## Section I Introduction to Computer Imaging

### Chapter 1 Computer Imaging

1.1 Overview .....	3
1.2 Image Analysis and Computer Vision .....	5
1.3 Image Processing .....	8
1.4 Key Points .....	11
1.5 References and Further Reading .....	13
1.6 Exercises .....	14

### Chapter 2 Computer Imaging Systems

2.1 Imaging Systems Overview .....	15
2.2 Image Formation and Sensing .....	18
2.2.1 Visible Light Imaging .....	20
2.2.2 Imaging Outside the Visible Range of the EM Spectrum .....	26
2.2.3 Acoustic Imaging .....	29
2.2.4 Electron Imaging .....	30
2.2.5 Laser Imaging .....	31
2.2.6 Computer Generated Images .....	32
2.3 The CVIptools Software .....	32
2.3.1 Main Window .....	34
2.3.2 Image Viewer .....	36
2.3.3 Analysis Window .....	37
2.3.4 Enhancement Window .....	37
2.3.5 Restoration Window .....	39
2.3.6 Compression Window .....	39
2.3.7 Utilities Window .....	41
2.3.8 Help Window .....	41
2.4 Image Representation .....	43
2.4.1 Binary Images .....	45
2.4.2 Gray-Scale Images .....	45
2.4.3 Color Images .....	45
2.4.4 Multispectral Images .....	54
2.4.5 Digital Image File Formats .....	54
2.5 Key Points .....	57
2.6 References and Further Reading .....	60
2.7 Exercises .....	62
2.7.1 Programming Exercise: Introduction to CVIplab .....	63

## Section II Digital Image Analysis

### Chapter 3 Introduction to Digital Image Analysis

3.1	Introduction.....	67
3.1.1	Overview.....	67
3.1.2	System Model.....	68
3.2	Preprocessing .....	69
3.2.1	Region of Interest Image Geometry.....	69
3.2.2	Arithmetic and Logic Operations.....	75
3.2.3	Spatial Filters.....	81
3.2.4	Image Quantization.....	86
3.3	Binary Image Analysis .....	93
3.3.1	Thresholding via Histogram .....	93
3.3.2	Connectivity and Labeling .....	94
3.3.3	Basic Binary Object Features.....	98
3.3.4	Binary Object Classification.....	100
3.4	Key Points.....	109
3.5	References and Further Reading .....	113
3.6	Exercises.....	114
3.6.1	Programming Exercise: Image Geometry .....	116
3.6.2	Programming Exercise: Arithmetic/Logic Operations.....	117
3.6.3	Programming Exercise: Spatial Filters.....	117
3.6.4	Programming Exercise: Image Quantization.....	118
3.6.5	Programming Exercise: Connectivity and Labeling.....	118
3.6.6	Programming Exercise: Binary Object Features.....	119

### Chapter 4 Segmentation and Edge/Line Detection

4.1	Introduction and Overview.....	121
4.2	Edge/Line Detection.....	122
4.2.1	Gradient Operators .....	124
4.2.2	Compass Masks .....	129
4.2.3	Advanced Edge Detectors .....	130
4.2.4	Edges in Color Images .....	134
4.2.5	Edge Detector Performance.....	135
4.2.6	Hough Transform.....	143
4.2.6.1	CVIPtools Parameters for the Hough Transform.....	151
4.3	Segmentation .....	151
4.3.1	Region Growing and Shrinking.....	151
4.3.2	Clustering Techniques .....	157
4.3.3	Boundary Detection .....	163
4.3.4	Combined Segmentation Approaches .....	168
4.3.5	Morphological Filtering.....	168
4.4	Key Points.....	183
4.5	References and Further Reading .....	192
4.6	Exercises.....	193
4.6.1	Programming Exercise: Edge Detection—Roberts and Sobel .....	198
4.6.2	Programming Exercise: Hough Transform .....	199
4.6.3	Programming Exercise: SCT/Center Segmentation.....	199
4.6.4	Programming Exercise: Histogram Thresholding Segmentation.....	199

