# FUNDAMENTALS OF BIOCHEMISTRY

LIFE AT THE MOLECULAR LEVEL

SECOND EDITION

DONALD VOET • JUDITH G. VOET • CHARLOTTE W. PRATT

# CONTENTS

## PART I INTRODUCTION

### CHAPTER 1 The Chemistry of Life: An Introduction 2

1. The Origin of Life 3
  - A. The Prebiotic World 3
  - B. Chemical Evolution 4
2. Cellular Architecture 6
  - A. The Evolution of Cells 6
  - B. Prokaryotes and Eukaryotes 8
3. Organismal Evolution 9
  - A. Taxonomy and Phylogeny 9
  - B. The Origins of Complexity 10
  - C. How Do Organisms Evolve? 11
4. Thermodynamics 12
  - A. The First Law of Thermodynamics: Energy Is Conserved 12
  - B. The Second Law of Thermodynamics: Entropy Tends to Increase 13
  - C. Free Energy 14
  - D. Chemical Equilibria and the Standard State 15
  - E. Life Obeys the Laws of Thermodynamics 17

**Box 1-1** *Perspectives in Biochemistry:* Biochemical Conventions 13

### CHAPTER 2 The Properties of Water 22

1. Physical Properties of Water 23
  - A. Structure of Water 23
  - B. Water as a Solvent 26
  - C. The Hydrophobic Effect 27
  - D. Osmosis and Diffusion 29
2. Chemical Properties of Water 31
  - A. Ionization of Water 31
  - B. Acid–Base Chemistry 33
  - C. Buffers 35

**Box 2-1** *Perspectives in Biochemistry:* Diffusion Rates and the Sizes of Organisms 31

**Box 2-2** *Biochemistry in Health and Disease:* The Blood Buffering System 37

## PART II BIOMOLECULES

### CHAPTER 3 Nucleotides and Nucleic Acids: Structures, Chemistry, and Techniques 40

1. Nucleotides 41
2. Introduction to Nucleic Acid structure 44
  - A. The Base Composition of DNA 45
  - B. The Double Helix 46
  - C. Single-Stranded Nucleic Acids 49
3. Overview of Nucleic Acid Function 49
  - A. DNA Carries Genetic Information 50
  - B. Genes Direct Protein Synthesis 51
4. Nucleic Acid Sequencing 52
  - A. Restriction Endonucleases 52
  - B. Electrophoresis and Restriction Mapping 54
  - C. The Chain-Terminator Method of DNA Sequencing 56
  - D. Genome Sequencing 60
  - E. Sequences, Mutation, and Evolution 61
5. Manipulating DNA 62
  - A. Cloning Techniques 63
  - B. DNA Libraries 66
  - C. DNA Amplification by the Polymerase Chain Reaction 68
  - D. Applications of Recombinant DNA Technology 70

**Box 3-1** *Perspectives in Biochemistry:* Restriction Fragment Length Polymorphisms 55

**Box 3-2** *Pathways of Discovery:* Francis Collins and the Gene for Cystic Fibrosis 59

**Box 3-3** *Perspectives in Biochemistry:* Ethical Aspects of Recombinant DNA Technology 72

### CHAPTER 4 Structures and Derivatives of Amino Acids 76

1. Amino Acid Structure 77
  - A. General Properties 77
  - B. Peptide Bonds 80
  - C. Classification and Characteristics 81
  - D. Acid–Base Properties 84
  - E. A Few Words on Nomenclature 85
2. Stereochemistry 86
3. Amino Acid Derivatives 89
  - A. Side Chain Modifications in Proteins 89
  - B. Biologically Active Amino Acids 90

**Box 4-1** *Pathways of Discovery:* William C. Rose and the Discovery of Threonine 80

**Box 4-2** *Perspectives in Biochemistry:* The *RS* System 88

**Box 4-3** *Perspectives in Biochemistry:* Green Fluorescent Protein 90

**CHAPTER 5 Primary Structures of Proteins 94**

1. Polypeptide Diversity 95
2. Protein Purification and Analysis 97
  - A. General Approach to Purifying Proteins 98
  - B. Protein Solubility 101
  - C. Chromatography 102
  - D. Electrophoresis 105
  - E. Ultracentrifugation 107
3. Protein Sequencing 108
  - A. Preliminary Steps 110
  - B. Polypeptide Cleavage 113
  - C. Edman Degradation 115
  - D. Sequencing by Mass Spectrometry 116
  - E. Reconstructing the Protein's Sequence 118
4. Protein Evolution 120
  - A. Protein Sequence Evolution 120
  - B. Gene Duplication and Protein Families 124
  - C. Protein Modules 125

