

FOCAL PRESS VISUAL EFFECTS & ANIMATION

INCLUDES CD-ROM
FOR PC & MAC

3D for the Web

Interactive 3D animation using
3ds max, Flash and Director

Carol MacGillivray
Anthony Head

Contents

Introduction	1
Chapter 1 – 3D for beginners: basic buttons	5
Why we all love buttons	5
Introduction to modeling in 3D: building blocks	6
How to make a simple 3D button	7
Preparing a button for the Web	16
Bitmap graphic formats	19
Get your button on the Web	21
Exercise: making the turtle button	30
How to animate a turtle button	36
Converting our turtle into an animated button	40
Interview with Mach-Parat	44
Chapter 2 – Interface design for 3D websites	53
Website issues	53
Creating a product-based 3D website	54
Exercise: a realistic approach to 3D	55
Exercise: the fun approach to 3D	64
Creating the 'wow' factor – sexy graphics	68
Making a website in Flash	69
Creating a multi-page website	71
Finishing off a Flash website	77
Designing 3D websites	79
Interview with Who's We Studios	82
Chapter 3 – An introduction to real time 3D	89
Working in 3D	89
3D engines	90
Maintaining a frame rate	90
Creating content for real time 3D	91
Exporting to Shockwave	99
Putting the knowledge into practice – creating a sound toy	100
Exercise: making the sound toy	101
Introduction to Macromedia Director	107
The important parts of the Director interface	107

Making our sound toy move	112
Interview with Eduardo Carrillo	117
Chapter 4 – Designing and making characters	123
Animation – the chores and the charms	123
Character design	125
Modeling in 3D	127
The eyes have it	128
Creating a quirky character for Flash	134
Creating the Hitme character	135
Forward and Inverse Kinematics	137
Applying the Skin modifier	140
Animating the Hitme character	143
Making the animation interactive	147
Interview with Neostream	152
Chapter 5 – Making characters for Shockwave	159
Deciding how to model and animate	159
Animating and exporting using linked hierarchies	160
Making a single mesh character	164
UVW mapping	171
Material mapping the Keystone character	173
The Unwrap UVW map modifier	176
Interview with Electric Puppet	184
Chapter 6 – Animating for 3D interactivity	191
A live-action movie	191
Biped	192
Using Physique to attach your mesh	197
Animating the Biped for a game	201
The waiting game	201
Walk cycles	205
Exporting our character	206
Importing into Director	212
Adding a camera	218
Interview with Titoonic	220
Chapter 7 – Building virtual environments	229
A real and a virtual world	229
Terrains	231
Terrain building in a 3D application	233
Terrain building in Director	235
Trees	237
Water	245
Sky, clouds and backgrounds	252
Creating a new world	259
Interview with Ezone	261

Chapter 8 – Making a 3D game	269
A generic approach	269
Marketing and financing	269
Planning	270
Game design	271
Physical point of view	272
Avoiding objects (collision detection)	278
Making a game world	287
Assembling a game	299
The future for 3D on the Web	308
Appendix	311
Index	313
