

Six Ideas That Shaped Physics

Unit R: The Laws of Physics
Are Frame-Independent

Second Edition

Thomas A. Moore

About the Author	xi	R3.3	The Same Result from the Radar Method	44
Preface	xiii	R3.4	The Geometric Analogy	46
Introduction for Students	xvii	R3.5	Proper Time and the Spacetime Interval	48
			Two-Minute Problems	52
			Homework Problems	52
			Answers to Exercises	55
Chapter R1				
The Principle of Relativity	2			
Chapter Overview	2			
R1.1 Introduction to the Principle	4			
R1.2 Events and Spacetime Coordinates	6			
R1.3 Reference Frames	7			
R1.4 Inertial Reference Frames	10			
R1.5 The Final Principle of Relativity	12			
R1.6 Newtonian Relativity	13			
Two-Minute Problems	16			
Homework Problems	17			
Answers to Exercises	19			
Chapter R2				
Synchronizing Clocks	20			
Chapter Overview	20			
R2.1 The Problem of Electromagnetic Waves	22			
R2.2 Relativistic Clock Synchronization	25			
R2.3 SR Units	27			
R2.4 Spacetime Diagrams	29			
R2.5 Spacetime Diagrams as Movies	32			
R2.6 The Radar Method	32			
Two-Minute Problems	35			
Homework Problems	35			
Answers to Exercises	39			
Chapter R3				
The Nature of Time	40			
Chapter Overview	40			
R3.1 Three Kinds of Time	42			
R3.2 Coordinate Time Is Frame-Dependent	42			
		R3.3	The Same Result from the Radar Method	44
		R3.4	The Geometric Analogy	46
		R3.5	Proper Time and the Spacetime Interval	48
			Two-Minute Problems	52
			Homework Problems	52
			Answers to Exercises	55
Chapter R4				
			The Metric Equation	56
			Chapter Overview	56
		R4.1	Introduction to the Metric Equation	58
		R4.2	Deriving the Metric Equation	59
		R4.3	About Perpendicular Displacements	61
		R4.4	Evidence Supporting the Metric Equation	63
		R4.5	Spacetime Is <i>Not</i> Euclidean	64
		R4.6	More About the Geometric Analogy	66
		R4.7	Some Examples	68
			Two-Minute Problems	70
			Homework Problems	71
			Answers to Exercises	73
Chapter R5				
			Proper Time	74
			Chapter Overview	74
		R5.1	A Curved Footpath	76
		R5.2	Curved Worldlines in Spacetime	77
		R5.3	The Binomial Approximation	81
		R5.4	The Spacetime Interval Is the Longest Possible Proper Time	83
		R5.5	Experimental Evidence	85
		R5.6	The Twin Paradox	87
			Two-Minute Problems	90
			Homework Problems	91
			Answers to Exercises	94

Chapter R6

Coordinate Transformations	96
Chapter Overview	96
R6.1 Overview of Two-Observer Diagrams	98
R6.2 Conventions	99
R6.3 Drawing the Diagram t' Axis	100
R6.4 Drawing the Diagram x' Axis	102
R6.5 Reading the Two-Observer Diagram	104
R6.6 The Lorentz Transformation	106
Two-Minute Problems	110
Homework Problems	111
Answers to Exercises	114

Chapter R7

Lorentz Contraction	116
Chapter Overview	116
R7.1 The Length of a Moving Object	118
R7.2 A Two-Observer Diagram of a Stick	118
R7.3 What Causes the Contraction?	121
R7.4 The Contraction Is Frame-Symmetric	122
R7.5 The Barn and Pole Paradox	123
R7.6 Other Ways to Define Length	127
Two-Minute Problems	128
Homework Problems	129
Answers to Exercises	132

Chapter R8

The Cosmic Speed Limit	134
Chapter Overview	134
R8.1 Causality and Relativity	136
R8.2 Timelike, Lightlike, and Spacelike Intervals	139
R8.3 The Causal Structure of Spacetime	143
R8.4 The Einstein Velocity Transformation	144
Two-Minute Problems	147
Homework Problems	148
Answers to Exercises	152

Chapter R9

Four-Momentum	154
Chapter Overview	154
R9.1 A Plan of Action	156
R9.2 Conservation of Newtonian Momentum Is Not Frame-Independent	157
R9.3 The Four-Momentum Vector	158

R9.4 Properties of Four-Momentum	161
R9.5 Four-Momentum and Relativity	163
R9.6 Four-Momentum's Time and Space Components	165
Two-Minute Problems	168
Homework Problems	168
Answers to Exercises	171

Chapter R10

Conservation of Four-Momentum	172
Chapter Overview	172
R10.1 Energy-Momentum Diagrams	174
R10.2 Working Conservation of Four-Momentum Problems	176
R10.3 The Mass of a System of Particles	180
R10.4 The Four-Momentum of Light	182
R10.5 Applications to Particle Physics	185
R10.6 Parting Comments	187
Two-Minute Problems	187
Homework Problems	188
Answers to Exercises	190

Appendix RA

Conversion of Equations to SI Units	193
RA.1 Why Use SR Units?	193
RA.2 Conversion of Basic Quantities	193
RA.3 Converting SR Unit Equations to SI Unit Equations	194
RA.4 Energy-Based SR Units	195
RA.5 Exercises for Practice	196
Short Answers to Exercises	196

Appendix RB

The Relativistic Doppler Effect	197
RB.1 Introduction to the Doppler Effect	197
RB.2 Deriving the Doppler Shift Formula	197
RB.3 Applications in Astronomy	199
RB.4 The Nonrelativistic Limit	200
RB.5 Doppler Radar	201
Homework Problems	202
Answers to Exercises	202

Glossary	203