**Box 5-1** *Perspectives in Biochemistry:* Combinatorial Peptide Libraries 96

**Box 5-2** *Pathways of Discovery:* Frederick Sanger and Protein Sequencing 109

**CHAPTER 6 Three-dimensional Structure of Proteins 129**

1. Secondary Structure 130
  - A. The Peptide Group 130
  - B. Regular Secondary Structure: The  $\alpha$  Helix and the  $\beta$  Sheet 133
  - C. Fibrous Proteins 138
  - D. Nonrepetitive Protein Structure 142
2. Tertiary Structure 144
  - A. Determining Protein Structures 144
  - B. Side Chain Location and Polarity 149
  - C. Supersecondary Structures and Domains 150
  - D. Protein Families 154
3. Quaternary Structure and Symmetry 155
4. Protein Stability 156
  - A. Forces That Stabilize Protein Structure 157
  - B. Protein Dynamics 159
  - C. Protein Denaturation and Renaturation 159
5. Protein Folding 161
  - A. Protein Folding Pathways 161
  - B. Protein Disulfide Isomerase 162
  - C. Molecular Chaperones 164
  - D. Diseases Caused by Protein Misfolding 170
6. Structural Bioinformatics 174

**Box 6-1** *Pathways of Discovery:* Linus Pauling and Structural Biochemistry 134

**Box 6-2** *Biochemistry in Health and Disease:* Collagen Diseases 141

**Box 6-3** *Perspectives in Biochemistry:* Thermostable Proteins 160

**Box 6-4** *Perspectives in Biochemistry:* Protein Structure Prediction and Protein Design 164

**CHAPTER 7 Myoglobin, Hemoglobin: Protein Function 181**

1. Myoglobin 182
    - A. Myoglobin Structure 182
    - B. Myoglobin Function 183
  2. Hemoglobin 185
    - A. Hemoglobin Structure 186
    - B. Oxygen Binding to Hemoglobin 190
  3. Cooperativity 192
    - A. Mechanism of Cooperativity in Hemoglobin 192
    - B. Allosteric Proteins 199
  4. Abnormal Hemoglobins 200
- Box 7-1** *Perspectives in Biochemistry:* Other Oxygen-Transport Proteins 186
- Box 7-2** *Pathways of Discovery:* Max Perutz and the Structure and Function of Hemoglobin 187
- Box 7-3** *Biochemistry in Health and Disease:* High-Altitude Adaptation 198

**CHAPTER 8 Carbohydrates: Monosaccharides, Polysaccharides, and Glycoproteins 206**

1. Monosaccharides 207
    - A. Classification of Monosaccharides 207
    - B. Configuration and Conformation 209
    - C. Sugar Derivatives 212
  2. Polysaccharides 214
    - A. Disaccharides 215
    - B. Structural Polysaccharides: Cellulose and Chitin 215
    - C. Storage Polysaccharides: Starch and Glycogen 218
    - D. Glycosaminoglycans 219
  3. Glycoproteins 222
    - A. Proteoglycans 222
    - B. Bacterial Cell Walls 223
    - C. Glycosylated Proteins 225
    - D. Functions of Oligosaccharides 228
- Box 8-1** *Biochemistry in Health and Disease:* Lactose Intolerance 215
- Box 8-2** *Perspectives in Biochemistry:* Artificial Sweeteners 216
- Box 8-3** *Biochemistry in Health and Disease:* Peptidoglycan-Specific Antibiotics 225

**CHAPTER 9 Biological Membranes and Lipids 233**

1. Lipid Classification 234
  - A. Fatty Acids 234
  - B. Triacylglycerols 236
  - C. Glycerophospholipids 237
  - D. Sphingolipids 240
  - E. Steroids 242
  - F. Other Lipids 245

- 2. Lipid Bilayers 248
  - A. Why Bilayers Form 248
  - B. Lipid Mobility 249
- 3. Membrane Proteins 251
  - A. Integral Membrane Proteins 251
  - B. Lipid-Linked Proteins 257
  - C. Peripheral Membrane Proteins 258
- 4. Membrane Structure and Assembly 259
  - A. The Fluid Mosaic Model 259
  - B. The Membrane Skeleton 261
  - C. Lipid Asymmetry 264
  - D. The Secretory Pathway 267
  - E. Vesicle Trafficking 272
  - F. Vesicle Fusion 278
- Box 9-1** *Biochemistry in Health and Disease: Lung Surfactant* 239
- Box 9-2** *Pathways of Discovery: Richard Henderson and the Structure of Bacteriorhodopsin* 254

