Preface ix

Abbreviations x

Normal Ranges of Laboratory Values xv

I. RENAL

1. Kidney Anatomy and Histology 3
 2. Renal Embryology 7
 3. Renal Hemodynamics 10
 4. Water Regulation 13
 5. Sodium 16
 6. Potassium 20
 7. Acid–Base Physiology 23
 8. Calcium and Phosphate 27
 9. Hypertension 31
 10. Immunologic Glomerular Injury 35
 11. Glomerular Filtration Apparatus 38
 12. Urinary Tract Infections 41
 13. Kidney Stone Formation 44
 14. Polycystic Kidney Disease 47
 15. Acute Renal Failure 50
 16. Chronic Renal Failure 54
 17. Kidney Masses 57
- Answer Key 60

II. HEMATOLOGY

18. Iron Deficiency Anemia 63
 19. Macrocytic Anemia 67
 20. Sickle Cell Disease 70
 21. Thalassemia 73
 22. Spherocytosis 76
 23. Polycythemia 79
 24. Transfusion Reaction 82
 25. Coagulation Cascade 85
 26. Intrinsic Platelet Disorders 89
 27. Inflammation and Phagocytosis 92
 28. Cells of Innate Immunity 96
 29. Platelet Deficiencies 100
 30. Thrombophilias 104
 31. Hemostatic Therapies 108
 32. Hemolytic Anemia 112
- Answer Key 115

III. ONCOLOGY

33. Neoplasm of Lymphoid Origin 119
 34. Epidermal Carcinomas 124
 35. Melanoma 127
 36. Glioblastoma Multiforme 130
 37. Viral and Microbial Carcinogenesis 132
 38. Tumor Pathology 135
 39. Tumor Pathogenesis 139
 40. Carcinogenic Agents 143
 41. Molecular Oncology 146
 42. Osteosarcoma 150
 43. Multistep Carcinogenesis 153
 44. Acute Leukemia 157
 45. Chronic Leukemia 162
- Answer Key 167
- ANSWERS** 169
- INDEX** 183