4.6.5	Programming Exercise: Morphological Filters.....	199
4.6.6	Programming Exercise: Iterative Morphological Filters.....	199

## Chapter 5 Discrete Transforms

5.1	Introduction and Overview .....	201
5.2	Fourier Transform.....	206
5.2.1	The One-Dimensional Discrete Fourier Transform.....	209
5.2.2	The Two-Dimensional Discrete Fourier Transform.....	212
5.2.3	Fourier Transform Properties.....	214
5.2.3.1	Linearity.....	215
5.2.3.2	Convolution.....	215
5.2.3.3	Translation.....	215
5.2.3.4	Modulation.....	215
5.2.3.5	Rotation.....	216
5.2.3.6	Periodicity.....	217
5.2.4	Displaying the Fourier Spectrum.....	218
5.3	Cosine Transform .....	220
5.4	Walsh–Hadamard Transform .....	224
5.5	Haar Transform.....	228
5.6	Principal Components Transform.....	229
5.7	Filtering .....	231
5.7.1	Lowpass Filters.....	232
5.7.2	Highpass Filters.....	234
5.7.3	Bandpass and Bandreject Filters.....	238
5.8	Wavelet Transform .....	239
5.9	Key Points.....	245
5.10	References and Further Reading.....	252
5.11	Exercises .....	253
5.11.1	Programming Exercise: Filtering .....	260
5.11.2	Programming Exercise: Fourier Transform.....	260
5.11.3	Programming Exercise: Discrete Cosine Transform.....	260
5.11.4	Programming Exercise: Walsh–Hadamard Transform .....	260
5.11.5	Programming Exercise: Haar Transform.....	260
5.11.6	Programming Exercise: Wavelet Transform .....	260
5.11.7	Programming Exercise: CVIPtools Library Filter Functions .....	260

## Chapter 6 Feature Analysis and Pattern Classification

6.1	Introduction and Overview .....	261
6.2	Feature Extraction.....	262
6.2.1	Shape Features.....	262
6.2.2	Histogram Features.....	265
6.2.3	Color Features.....	269
6.2.4	Spectral Features.....	271
6.2.5	Texture Features.....	273
6.2.6	Feature Extraction with CVIPtools.....	277
6.3	Feature Analysis .....	278
6.3.1	Feature Vectors and Feature Spaces.....	280
6.3.2	Distance and Similarity Measures.....	281
6.3.3	Data Preprocessing.....	282

6.4	Pattern Classification .....	285
6.4.1	Algorithm Development: Training and Testing Methods.....	286
6.4.2	Classification Algorithms and Methods.....	288
6.5	Key Points.....	291
6.6	References and Further Reading .....	299
6.7	Exercises.....	300
6.7.1	Programming Exercise: Perimeter.....	305
6.7.2	Programming Exercise: Thinness Ratio.....	305
6.7.3	Programming Exercise: Aspect Ratio .....	306
6.7.4	Programming Exercise: Moment-Based RST-Invariant Features.....	306
6.7.5	Programming Exercise: Histogram Features.....	306
6.7.6	Programming Exercise: Color Features.....	306
6.7.7	Programming Exercise: Spectral Features.....	306
6.7.8	Programming Exercise: Texture Features.....	307
6.7.9	Programming Exercise: Distance and Similarity Measures.....	307
6.7.10	Programming Exercise: Template Matching.....	308
6.7.11	Programming Exercise: Pattern Classification I.....	308
6.7.12	Programming Exercise: Pattern Classification II .....	309

