

SECOND EDITION

**MASTER
MEDICINE**

Medical Biochemistry

A core text with
self-assessment

ALEXANDER C BROWNIE
JOHN C KERNOHAN

Contents

Using this book	1
1. Molecules in cells and water	3
2. Proteins	11
3. Enzymes	27
4. Cell membranes	47
5. Gas transport by the blood	59
6. Carbohydrate and fat catabolism	71
7. Other carbohydrate metabolic pathways	97
8. Protein and amino acid metabolism	111
9. Lipid synthesis and transport	127
10. Integration of metabolism	145
11. Purine and pyrimidine nucleotides	163
12. DNA structure and function	175
13. RNA structure and function	189
14. The synthesis of proteins	201
15. Molecular aspects of viruses	217
16. Biochemical functions of the liver	225
17. The biochemistry of the endocrine system	235
18. Nutrition	259
19. Biochemical functions of blood	273
20. Biochemical genetics and inborn errors of metabolism	287
Index	301