## CHAPTER 10 Transport Through Membranes 284

- 1. Thermodynamics of Transport 285
- 2. Passive-Mediated Transport 286
  - A. Ionophores 286
  - B. Porins 288
  - C. Ion Channels 289
  - D. Aquaporins 298
  - E. Transport Proteins 299
- 3. Active Transport 303
  - A.  $(\text{Na}^+ - \text{K}^+) - \text{ATPase}$  303
  - B.  $\text{Ca}^{2+} - \text{ATPase}$  305
  - C. Ion Gradient-Driven Active Transport 307
- Box 10-1** *Perspectives in Biochemistry: Gap Junctions* 300
- Box 10-2** *Perspectives in Biochemistry: Differentiating Mediated and Nonmediated Transport* 302
- Box 10-3** *Biochemistry in Health and Disease: The Action of Cardiac Glycosides* 306

## PART III ENZYMES

### CHAPTER 11 Enzyme Function I: Catalysis 312

- 1. General Properties of Enzymes 313
  - A. Enzyme Nomenclature 314
  - B. Substrate Specificity 315
  - C. Cofactors and Coenzymes 316
- 2. Activation Energy and the Reaction Coordinate 319
- 3. Catalytic Mechanisms 321
  - A. Acid-Base Catalysis 323
  - B. Covalent Catalysis 325
  - C. Metal Ion Catalysis 326
  - D. Catalysis through Proximity and Orientation Effects 327
  - E. Catalysis by Preferential Transition State Binding 329
- 4. Lysozyme 331
  - A. Enzyme Structure 332
  - B. Catalytic Mechanism 336
- 5. Serine Proteases 340
  - A. The Active Site 340
  - B. X-Ray Structures 342
  - C. Catalytic Mechanism 346
  - D. Zymogens 351
- Box 11-1** *Perspectives in Biochemistry: Effects of pH on Enzyme Activity* 323
- Box 11-2** *Perspectives in Biochemistry: Observing Enzyme Action by X-Ray Crystallography* 334
- Box 11-3** *Biochemistry in Health and Disease: Nerve Poisons* 342
- Box 11-4** *Biochemistry in Health and Disease: The Blood Coagulation Cascade* 352

### CHAPTER 12 Enzyme Function II: Kinetics, Inhibition, and Regulation 357

- 1. Reaction Kinetics 358
  - A. Chemical Kinetics 358
  - B. Enzyme Kinetics 360
  - C. Analysis of Kinetic Data 367
  - D. Bisubstrate Reactions 369
- 2. Enzyme Inhibition 370
  - A. Competitive Inhibition 371
  - B. Uncompetitive Inhibition 375
  - C. Mixed Inhibition 376
- 3. Allosteric Regulation of Enzyme Activity 380
- 4. Drug Design 385
  - A. Drug Discovery 386
  - B. Bioavailability and Toxicity 387
  - C. Clinical Trials 388
  - D. Cytochrome P450 and Adverse Drug Reactions 389
- Box 12-1** *Perspectives in Biochemistry: Isotopic Labeling* 361
- Box 12-2** *Pathways of Discovery: J.B.S. Haldane and Enzyme Action* 363

**CHAPTER 14 Glucose Breakdown 427**

1. Overview of Glycolysis 428
2. The Reactions of Glycolysis 431
  - A. Hexokinase: First Use of ATP 431
  - B. Phosphoglucose Isomerase 432
  - C. Phosphofructokinase: Second Use of ATP 433
  - D. Aldolase 434
  - E. Triose Phosphate Isomerase 436
  - F. Glyceraldehyde-3-Phosphate Dehydrogenase: First “High-Energy” Intermediate Formation 439
  - G. Phosphoglycerate Kinase: First ATP Generation 441
  - H. Phosphoglycerate Mutase 441
  - I. Enolase: Second “High-Energy” Intermediate Formation 442
  - J. Pyruvate Kinase: Second ATP Generation 443
3. Fermentation: The Anaerobic Fate of Pyruvate 446
  - A. Homolactic Fermentation 447
  - B. Alcoholic Fermentation 448
  - C. Energetics of Fermentation 451
4. Control of Glycolysis 452
  - A. Phosphofructokinase: The Major Flux-Controlling Enzyme of Glycolysis in Muscle 453
  - B. Substrate Cycling 456
5. Metabolism of Hexoses Other than Glucose 458
  - A. Fructose 458
  - B. Galactose 460
  - C. Mannose 462
6. The Pentose Phosphate Pathway 462
  - A. Stage 1: Oxidative Reactions of NADPH Production 464
  - B. Stage 2: Isomerization and Epimerization of Ribulose-5-Phosphate 465
  - C. Stage 3: Carbon–Carbon Bond Cleavage and Formation Reactions 465
  - D. Control of the Pentose Phosphate Pathway 466

