Design Guidelines
- Environmental Issues
- Safety Regulations
- And much more!

Mohammad Najafi, Ph.D., P.E.

CONTENTS

Foreword xiii
Preface xv
Acknowledgments xvii

Chapter 1. Overview and Comparison of Trenchless Technologies 1

1.1. Introduction / 1
1.2. Two Main Divisions of Trenchless Technology Methods / 4
1.3. Trenchless Construction Methods (TCM) / 4
1.4. Trenchless Renewal Methods (TRM) / 9
1.5. Summary / 19
 Review Questions / 20
 Bibliography / 21

Chapter 2. Social Costs of Utility Construction: A Life Cycle Cost Approach 23

2.1. Cost of A Project / 23
2.2. Preconstruction Costs / 23
2.3. Construction Costs / 24
2.4. Postconstruction Costs / 31
2.5. Calculating Social Costs / 33
2.6. Estimating Cost of Traffic Disruptions / 33
2.7. Reducing Social Costs / 39
2.8. Case Study: Historic Trees Preserved by Trenchless Technology / 39
2.9. Summary / 40
 Review Questions / 41
 References / 41
 Bibliography / 41

Chapter 3. Pipeline Asset Management, Inspection, and Cleaning 43

3.1. Background / 43
3.2. Asset Management / 45
3.3. Causes of Pipeline Deterioration / 47
3.4. Pipeline Inspection: Gravity Sewer Pipe / 56
3.5. Pipeline Inspection: Pressure Pipe / 68
3.6. Acoustic Emission Testing (AET) / 74
3.7. Transmission Main Leak Location / 79
3.8. Pipeline Cleaning Methods / 82
3.9. Chemical Cleaning Case Study / 91
3.10. Summary / 93

Acknowledgments /	93
Review Questions /	93
References /	94

Chapter 4. Design Considerations for Trenchless Pipeline Construction Methods

97

4.1. Introduction /	97
4.2. Surface Survey /	97
4.3. Subsurface Investigations /	98
4.4. Alignment Considerations /	100
4.5. Calculating Jacking Force in Pipe Jacking and Microtunneling /	102
4.6. Principles of Drilling Fluids for Horizontal Directional Drilling (HDD) /	110
4.7. Principles of Tracking and Locating for Horizontal Directional Drilling /	119
4.8. Summary /	126
Review Questions /	126
References /	126

Chapter 5. Design Considerations for Trenchless Renewal Methods

129

5.1. Introduction /	129
5.2. TRM Selection Process /	129
5.3. Selection of a Renewal Method Based on Existing Pipe Conditions /	131
5.4. Selection of a Renewal Method Based on Site and Project Conditions /	131
5.5. Selection of a Renewal Method (A Six-Step Process) /	132
5.6. General Design Considerations /	138
5.7. Structural Design of CIPP /	139
Acknowledgments /	159
Review Questions /	159
References /	159

Chapter 6. Pipe Materials

161

6.1. Introduction /	161
6.2. Pipe-Soil Interaction /	163
6.3. Pipe Selection Considerations /	165
6.4. Cement-Based Pipes /	169
6.5. Vitrified Clay Pipe (VCP) /	174
6.6. Plastic Pipes /	177
6.7. Metallic Pipes /	190
6.8. Corrosion Protection /	198
Acknowledgments /	199
Review Questions /	199
References /	200

Chapter 7. Horizontal Auger Boring

203

7.1. Introduction /	203
7.2. Brief History /	203
7.3. Method Description /	204
7.4. Cradle-Type Horizontal Auger Boring /	214
7.5. Main Features and Application Range /	215
7.6. Guidance Systems /	217

- 7.7. Recent Innovations / 218
- Review Questions / 219
- References / 220

Chapter 8. Pipe Ramming**221**

- 8.1. Introduction / 221
- 8.2. Method Description / 221
- 8.3. Main Features and Application Range / 226
- 8.4. Effects of Pipe Ramming on Surrounding Environment / 228
- Review Questions / 228
- References / 229

Chapter 9. Pipe Jacking and Utility Tunneling**231**

- 9.1. Introduction to Pipe Jacking / 231
- 9.2. Method Description / 231
- 9.3. Main Features and Application Range / 238
- 9.4. Introduction to Utility Tunneling / 240
- 9.5. Method Description / 240
- 9.6. Main Features and Application Range / 244
- Review Questions / 245
- References / 245