## Section III Digital Image Processing

### Chapter 7 Digital Image Processing and Visual Perception

7.1	Introduction and Overview .....	313
7.2	Human Visual Perception.....	313
7.2.1	The Human Visual System.....	314
7.2.2	Spatial Frequency Resolution.....	320
7.2.3	Brightness Adaptation.....	323
7.2.4	Temporal Resolution.....	324
7.2.5	Perception and Illusion .....	326
7.3	Image Fidelity Criteria.....	327
7.3.1	Objective Fidelity Measures .....	328
7.3.2	Subjective Fidelity Measures.....	331
7.4	Key Points.....	332
7.5	References and Further Reading .....	336
7.6	Exercises.....	337
7.6.1	Programming Exercise: Spatial Resolution.....	339
7.6.2	Programming Exercise: Brightness Adaptation.....	339
7.6.3	Programming Exercise: Optical Illusions.....	340

### Chapter 8 Image Enhancement

8.1	Introduction and Overview .....	341
8.2	Gray Scale Modification .....	343
8.2.1	Mapping Equations.....	343
8.2.2	Histogram Modification .....	353
8.2.3	Adaptive Contrast Enhancement .....	364
8.2.4	Color .....	371
8.3	Image Sharpening.....	377
8.3.1	Highpass Filtering.....	377
8.3.2	High Frequency Emphasis.....	378
8.3.3	Directional Difference Filters.....	379

8.3.4	Homomorphic Filtering.....	381
8.3.5	Unsharp Masking.....	383
8.3.6	Edge Detector-Based Sharpening Algorithms.....	384
8.4	Image Smoothing.....	387
8.4.1	Frequency Domain Lowpass Filtering .....	387
8.4.2	Convolution Mask Lowpass Filtering .....	387
8.4.3	Median Filtering .....	388
8.5	Key Points.....	391
8.6	References and Further Reading .....	397
8.7	Exercises .....	398
8.7.1	Programming Exercise: Digital Negative.....	403
8.7.2	Programming Exercise: Piecewise Gray Level Mapping .....	404
8.7.3	Programming Exercise: Gamma Correction.....	404
8.7.4	Programming Exercise: Histogram Modification.....	404
8.7.5	Programming Exercise: Histogram Equalization .....	404
8.7.6	Programming Exercise: ACE Filters .....	405
8.7.7	Programming Exercise: Pseudocolor .....	405
8.7.8	Programming Exercise: Basic Enhancement Convolution Masks .....	405
8.7.9	Programming Exercise: Unsharp Masking.....	406
8.7.10	Programming Exercise: Sharpening Algorithms .....	406
8.7.11	Programming Exercise: Median Filtering.....	406

## Chapter 9 Image Restoration

9.1	Introduction and Overview .....	407
9.1.1	System Model.....	407
9.2	Noise Models .....	409
9.2.1	Noise Histograms.....	409
9.2.2	Periodic Noise.....	412
9.2.3	Estimation of Noise.....	414
9.3	Noise Removal Using Spatial Filters .....	415
9.3.1	Order Filters .....	417
9.3.2	Mean Filters.....	421
9.3.3	Adaptive Filters .....	426
9.4	The Degradation Function .....	431
9.4.1	The Spatial Domain—The Point Spread Function .....	431
9.4.2	The Frequency Domain—The Modulation/Optical Transfer Function.....	435
9.4.3	Estimation of the Degradation Function.....	436
9.5	Frequency Domain Filters.....	436
9.5.1	Inverse Filter .....	438
9.5.2	Wiener Filter.....	441
9.5.3	Constrained Least Squares Filter.....	442
9.5.4	Geometric Mean Filters.....	444
9.5.5	Adaptive Filtering .....	446
9.5.6	Bandpass, Bandreject and Notch Filters .....	447
9.5.7	Practical Considerations.....	449
9.6	Geometric Transforms .....	451
9.6.1	Spatial Transforms.....	452
9.6.2	Gray Level Interpolation.....	455
9.6.3	The Geometric Restoration Procedure.....	457