**Box 14-1** *Pathways of Discovery: Otto Warburg and Studies of Metabolism* 429

**Box 14-2** *Perspectives in Biochemistry: Synthesis of 2,3-Bisphosphoglycerate in Erythrocytes and Its Effect on the Oxygen Carrying Capacity of the Blood* 444

**Box 12-3** *Perspectives in Biochemistry: Kinetics and Transition State Theory* 366

**Box 12-4** *Biochemistry in Health and Disease: HIV Enzyme Inhibitors* 378

**PART IV METABOLISM****CHAPTER 13 Metabolism: An Introduction 395**

1. Overview of Metabolism 396
  - A. Trophic Strategies 396
  - B. Metabolic Pathways 397
  - C. Thermodynamic Considerations 401
  - D. Control of Metabolic Flux 402
2. “High-Energy” Compounds 404
  - A. ATP and Phosphoryl Group Transfer 406
  - B. Coupled Reactions 407
  - C. Other Phosphorylated Compounds 410
  - D. Thioesters 413
3. Oxidation–Reduction Reactions 414
  - A. NAD<sup>+</sup> and FAD 414
  - B. The Nernst Equation 415
  - C. Measurements of Reduction Potential Differences 417
4. Experimental Approaches to the Study of Metabolism 419
  - A. Tracing Metabolic Fates 420
  - B. Perturbing the System 421
  - C. DNA Microarrays 422
  - D. Proteomics 424

**Box 13-1** *Perspectives in Biochemistry: Oxidation States of Carbon* 398

**Box 13-2** *Perspectives in Biochemistry: Mapping Metabolic Pathways* 399

**Box 13-3** *Pathways of Discovery: Fritz Lipmann and “High-Energy” Compounds* 405

**Box 13-4** *Perspectives in Biochemistry: ATP and  $\Delta G$*  407

**Box 14-3** *Perspectives in Biochemistry:* Glycolytic ATP Production in Muscle 453

**Box 14-4** *Biochemistry in Health and Disease:* Glucose-6-Phosphate Dehydrogenase Deficiency 468

## CHAPTER 15 Glycogen Breakdown and Synthesis and Gluconeogenesis 472

1. Glycogen Breakdown 474
    - A. Glycogen Phosphorylase 475
    - B. Glycogen Debranching Enzyme 479
    - C. Phosphoglucomutase 480
  2. Glycogen Synthesis 481
    - A. UDP-Glucose Pyrophosphorylase 484
    - B. Glycogen Synthase 485
    - C. Glycogen Branching Enzymes 487
  3. Control of Glycogen Metabolism 487
    - A. Direct Allosteric Control of Glycogen Phosphorylase and Glycogen Synthase 487
    - B. Covalent Modification of Glycogen Phosphorylase and Glycogen Synthase 489
    - C. Hormonal effects on Glycogen Metabolism 497
  4. Gluconeogenesis 500
    - A. Pyruvate to Phosphoenolpyruvate 500
    - B. Hydrolytic Reactions 505
    - C. Regulation of Gluconeogenesis 505
  5. Other Carbohydrate Biosynthetic Pathways 507
- Box 15-1** *Pathways of Discovery:* Carl and Gerty Cori and Glucose Metabolism 475
- Box 15-2** *Biochemistry in Health and Disease:* Glycogen Storage Diseases 482
- Box 15-3** *Perspectives in Biochemistry:* Optimizing Glycogen Structure 488
- Box 15-4** *Perspectives in Biochemistry:* Lactose Synthesis 508

