

ARTHUR G. JOHNSON and BENJAMIN L. CLARKE

High-YieldTM *Immunology* SECOND EDITION

High-YieldTM Immunology
is designed to:

- Provide an uncomplicated review of immunology
- Help equip you for the immunology questions on the USMLE Step 1
- Clarify difficult concepts

LIPPINCOTT WILLIAMS & WILKINS

Contents

Preface	vii
Acknowledgments	viii
1 Overview	1
I. Synopsis	1
II. Concerns in Medicine	1
III. Host-Parasite Equilibrium	1
IV. Development of the Acquired Immune System	2
V. Clonal Selection Theory	4
2 Antigens	5
I. Definitions	5
II. Factors Determining Antigenicity	5
III. Examples of Antigens	5
3 Innate Immunity	7
I. Fundamental Characteristics	7
II. Defensive Mechanisms	7
III. Acute Phase Response (APR)	10
IV. Pathogen Recognition Systems	10
4 Antibodies	13
I. General Properties	13
II. IgG	15
III. IgM	17
IV. IgA	17
V. IgE	19
VI. IgD	19
5 Immunogenetics	20
I. Genetic Control of Immunoglobulin Chain Synthesis	20
II. Genetic Control of Human Leukocyte Antigens (HLAs)	20
III. Genetic Control of the T-Cell Antigenic Receptor (TCR)	24

6	Immunologic Assays	26
I.	Overview	26
II.	Protection Tests	26
III.	Agglutination Tests	26
IV.	Precipitation Reactions	27
V.	Complement Fixation	29
VI.	Fluorescent Antibody	31
VII.	Western Blot	31
VIII.	Cell Counting and Flow Cytometry	31
IX.	Reverse Transcription Polymerase Chain Reaction (RT-PCR)	34
X.	DNA Microarrays	34
7	The Immune Response	35
I.	Humoral Immunity	35
II.	Cell-Mediated Immunity (CMI)	39
8	Signal Transduction in Immune Cells	43
I.	Effective Immune Responses Require Communication Between a Wide Range of Cell Types	43
II.	Receptor Architecture and Fundamental Characteristics	44
III.	Signaling Molecules	48
IV.	Pathways	49
9	Inflammation	53
I.	Introduction	53
II.	Inflammation Process	53
III.	Kinetics	55
IV.	Mediators of Inflammation	55
10	Hypersensitivity Diseases	59
I.	Overview	59
II.	Anaphylaxis (Type I) Reactions	59
III.	Cell Surface Antigen–Antibody (Ag–Ab) Cytotoxicity (Type II) Reactions	62
IV.	Antigen–Antibody (Ag–Ab) Complex (Type III) Reactions	63
V.	Delayed-Type Hypersensitivity (Type IV) Reactions	65
11	Immunodeficiency Diseases	66
I.	Overview	66
II.	Developmental Immunodeficiency Disorders	66
III.	Acquired Immunodeficiency Syndrome (AIDS)	68
IV.	Cytokine and Chemokine Deficiencies	70
V.	Senescence (Aging) of the Immune Response	70

12	Autoimmune Disorders	71
	I. Overview	71
	II. Immunoregulation Breakdown	71
	III. Systemic Autoimmune Disorders	72
	IV. Organ-Specific Autoimmune Disorders	73
13	Immunologic Aspects of Transplantation	76
	I. Histocompatibility	76
	II. Complications of Organ Transplantation	77
	III. Immunosuppression	78
14	Cancer Immunology	80
	I. Definition	80
	II. Oncogenes	80
	III. Cancer and the Immune System	80
	IV. Cancer Immunotherapy	81
15	Immunization	83
	I. Overview	83
	II. Specific Vaccines	84
	III. Adjuvants	88
	Study Questions and Answers	89