9.6.4	Geometric Restoration with CVIPtools .....	458
9.7	Key Points .....	460
9.8	References and Further Reading .....	471
9.9	Exercises .....	473
9.9.1	Programming Exercise: Noise .....	478
9.9.2	Programming Exercise: Order Filters .....	479
9.9.3	Programming Exercise: Mean Filters .....	479
9.9.4	Programming Exercise: MMSE Filter .....	479
9.9.5	Programming Exercise: Frequency Domain Filters .....	479
9.9.6	Programming Exercise: Geometric Transforms .....	480

## Chapter 10 Image Compression

10.1	Introduction and Overview .....	481
10.1.1	Compression System Model .....	485
10.2	Lossless Compression Methods .....	489
10.2.1	Huffman Coding .....	492
10.2.2	Run-Length Coding .....	495
10.2.3	Lempel–Ziv–Welch Coding .....	498
10.2.4	Arithmetic Coding .....	499
10.3	Lossy Compression Methods .....	500
10.3.1	Gray-Level Run-Length Coding .....	501
10.3.2	Block Truncation Coding .....	504
10.3.3	Vector Quantization .....	509
10.3.4	Differential Predictive Coding .....	513
10.3.5	Model-Based and Fractal Compression .....	519
10.3.6	Transform Coding .....	521
10.3.7	Hybrid and Wavelet Methods .....	527
10.4	Key Points .....	534
10.5	References and Further Reading .....	540
10.6	Exercises .....	541
10.6.1	Programming Exercise: Signal-to-Noise Ratio and Root-Mean-Square Error Metrics .....	546
10.6.2	Programming Exercise: Huffman Coding .....	546
10.6.3	Programming Exercise: Run-Length Coding .....	546
10.6.4	Programming Exercise: Block Truncation Coding .....	546
10.6.5	Programming Exercise: Differential Predictive Coding .....	546
10.6.6	Programming Exercise: Zonal Coding .....	547

## Section IV Programming with CVIPtools

### Chapter 11 CVIPlab

11.1	Introduction to CVIPlab .....	551
11.2	Toolkits, Toolboxes and Application Libraries .....	556
11.3	Compiling and Linking CVIPlab .....	557
11.3.1	How to Build the CVIPlab Project with Microsoft's Visual C++ 6.0 .....	557
11.3.2	The Mechanics of Adding a Function with Microsoft's Visual C++ 6.0 .....	559
11.3.3	Using CVIPlab in the Programming Exercises .....	562

11.4	Image Data and File Structures.....	566
11.5	CVIP Projects .....	573
11.5.1	Computer Vision Projects.....	573
11.5.2	Digital Image Processing Projects.....	574

## Chapter 12 CVIPtools C Function Libraries

12.1	Introduction and Overview .....	577
12.2	Arithmetic and Logic Library—ArithLogic.lib .....	577
12.3	Band Image Library—Band.lib .....	578
12.4	Color Image Library—Color.lib .....	578
12.5	Compression Library—Compression.lib .....	579
12.6	Conversion Library—Conversion.lib .....	583
12.7	Display Library—Display.lib .....	585
12.8	Feature Extraction Library—Feature.lib .....	585
12.9	Geometry Library—Geometry.lib .....	588
12.10	Histogram Library—Histogram.lib .....	592
12.11	Image Library—Image.lib .....	593
12.12	Data Mapping Library—Mapping.lib .....	594
12.13	Morphological Library—Morphological.lib .....	595
12.14	Noise Library—Noise.lib.....	597
12.15	Segmentation Library—Segmentation.lib.....	597
12.16	Spatial Filter Library—SpatialFilter.lib .....	599
12.17	Transform Library—Transform.lib .....	603
12.18	Transform Filter Library—TransformFilter.lib.....	604

## Section V Appendices

A.	The CVIPtools CD-ROM.....	611
B.	Installing and Updating CVIPtools .....	613
C.	CVIPtools C Functions .....	617
D.	CVIP Resources.....	629
E.	CVIPtools Software Organization.....	633
F.	Common Object Module (COM) Functions— <i>cviptools.dll</i> .....	635

<b>Index</b> .....	645
--------------------	-----
