

# Six Ideas That Shaped Physics

Second Edition

Thomas A. Moore

# Contents: Unit T

## *Some Processes Are Irreversible*

About the Author	xi	T3.5: Computing the Work	46
Preface	xiii	T3.6: Adiabatic Processes	50
Introduction for Students	xvi	Two-Minute Problems	53
		Homework Problems	54
		Answers to Exercises	57
<b>Chapter T1</b>			
Temperature	2	<b>Chapter T4</b>	
Chapter Overview	2	Macrostates and Microstates	58
T1.1: Introduction to the Unit	4	Chapter Overview	58
T1.2: Irreversible Processes	4	T4.1: Distinguishing Macrostates from Microstates	60
T1.3: The Paradigmatic Thermal Process	7	T4.2: The Einstein Model of a Solid	61
T1.4: Temperature and Equilibrium	8	T4.3: Counting Microstates	63
T1.5: Thermometers	9	T4.4: Two Einstein Solids in Thermal Contact	66
T1.6: Temperature and Thermal Energy	14	T4.5: The Fundamental Assumption	67
Two-Minute Problems	15	T4.6: Using StatMech	68
Homework Problems	16	Two-Minute Problems	71
Answers to Exercises	19	Homework Problems	72
		Answers to Exercises	74
<b>Chapter T2</b>			
Ideal Gases	20	<b>Chapter T5</b>	
Chapter Overview	20	The Second Law	76
T2.1: A Microscopic Model of an Ideal Gas	22	Chapter Overview	76
T2.2: Temperature and Energy	26	T5.1: What Happens as Systems Become Large?	78
T2.3: Molecular Speeds and Brownian Motion	28	T5.2: Irreversibility in Einstein Solids	79
T2.4: The Thermal Energy of a Gas	30	T5.3: Irreversibility in General	84
T2.5: Solids and Liquids	32	T5.4: The Definition of Entropy	85
T2.6: Conclusions	33	T5.5: The Second Law of Thermodynamics	87
Two-Minute Problems	34	T5.6: Entropy and Disorder	88
Homework Problems	34	Two-Minute Problems	90
Answers to Exercises	37	Homework Problems	91
		Answers to Exercises	93
<b>Chapter T3</b>			
Gas Processes	38	<b>Chapter T6</b>	
Chapter Overview	38	Temperature and Entropy	94
T3.1: Review of Heat and Work	40	Chapter Overview	94
T3.2: Work During Expansion or Compression	42	T6.1: The Definition of Temperature	96
T3.3: The State of a Gas	44	T6.2: Consistency with the Old Definition	98
T3.4: $P$ - $V$ Diagrams and Constrained Processes	45		

T6.3:	A Financial Analogy	100	T8.3:	A General Expression for Entropy Changes	140
T6.4:	The Boltzmann Factor	101	T8.4:	Constant-Temperature Processes	142
T6.5:	Some Simple Applications	105	T8.5:	Handling Changing Temperatures	145
	Two-Minute Problems	108	T8.6:	Non-quasistatic Processes	147
	Homework Problems	108		Two-Minute Problems	150
	Answers to Exercises	111		Homework Problems	150
				Answers to Exercises	152

## Chapter T7

### Some Mysteries Resolved 112

	Chapter Overview	112
T7.1:	The Maxwell-Boltzmann Distribution	114
T7.2:	Counting Velocity States	118
T7.3:	The Average Energy of a Quantum System	120
T7.4:	Application to Einstein Solids	122
T7.5:	Energy Storage in Gas Molecules	125
	Two-Minute Problems	128
	Homework Problems	129
	Answers to Exercises	133

## Chapter T8

### Calculating Entropy Changes 134

	Chapter Overview	134
T8.1:	The Entropy of a Monatomic Gas	136
T8.2:	Entropy Depends on Volume	139

## Chapter T9

### Heat Engines 154

	Chapter Overview	154
T9.1:	Perfect Engines Are Impossible	156
T9.2:	Real Heat Engines	157
T9.3:	The Efficiency of a Heat Engine	159
T9.4:	Consequences	162
T9.5:	Refrigerators	164
T9.6:	The Carnot Cycle	168
	Two-Minute Problems	171
	Homework Problems	172
	Answers to Exercises	176

### Glossary 177

### Index 181