## CHAPTER 16 Citric Acid Cycle: Introduction and Analysis 514

1. Overview of the Citric Acid Cycle 515
2. Synthesis of Acetyl-Coenzyme A 517
  - A. The Pyruvate Dehydrogenase Multienzyme Complex 519
  - B. The Reactions of the Pyruvate Dehydrogenase Complex 521
3. Enzymes of the Citric Acid Cycle 524
  - A. Citrate Synthase 525
  - B. Aconitase 526
  - C.  $\text{NAD}^+$ -Dependent Isocitrate Dehydrogenase 527
  - D.  $\alpha$ -Ketoglutarate Dehydrogenase 528
  - E. Succinyl-CoA Synthetase 528
  - F. Succinate Dehydrogenase 530
  - G. Fumarase 531
  - H. Malate Dehydrogenase 531
4. Regulation of the Citric Acid Cycle 531
  - A. Regulation of Pyruvate Dehydrogenase 532
  - B. The Rate-Controlling Enzymes of the Citric Acid Cycle 533

5. Reactions Related to the Citric Acid Cycle 535
  - A. Pathways that Use Citric Acid Cycle Intermediates 536
  - B. Reactions that Replenish Citric Acid Cycle Intermediates 537
  - C. The Glyoxylate Cycle 538

**Box 16-1** *Pathways of Discovery:* Hans Krebs and the Citric Acid Cycle 518

**Box 16-2** *Biochemistry in Health and Disease:* Arsenic Poisoning 525

**Box 16-3** *Perspectives in Biochemistry:* Evolution of the Citric Acid Cycle 540

## CHAPTER 17 Oxidative Phosphorylation and Electron Transport 545

1. The Mitochondrion 546
    - A. Mitochondrial Anatomy 547
    - B. Mitochondrial Transport Systems 548
  2. Electron Transport 549
    - A. Thermodynamics of Electron Transport 550
    - B. The Sequence of Electron Transport 551
    - C. Complex I (NADH-Coenzyme Q Oxidoreductase) 554
    - D. Complex II (Succinate-Coenzyme Q Oxidoreductase) 558
    - E. Complex III (Coenzyme Q-Cytochrome *c* Oxidoreductase) 560
    - F. Complex IV (Cytochrome *c* Oxidase) 564
  3. Oxidative Phosphorylation 567
    - A. The Chemiosmotic Theory 568
    - B. ATP Synthase 571
    - C. The P/O Ratio 577
    - D. Uncoupling Oxidative Phosphorylation 578
  4. Control of Oxidative Metabolism 579
    - A. Control of Oxidative Phosphorylation 579
    - B. Coordinated Control of Oxidative Metabolism 582
    - C. Physiological Implications of Aerobic Metabolism 582
- Box 17-1** *Perspectives in Biochemistry:* Cytochromes Are Electron-Transport Heme Proteins 558
- Box 17-2** *Pathways of Discovery:* Peter Mitchell and the Chemiosmotic Theory 569
- Box 17-3** *Perspectives in Biochemistry:* Bacterial Electron Transport and Oxidative Phosphorylation 570
- Box 17-4** *Perspectives in Biochemistry:* Uncoupling in Brown Adipose Tissue Generates Heat 580
- Box 17-5** *Biochemistry in Health and Disease:* Oxygen Deprivation in Heart Attack and Stroke 584

## CHAPTER 18 The Process of Photosynthesis 590

1. Chloroplasts 591
  - A. Chloroplast Anatomy 592
  - B. Light-Absorbing Pigments 592
2. The Light Reactions 596
  - A. The Interaction of Light and Matter 596
  - B. Electron Transport in Photosynthetic Bacteria 597
  - C. Two-Center Electron Transport 600
  - D. Photophosphorylation 612

## 3. The Dark Reactions 613

- A. The Calvin Cycle 613
- B. Carbohydrate Synthesis 618
- C. Control of the Calvin Cycle 619
- D. Photorespiration 621

**Box 18-1** *Perspectives in Biochemistry:* Segregation of PSI and PSII 611

**CHAPTER 19 Lipid Breakdown and Synthesis 627**

## 1. Lipid Digestion, Absorption, and Transport 628

- A. Digestion and Absorption 628
- B. Lipid Transport 630

## 2. Fatty Acid Oxidation 635

- A. Fatty Acid Activation 636
- B. Transport across the Mitochondrial Membrane 636
- C.  $\beta$  Oxidation 638
- D. Oxidation of Unsaturated Fatty Acids 640
- E. Oxidation of Odd-Chain Fatty Acids 642
- F. Peroxisomal  $\beta$  Oxidation 648

