

HUMAN RESPONSE TO VIBRATION

Neil J. Mansfield

CRC PRESS

Contents

Chapter 1	Introduction to Vibration.....	1
1.1	Human Response to Vibration in Context.....	1
1.2	Introduction to Wave Theory	1
1.2.1	Simple Waves	2
1.2.2	Adding Waves	2
1.2.3	Displacement, Velocity, and Acceleration	3
1.2.4	Resonance.....	4
1.2.5	Representation of Vibration Signals	5
1.3	Classification of Vibration	6
1.3.1	Classification of Vibration by Contact Site, Effect, and Frequency	6
1.3.2	Classification of Vibration by Waveform	8
1.3.3	Classification of Vibration by Magnitude.....	8
1.4	Vibration Axes.....	9
1.5	Chapter Summary	10
Chapter 2	Whole-Body Vibration	13
2.1	Introduction	13
2.2	Whole-Body Vibration Perception.....	13
2.2.1	Mechanisms of Perception.....	14
2.2.2	Perception in Seated Postures.....	15
2.2.3	Perception in Nonseated Postures.....	16
2.2.4	Frequency Weightings.....	17
2.2.5	Vibration Perception in Buildings	19
2.3	Whole-Body Vibration Comfort and Discomfort.....	21
2.3.1	Noise, Vibration, and Harshness (NVH).....	21
2.3.2	Vehicle Comfort.....	21
2.3.3	Assessing Vibration Comfort.....	22
2.3.4	Activity Interference	23
2.4	Health Effects of Whole-Body Vibration	23
2.4.1	Epidemiological Studies	25
2.4.2	Pathological Studies.....	27
2.4.3	Protection	28
2.4.4	The “Holistic” Approach	30
2.5	Seating Dynamics	31
2.5.1	Optimizing Vehicle Seating Comfort.....	31
2.5.2	Conventional Seats.....	33
2.5.3	Suspension Seats	37

2.5.4	Seat Testing	40
2.6	Biomechanical Responses to Whole-Body Vibration	41
2.6.1	Transmission of Vibration Through the Body	42
2.6.2	Mechanical Impedance of the Body	44
2.6.3	Effect of Subject Variables	45
2.6.4	Effect of Stimulus Variables	46
2.6.5	Biomechanical Models for Human Response to Whole-Body Vibration	47
2.6.5.1	Lumped-Parameter Models	48
2.6.5.2	Physical Models	50
2.7	Chapter Summary	52

Chapter 3 Motion Sickness.....53

3.1	Introduction	53
3.2	Signs and Symptoms of Motion Sickness.....	55
3.3	The Cause of Motion Sickness.....	56
3.3.1	Sensory Conflict Theory	56
3.3.2	Types of Sensory Conflict.....	59
3.4	Travel Sickness	60
3.4.1	Seasickness.....	60
3.4.2	Airsickness	63
3.4.3	Sickness Associated with Ground Transportation	64
3.5	Simulator Sickness.....	65
3.6	Relative Sensitivity to Simulated Motion of Different Frequencies.....	66
3.6.1	Effect of Frequency of Vertical Oscillation on Sickness Incidence	67
3.6.2	Effect of Frequency of Fore-and-Aft Oscillation on Sickness Incidence	68
3.6.3	Effect of Frequency of Lateral Oscillation on Sickness Incidence	69
3.6.4	Relative Nauseogenicity of Low-Frequency Oscillation in Different Directions	70
3.7	Habituation to Motion Sickness	70
3.8	Prevention of Motion Sickness.....	71
3.8.1	Avoidance.....	71
3.8.2	Alternative Therapies	71
3.8.3	Antimotion-Sickness Drugs	72
3.8.4	Optimizing the Motion Stimulus	74
3.8.5	Avoiding Conflict.....	74
3.8.6	Motion Sickness Desensitization Programs	75
3.9	Chapter Summary	76