Chapter 10. Horizontal Directional Drilling**247**

- 10.1. Introduction and Background / 247
- 10.2. HDD Classifications / 252
- 10.3. Method Description / 253
- 10.4. Main Features and Application Range / 259
- 10.5. Emerging Technologies / 265
- Review Questions / 267
- References / 267

Chapter 11. Microtunneling Methods**269**

- 11.1. Introduction / 269
- 11.2. Method Description / 270
- 11.3. Microtunneling Process / 277
- 11.4. Main Features and Application Range / 279
- Review Questions / 281
- References / 282

Chapter 12. Pilot Tube Microtunneling**283**

- 12.1. Introduction / 283
- 12.2. Method Description / 283
- 12.3. Main Features and Application Range / 291
- 12.4. Advantages / 292
- 12.5. Limitations / 292
- Review Questions / 292
- References / 293

Chapter 13. Cured-in-Place-Pipe**295**

- 13.1. Introduction / 295
- 13.2. Site Compatibility and Applications / 295
- 13.3. Main Characteristics / 296
- 13.4. Method Description / 297
- 13.5. Major Advantages / 301
- 13.6. Major Limitations / 301
- 13.7. Case Study / 302
 - Review Questions / 310
 - References / 311

Chapter 14. Sliplining**313**

- 14.1. Introduction / 313
- 14.2. Site Compatibility and Applications / 313
- 14.3. Main Characteristics / 314
- 14.4. Sliplining Methods / 314
- 14.5. Installation / 316
- 14.6. Design Considerations / 319
- 14.7. Sliplining Gas Lines / 319
- 14.8. Advantages / 320
- 14.9. Limitations / 320
- 14.10. Case Study: Large Diameter Segmental Sliplining / 321
 - Acknowledgments / 323
 - Review Questions / 323
 - References / 324

Chapter 15. Close-Fit Pipe**325**

- 15.1. Introduction / 325
- 15.2. Close-Fit Pipe Applications / 327
- 15.3. Method Description / 328
- 15.4. Quality Documentation / 330
- 15.5. Advantages / 330
- 15.6. Limitations / 331
 - Acknowledgments / 331
 - Review Questions / 331
 - References / 332

Chapter 16. In-Line Replacement**333**

- 16.1. Introduction / 333
- 16.2. Pipe Bursting Methods / 335
- 16.3. Pipe Removal Methods / 338
- 16.4. Method Applicability / 340
- 16.5. Construction Considerations / 342
- 16.6. Advantages / 343
- 16.7. Limitations / 343
 - Review Questions / 343
 - References / 344

Chapter 17. Lateral Renewal**347**

- 17.1. Introduction / 347
- 17.2. Service Lateral Renewal Methods / 348
- 17.3. Advantages / 353
- 17.4. Limitations / 353
 - Review Questions / 353
 - References / 354

Chapter 18. Localized Repair**355**

- 18.1. Introduction / 355
- 18.2. Primary Characteristics / 355
- 18.3. Robotic Repairs / 356
- 18.4. Grouting / 359
- 18.5. Internal Seal / 363
- 18.6. Point CIPP / 366
 - Acknowledgments / 369
 - Review Questions / 369
 - References / 369

Chapter 19. Modified Sliplining**371**

- 19.1. Introduction / 371
- 19.2. Spiral Wound Pipe (SWP) / 371
- 19.3. Panel Lining (PL) / 373
- 19.4. Formed-in-Place Pipe (FIPP) / 379
 - Review Questions / 383
 - References / 384

Chapter 20. Underground Coatings and Linings**385**

- 20.1. Introduction / 385
- 20.2. Material Type and Purpose / 385
- 20.3. Installation Process / 389
- 20.4. Inspection and Testing / 397
 - Review Questions / 399
 - References / 400

Chapter 21. Thermoformed Pipe**401**

- 21.1. Introduction / 401
- 21.2. Thermoformed Pipe Applications / 403
- 21.3. Construction Considerations / 404
- 21.4. Quality Assurance and Documentation / 407
- 21.5. Advantages / 407
- 21.6. Limitations / 408
 - Review Questions / 408
 - References / 409

Chapter 22. Sewer Manhole Renewal**411**

-
- 22.1. Introduction / 411
22.2. Manhole Components and Typical Problems / 412
22.3. Manhole Inspection and Safety Issues / 415
22.4. Classification of Manhole Problems and Selection of Proper Method / 415
22.5. Summary of Manhole Renewal Methods / 426
22.6. Advantages and Limitations of Manhole Renewal Methods / 426
 Review Questions / 426
 References / 429

- Glossary of Terms** 431
Acronyms and Abbreviations 451
Conversion Table 457
Applicable Standards 459