## 3. Ketone Bodies 649

## 4. Fatty Acid Biosynthesis 650

- A. Transport of Mitochondrial Acetyl-CoA into the Cytosol 651
- B. Acetyl-CoA Carboxylase 651
- C. Fatty Acid Synthase 653
- D. Elongases and Desaturases 657
- E. Synthesis of Triacylglycerols 658

## 5. Regulation of Fatty Acid Metabolism 660

## 6. Synthesis of Other Lipids 663

- A. Glycerophospholipids 663
- B. Sphingolipids 666
- C. Prostaglandins 669

## 7. Cholesterol Metabolism 671

- A. Cholesterol Biosynthesis 671
- B. Regulation of Cholesterol Synthesis 674
- C. Cholesterol Transport and Atherosclerosis 677

**Box 19-1** *Biochemistry in Health and Disease:* Vitamin B<sub>12</sub> Deficiency 644

**Box 19-2** *Pathways of Discovery:* Dorothy Crowfoot Hodgkin and the Structure of Vitamin B<sub>12</sub> 647

**Box 19-3** *Perspectives in Biochemistry:* Triclosan: An Inhibitor of Fatty Acid Synthesis 658

**Box 19-4** *Biochemistry in Health and Disease:* Sphingolipid Degradation and Lipid Storage Diseases 668

**CHAPTER 20 Pathways of Amino Acid Metabolism 682**

## 1. Protein Degradation 683

- A. Lysosomal Degradation 683
- B. Ubiquitin 684
- C. The Proteasome 685

## 2. Amino Acid Deamination 688

- A. Transamination 688
- B. Oxidative Deamination 692

## 3. The Urea Cycle 692

- A. Reactions of the Urea Cycle 693
- B. Regulation of the Urea Cycle 697

## 4. Breakdown of Amino Acids 697

- A. Alanine, Cysteine, Glycine, Serine, and Threonine Are Degraded to Pyruvate 698
- B. Asparagine and Aspartate Are Degraded to Oxaloacetate 701
- C. Arginine, Glutamate, Glutamine, Histidine, and Proline Are Degraded to  $\alpha$ -Ketoglutarate 701
- D. Isoleucine, Methionine, and Valine Are Degraded to Succinyl-CoA 702
- E. Leucine and Lysine Are Degraded Only to Acetyl-CoA and/or Acetoacetate 708
- F. Tryptophan Is Degraded to Alanine and Acetoacetate 708
- G. Phenylalanine and Tyrosine Are Degraded to Fumarate and Acetoacetate 710

## 5. Amino Acid Biosynthesis 713

- A. Biosynthesis of the Nonessential Amino Acids 714
- B. Biosynthesis of the Essential Amino Acids 719

## 6. Other Products of Amino Acid Metabolism 724

- A. Heme Biosynthesis and Degradation 724
- B. Biosynthesis of Physiologically Active Amines 730
- C. Nitric Oxide 731

## 7. Nitrogen Fixation 732

**Box 20-1** *Biochemistry in Health and Disease:* Homocysteine, a Marker of Disease 706

**Box 20-2** *Biochemistry in Health and Disease:* Phenylketonuria and Alcaptonuria Result from Defects in Phenylalanine Degradation 712

**Box 20-3** *Biochemistry in Health and Disease:* The Porphyrrias 728

**Box 20-4** *Perspectives in Biochemistry:* Anammox Bacteria 738

**CHAPTER 21 Integration and Regulation of Mammalian Fuel Metabolism 743**

## 1. Organ Specialization 744

- A. The Brain 746
- B. Muscle 746
- C. Adipose Tissue 748
- D. Liver 749
- E. Kidney 751
- F. Interorgan Metabolic Pathways 751

## 2. Hormonal Control of Fuel Metabolism 752

## 3. Signal Transduction 756

- A. G Protein–Coupled Receptors 757
- B. Heterotrimeric G Proteins 759
- C. Adenylate Cyclase 761
- D. Receptor Tyrosine Kinases 764
- E. Protein Phosphatases 769
- F. The Phosphoinositide Pathway 771

## 4. Disturbances in Fuel Metabolism 774

- A. Starvation 774
- B. Diabetes Mellitus 779
- C. Obesity 782

- Box 21-1** *Biochemistry in Health and Disease: Drugs and Toxins That Affect Cell Signaling* 763
- Box 21-2** *Biochemistry in Health and Disease: Oncogenes and Cancer* 768
- Box 21-3** *Biochemistry in Health and Disease: Anthrax* 776
- Box 21-4** *Pathways of Discovery: Frederick Banting and Charles Best and the Discovery of Insulin* 780

