Introduction	viii
Essential information	x

## foundation module

Foundations	
Introduction	2
Channels and modes	3
Levels	4
Hue, saturation and brightness	5
Color and light overview	7
Bit depth and mode	10
File size	11
File formats	12
Resolution	14
Understanding resolution	15
Image size	17
 Digital Capture	 23
Introduction	24
Image formation	27
Image sensor characteristics	29
Image sensor types	30
How a sensor creates an image	31
Types of digital camera	32
Choosing a digital camera	40
 Digital Negatives	 53
Introduction	54
Processing RAW data	55
Processing activity	55
White balance - Step 1	55
Tonal adjustments - Step 2	56
Noise reduction and sharpening - Step 3	58
Choosing a bit depth - Step 4	59
Choosing a color space - Step 5	61
Additional information	62

Platforms and Output Devices	67
Introduction	68
External storage	71
Mobile storage devices	74
Scanners as input devices	75
Workings of a flatbed scanner	76
Printers as output devices	78
Color Management	83
Introduction	84
What is a color space?	85
Color gamuts	88
How does RGB relate to CMYK?	89
Color concepts in practice	91
Applying color management	93
Hardware calibration	97
Image Adjustments	99
Introduction	100
First steps	101
Image capture - Step 1	101
Cropping an image - Step 2	102
Tonal adjustments - Step 3	104
Color adjustments - Step 4	108
Cleaning an image - Step 5	110
Sharpening an image - Step 6	111
Saving a modified file - Step 7	112
Experimenting with levels	115

# application module

Image Enhancements	119
Introduction	120
Advanced cropping and sizing techniques - Project 1	121
Advanced levels control - Project 2	127
Target values - Project 3	137
Shadows and highlights - Project 4	143
Advanced sharpening techniques - Project 5	148
Post-production	157
Black and white - Project 6	158
Toning - Project 7	163
Creative depth of field - Project 8	169
Tonal contraction - Project 9	175
Digital montage - Project 10	180
Presentations	187
Introduction	188
Contact sheet	189
Picture Package - Project 11	190
Screen presentations	192
Creating a slide background - Project 12	198
Creating a web photo gallery - Project 13	206
Creating a panorama using Photomerge - Project 14	211

# workflows module

Capture Workflows	215
Introduction	216
Digital camera controls	217
File format	218
Camera noise	221
White balance	225
Setting up the camera - Project 15	226
Creative use of sharpening - Project 16	231
Remote camera software	237
Capture workflow decisions	238

File Handling Workflows	241
Introduction	242
Image browsing	243
Metadata	246
Archiving captured images - Project 17	249
Applying workflow actions to folders - Project 18	251
 Managed Workflows	 255
Introduction	256
Setting up a closed-loop workflow - Project 19	257
Using profiles in a managed workflow	259
How to set up an ICC profile based system	264
Color settings for Photoshop	265
Color management for Elements	266
Color management policies for Photoshop	267
Creating a target image - Project 20	270
 Printing and Pre-press	 273
Introduction	274
Closed loop printing to an RGB device - Project 21	278
Managed printing to an RGB device - Project 22	279
Managed printing to a CMYK device	282
 Glossary	 289
Keyboard shortcuts	299
Web links	301
Supporting CD	302
CD content	304
 Index	 305