Chapter 4 Hand-Transmitted Vibration.....77

4.1	Introduction	77
-----	--------------------	----

4.2	Hand-Transmitted Vibration Perception	77
4.3	Health Effects of Hand-Transmitted Vibration	79
4.3.1	Vascular Aspects of Hand-Arm Vibration Syndrome	80
4.3.1.1	Primary Raynaud's Disease	80
4.3.1.2	Secondary Raynaud's Disease	81
4.3.1.3	Vibration-Induced White Finger (VWF)	81
4.3.2	Nonvascular Disorders of Hand-Arm Vibration Syndrome	83
4.3.2.1	Neurological Disorders	84
4.3.2.2	Bone and Joint Disorders	84
4.3.2.3	Muscular Disorders	84
4.3.2.4	Disorders Remote from the Hand and Arm	85
4.4	Classification and Diagnosis of Hand-Arm Vibration Syndrome	85
4.4.1	Checklist Methods of Classifying Hand-Arm Vibration Syndrome	86
4.4.2	Objective Methods for Diagnosing Hand-Arm Vibration Syndrome	88
4.4.2.1	Thermal Threshold Testing	88
4.4.2.2	Vibrotactile Threshold Testing	89
4.4.2.3	Rewarming Time Testing	89
4.4.2.4	Finger Systolic Blood Pressure Testing	90
4.5	Reducing Risks from Hand-Transmitted Vibration	90
4.5.1	Health Monitoring	91
4.5.2	Education and Training	92
4.5.3	Information Flow	92
4.5.4	Minimization of Other Ergonomic Risk Factors	93
4.5.5	Quantification and Minimization of Exposure	93
4.5.5.1	Optimization of the Tool	93
4.5.5.2	Optimization of the Job	94
4.5.5.3	Antivibration Gloves	94
4.6	Chapter Summary	95
Chapter 5 Vibration Measurement		97
5.1	Introduction	97
5.2	Measurement Flow	98
5.3	Human Vibration Meters	99
5.3.1	Considerations for Selection of a Human Vibration Meter	100
5.4	Data-Acquisition Systems	100
5.4.1	Resolution and Sampling	101
5.4.2	Aliasing	103
5.5	Accelerometers	104
5.5.1	Piezoresistive Accelerometers	104
5.5.2	Piezoelectric Accelerometers	105
5.5.3	ICP (Integrated Circuit Piezoelectric) Accelerometers	106
5.6	Signal Conditioning	106
5.6.1	Accelerometer Amplifiers	106

5.6.2	Filters.....	108
5.7	Calibration of Human Vibration Measurement Systems.....	109
5.8	Signal Processing.....	110
5.8.1	Frequency Weightings.....	111
5.8.2	Statistical Measurements.....	112
5.8.2.1	Root-Mean-Square (r.m.s.)	112
5.8.2.2	Peak Acceleration	114
5.8.2.3	Crest Factor (CF).....	114
5.8.2.4	Vibration Dose Value (VDV)	115
5.8.2.5	Combining Axes	115
5.8.2.6	Calculation of Daily Exposures	116
5.8.2.7	Acceptable Exposure-Time Thresholds.....	117
5.8.3	Spectral Analysis.....	118
5.8.3.1	Fast Fourier Transforms (FFTs)	118
5.8.3.2	Power Spectral Densities (PSDs)	119
5.8.3.3	Frequency Response (Transfer) Functions.....	119
5.8.3.4	Coherence	120
5.9	Successful Vibration Measurement.....	122
5.9.1	Step 1: Strategic Planning of Approach	122
5.9.2	Step 2: Collation and Calibration of Equipment.....	123
5.9.3	Step 3: Mounting of Accelerometers.....	123
5.9.4	Step 4: Measurement of the Vibration.....	128
5.9.5	Step 5: Analysis and Postprocessing	129
5.10	Case Study 1: Hand-Transmitted Vibration Assessment.....	130
5.11	Case Study 2: Whole-Body Vibration Assessment	134
5.12	Chapter Summary	135
Chapter 6	Whole-Body Vibration Standards	139
6.1	Introduction	139
6.2	Standardization Bodies	140
6.2.1	International Organization for Standardization (ISO).....	141
6.2.2	European Committee for Standardization (CEN)	143
6.2.3	National Standardization Bodies	143
6.2.3.1	British Standards Institution (BSI).....	145
6.3	Legal Position of Standards.....	146
6.4	Standards for Whole-Body Vibration Measurement and Assessment	147
6.4.1	BS 6841: Guide to Measurement and Evaluation of Human Exposure to Whole-Body Mechanical Vibration and Repeated Shock (1987).....	147
6.4.2	ISO 2631: Mechanical Vibration and Shock — Evaluation of Human Exposure to Whole-Body Vibration — Part 1: General Requirements (1997).....	150
6.4.3	Comparison of BS 6841 (1987) and ISO 2631 (1997).....	153
6.5	Standards for Determining Vibration Exposures in Specific Vehicles.....	155