## CHAPTER 22 Nucleotide Synthesis and Degradation 787

1. Synthesis of Purine Ribonucleotides 788
    - A. Synthesis of Inosine Monophosphate 789
    - B. Synthesis of Adenine and Guanine Ribonucleotides 792
    - C. Regulation of Purine Nucleotide Biosynthesis 794
    - D. Salvage of Purines 795
  2. Synthesis of Pyrimidine Ribonucleotides 795
    - A. Synthesis of UMP 796
    - B. Synthesis of UTP and CTP 798
    - C. Regulation of Pyrimidine Nucleotide Biosynthesis 798
  3. Formation of Deoxyribonucleotides 799
    - A. Production of Deoxyribose Residues 799
    - B. Origin of Thymine 804
  4. Nucleotide Degradation 809
    - A. Catabolism of Purines 809
    - B. Fate of Uric Acid 811
    - C. Catabolism of Pyrimidines 814
- Box 22-1** *Biochemistry in Health and Disease: Inhibition of Thymidylate Synthesis in Cancer Therapy* 807

## PART V GENE EXPRESSION AND REPLICATION

### CHAPTER 23 The Structure of Nucleic Acids 817

1. The DNA Helix 818
  - A. The Geometry of DNA 818
  - B. Flexibility of DNA 824
  - C. Supercoiled DNA 826

2. Forces Stabilizing Nucleic Acid Structures 835
  - A. Denaturation and Renaturation 835
  - B. Base Pairing 836
  - C. Base Stacking and Hydrophobic Interactions 837
  - D. Ionic Interactions 837
  - E. RNA Structure 838
3. Fractionation of Nucleic Acids 842
  - A. Chromatography 842
  - B. Electrophoresis 842
  - C. Ultracentrifugation 844
4. DNA-Protein Interactions 845
  - A. Restriction Endonucleases 846
  - B. Prokaryotic Transcriptional Control Motifs 847
  - C. Eukaryotic Transcription Factors 850
5. Eukaryotic Chromosome Structure 853
  - A. Histones 854
  - B. Nucleosomes 855
  - C. Higher Levels of Chromatin Organization 858

**Box 23-1** *Pathways of Discovery: Rosalind Franklin and the Structure of DNA* 822

**Box 23-2** *Biochemistry in Health and Disease: Inhibitors of Topoisomerases as Antibiotics and Anticancer Chemotherapeutic Agents* 834

**Box 23-3** *Perspectives in Biochemistry: The RNA World* 841

**Box 23-4** *Perspectives in Biochemistry: Packaging Viral Nucleic Acids* 862

### CHAPTER 24 Replication, Repair, and Recombination of DNA 867

1. Overview of DNA Replication 868
2. Prokaryotic DNA Replication 871
  - A. DNA Polymerases 871
  - B. Initiation of Replication 877
  - C. Synthesis of the Leading and Lagging Strands 879
  - D. Termination of Replication 882
  - E. Fidelity of Replication 884
3. Eukaryotic DNA Replication 884
  - A. Eukaryotic DNA Polymerases 885
  - B. Initiation and Elongation of Eukaryotic DNA Replication 886
  - C. Telomeres and Telomerase 888
4. DNA Damage 891
  - A. Mutagenesis 892
  - B. Carcinogens 895
5. DNA Repair 896
  - A. Direct Reversal of Damage 896
  - B. Base Excision Repair 896
  - C. Nucleotide Excision Repair 898
  - D. Mismatch Repair 900
  - E. Error-Prone Repair 900
6. Recombination 902
  - A. The Mechanism of Homologous Recombination 903
  - B. Recombination Repair 908
  - C. Transposition 910

