

Six Ideas That Shaped Physics

Unit N: The Laws of Physics
Are Universal

Second Edition

Thomas A. Moore

Contents: Unit N

The Laws of Physics Are Universal

About the Author	xiii	N3.5	Coupling Forces	47
Preface	xv	N3.6	Graphs of One-Dimensional Motion	48
Introduction for Students	xix	N3.7	A Few Quantitative Examples	51
			Two-Minute Problems	52
			Answers to Exercises	56

Chapter N1

Newton's Laws

	Chapter Overview	2
N1.1	The Newtonian Synthesis	4
N1.2	Newton's First Law	6
N1.3	Newton's Third Law	7
N1.4	Newton's Second Law	8
N1.5	Classification of Forces	11
N1.6	Free-Body Diagrams	13
	Two-Minute Problems	14
	Homework Problems	16
	Answers to Exercises	17

Chapter N2

Vector Calculus

	Chapter Overview	18
N2.1	The Time Derivative of a Vector	20
N2.2	The Definition of Velocity	21
N2.3	The Definition of Acceleration	24
N2.4	Motion Diagrams	26
N2.5	Numerical Results from Motion Diagrams	30
N2.6	Uniform Circular Motion	31
	Two-Minute Problems	34
	Answers to Exercises	37

Chapter N3

Forces from Motion

	Chapter Overview	38
N3.1	The Kinematic Chain	40
N3.2	Net-Force Diagrams	40
N3.3	Qualitative Examples	41
N3.4	Third-Law and Second-Law Pairs	46

Chapter N4

Motion from Forces

	Chapter Overview	58
N4.1	The Reverse Kinematic Chain	60
N4.2	Graphical Antiderivatives	60
N4.3	Integrals for One-Dimensional Motion	62
N4.4	Free Fall in One Dimension	66
N4.5	Integrals in Three Dimensions	67
N4.6	Constructing Trajectory Diagrams	69
N4.7	The Newton Program	71
	Two-Minute Problems	73
	Homework Problems	74
	Answers to Exercises	76

Chapter N5

Statics

	Chapter Overview	78
N5.1	Forces from Motion: An Overview	80
N5.2	Introduction to Statics	80
N5.3	Statics Problems Involving Torque	81
N5.4	Solving Force-from-Motion Problems	84
N5.5	Solving Statics Problems	86
	Two-Minute Problems	90
	Homework Problems	91
	Answers to Exercises	93

Chapter N6

Linearly Constrained Motion

	Chapter Overview	94
N6.1	Free-Particle Diagrams	96
N6.2	Motion at a Constant Velocity	97

N6.3	Static and Kinetic Friction Forces	98
N6.4	Drag Forces	103
N6.5	Linearly Accelerated Motion	104
N6.6	A Constrained-Motion Framework	105
	Two-Minute Problems	108
	Homework Problems	109
	Answers to Exercises	111

Chapter N7

Coupled Objects		112
	Chapter Overview	112
N7.1	Force Notation for Coupled Objects	114
N7.2	Pushing Blocks	116
N7.3	Strings, Real and Ideal	118
N7.4	Pulleys	122
N7.5	Using the Framework	122
	Two-Minute Problems	124
	Homework Problems	125
	Answers to Exercises	128

Chapter N8

Circularly Constrained Motion		130
	Chapter Overview	130
N8.1	Uniform Circular Motion	132
N8.2	Directionals	134
N8.3	Nonuniform Circular Motion	135
N8.4	Banking	137
N8.5	Examples	140
	Two-Minute Problems	143
	Homework Problems	145
	Answers to Exercises	147

Chapter N9

Noninertial Frames		148
	Chapter Overview	148
N9.1	Fictitious Forces	150
N9.2	The Galilean Transformation	150
N9.3	Inertial Reference Frames	154
N9.4	Linearly Accelerating Frames	156
N9.5	Circularly Accelerating Frames	158
N9.6	Using Fictitious Forces	159
N9.7	Freely Falling Frames and Gravity	161
	Two-Minute Problems	163
	Homework Problems	164
	Answers to Exercises	166

Chapter N10

Projectile Motion	168
Chapter Overview	168
N10.1 Weight and Projectile Motion	170
N10.2 Simple Projectile Motion	171
N10.3 Some Basic Implications	173
N10.4 A Projectile Motion Framework	174
N10.5 Drag and Terminal Speed	178
Two-Minute Problems	180
Homework Problems	181
Answers to Exercises	184

Chapter N11

Oscillatory Motion	186
Chapter Overview	186
N11.1 A Mass on a Spring	188
N11.2 Solving the Equation of Motion	189
N11.3 The Oscillator as a Model	192
N11.4 A Mass Hanging from a Spring	193
N11.5 An Analogy to Circular Motion	195
N11.6 The Simple Pendulum	197
Two-Minute Problems	199
Homework Problems	200
Answers to Exercises	202

Chapter N12

Introduction to Orbits	204
Chapter Overview	204
N12.1 Kepler's Laws	206
N12.2 Orbits Around a Massive Primary	207
N12.3 Kepler's Second Law	209
N12.4 Circular Orbits and Kepler's Third Law	210
N12.5 Circular Orbit Problems	212
N12.6 Black Holes and Dark Matter	217
Two-Minute Problems	219
Homework Problems	219
Answers to Exercises	221

Chapter N13

Planetary Motion	222
Chapter Overview	222
N13.1 Ellipses and Hyperbolas	224
N13.2 Trajectory Diagrams for Orbits	227
N13.3 Conservation Laws and Orbits	231

N13.4	Solving Orbit Problems	233
	Two-Minute Problems	236
	Homework Problems	237
	Answers to Exercises	239

Appendix NA

	Differential Calculus	241
NA.1	Derivatives	241
NA.2	Some Useful Rules	241
NA.3	Derivatives and Slopes	243
NA.4	The Chain Rule	243
NA.5	Derivatives of Other Functions	244
	Homework Problems	245
	Answers to Exercises	245

Appendix NB

	Integral Calculus	246
NB.1	Antiderivatives	246
NB.2	Definite Integrals	246
NB.3	The Fundamental Theorem	247
NB.4	Indefinite Integrals	248
NB.5	Substitution of Variables	249
	Homework Problems	250
	Answers to Exercises	250
	Glossary	251
	Credits	257
	Index	259