**Box 24-1** *Pathways of Discovery: Arthur Kornberg and DNA Polymerase I* 872

**Box 24-2** *Perspectives in Biochemistry: Reverse Transcriptase* 886

**Box 24-3** *Biochemistry in Health and Disease: Telomerase, Aging, and Cancer* 891

**Box 24-4** *Perspectives in Biochemistry: DNA Methylation* 894

**Box 24-5** *Perspectives in Biochemistry: Why Doesn't DNA Contain Uracil?* 898

## CHAPTER 25 DNA Transcription and RNA Processing 919

### 1. RNA Polymerase 920

A. Enzyme Structure 920

B. Template Binding 921

C. Chain Elongation 924

D. Chain Termination 927

### 2. Transcription in Eukaryotes 928

A. Eukaryotic RNA Polymerases 929

B. Eukaryotic Promoters 933

C. Transcription Factors 936

### 3. Posttranscriptional Processing 940

A. Messenger RNA Processing 940

B. Ribosomal RNA Processing 951

C. Transfer RNA Processing 955

**Box 25-1** *Perspectives in Biochemistry: Collisions between DNA Polymerase and RNA Polymerase* 926

**Box 25-2** *Biochemistry in Health and Disease: Inhibitors of Transcription* 930

**Box 25-3** *Pathways of Discovery: Richard Roberts and Phillip Sharp and the Discovery of Introns* 943

## CHAPTER 26 Understanding Translation 960

### 1. The Genetic Code 961

A. Codons Are Triplets That Are Read Sequentially 962

B. Deciphering the Genetic Code 963

C. The Nature of the Genetic Code 964

### 2. Transfer RNA and Its Aminoacylation 967

A. tRNA Structure 967

B. Aminoacyl-tRNA Synthetases 969

C. Codon-Anticodon Interactions 974

### 3. Ribosomes 977

A. The Prokaryotic Ribosome 977

B. The Eukaryotic Ribosome 983

### 4. Translation 984

A. Chain Initiation 986

B. Chain Elongation 991

C. Chain Termination 1001

### 5. Posttranslational Processing 1004

A. Protein Folding 1004

B. Covalent Modification 1005

**Box 26-1** *Perspectives in Biochemistry: Evolution of the Genetic Code* 966

**Box 26-2** *Perspectives in Biochemistry: Expanding the Genetic Code* 976

**Box 26-3** *Biochemistry in Health and Disease: The Effects of Antibiotics on Protein Synthesis* 1000

## CHAPTER 27 Regulation of Gene Expression in Prokaryotes and Eukaryotes 1010

### 1. Genome Organization 1011

A. Gene Number 1012

B. Gene Clusters 1015

C. Repetitive DNA Sequences 1016

### 2. Regulation of Prokaryotic Gene Expression 1021

A. The *lac* Repressor 1021

B. Catabolite Repression: An Example of Gene Activation 1025

C. Attenuation 1026

D. Riboswitches 1029

### 3. Regulation of Eukaryotic Gene Expression 1030

A. Chromatin Structure and Gene Expression 1030

B. Control of Transcription in Eukaryotes 1043

C. Posttranscriptional Control Mechanisms 1050

D. The Cell Cycle, Cancer, and Apoptosis 1054

E. The Molecular Basis of Development 1062

**Box 27-1** *Biochemistry in Health and Disease: Trinucleotide Repeat Diseases* 1018

**Box 27-2** *Perspectives in Biochemistry: Inferring Genealogy from DNA Sequences* 1021

**Box 27-3** *Perspectives in Biochemistry: X-Chromosome Inactivation* 1031

**Box 27-4** *Perspectives in Biochemistry: Nonsense-Mediated Decay* 1051

## CHAPTER 28 Additional Proteins: Antibodies and Cytoskeletal and Motor Proteins 1072

### 1. Actin and Microfilaments 1073

A. Actin Structure 1074

B. Microfilament Dynamics 1075

### 2. Muscle Contraction 1080

A. Structure of Striated Muscle 1080

B. The Actin-Myosin Reaction Cycle 1086

C. Unconventional Myosin V 1088

### 3. Tubulin and Microtubules 1091

A. The Tubulin Dimer 1091

B. Microtubule Dynamics 1092

### 4. Microtubule Motors 1094

A. Kinesins 1095

B. Dyneins 1099

### 5. Antibodies 1104

A. Overview of the Immune System 1104

B. Antibody Structure 1105

C. Antigen-Antibody Binding 1106

D. Generating Antibody Diversity 1108

- Box 28-1** *Pathways of Discovery: Hugh Huxley and the Sliding Filament Model* 1082
- Box 28-2** *Biochemistry in Health and Disease: Myosin Mutations and Deafness* 1090
- Box 28-3** *Biochemistry in Health and Disease: Drugs That Bind Microtubules* 1096
- Box 28-4** *Perspectives in Biochemistry: Monoclonal Antibodies* 1108
- Box 28-5** *Biochemistry in Health and Disease: Autoimmune Diseases* 1110