6.5.1	ISO 5008: Agricultural Wheeled Tractors and Field Machinery — Measurement of Whole-Body Vibration of the Operator (2002).....	155
6.5.2	ISO 10056: Mechanical Vibration — Measurement and Analysis of Whole-Body Vibration to Which Passengers and Crew Are Exposed in Railway Vehicles (2001).....	157
6.6	Standards for Determination of Whole-Body Vibration Emission Values for Mobile Machinery	157
6.6.1	European Standard EN 1032: Mechanical Vibration — Testing of Mobile Machinery in Order to Determine the Vibration Emission Value (2003).....	158
6.6.2	EN 13059: Safety of Industrial Trucks — Test Methods for Measuring Vibration (2002).....	160
6.7	Standards for Testing Vehicle Seats in the Laboratory.....	160
6.7.1	ISO 10326-1: Mechanical Vibration — Laboratory Method for Evaluating Vehicle Seat Vibration — Part 1: Basic Requirements (1992)	162
6.7.2	ISO 10326-2: Mechanical Vibration — Laboratory Method for Evaluating Vehicle Seat Vibration — Part 2: Application to Railway Vehicles (2001)	163
6.7.3	ISO 7096: Earthmoving Machinery — Laboratory Evaluation of Operator-Seat Vibration (2000).....	164
6.7.4	EN 13490: Mechanical Vibration — Industrial Trucks — Laboratory Evaluation and Specification of Operator-Seat Vibration (2001).....	164
6.8	Chapter Summary	166
Chapter 7	Hand-Transmitted Vibration Standards.....	169
7.1	Introduction	169
7.2	Standards for Hand-Transmitted Vibration Measurement and Assessment.....	169
7.2.1	ISO 5349-1: Mechanical Vibration — Measurement and Evaluation of Human Exposure to Hand-Transmitted Vibration — Part 1: General Requirements (2001).....	170
7.2.2	ISO 5349-2: Mechanical Vibration — Measurement and Evaluation of Human Exposure to Hand-Transmitted Vibration — Part 2: Practical Guidance for Measurement at the Workplace (2001)	171
7.2.3	BS 6842: British Standards Guide to Measurement and Evaluation of Human Exposure to Vibration Transmitted to the Hand (Superseded) (1987).....	173
7.2.4	ISO 5349: Mechanical Vibration — Guidelines for the Measurement and the Assessment of Human Exposure to Hand-Transmitted Vibration (Superseded) (1986)	174

7.3	Standards for Determining the Vibration Emission Value of Tools and Hand-Guided Machines	175
7.3.1	EN 1033: Hand-Arm Vibration — Laboratory Measurement of Vibration at the Grip Surface of Hand-Guided Machinery — General (1995).....	175
7.3.2	ISO 8662: Hand-held Portable Power Tools — Measurements of Vibrations at the Handle — Part 1: General (1988)	176
7.3.3	ISO 8662: Hand-held Portable Power Tools — Measurements of Vibrations at the Handle — Part 2: Chipping Hammers and Riveting Hammers (1992).....	178
7.3.4	ISO 8662: Hand-held Portable Power Tools — Measurements of Vibrations at the Handle — Part 4: Grinders (1994).....	179
7.3.5	International Standard ISO 8662: Hand-held Portable Power Tools — Measurements of Vibrations at the Handle — Part 6: Impact Drills (1994).....	181
7.4	Standards for Testing the Dynamic Performance of Antivibration Gloves.....	181
7.4.1	ISO 13753: Mechanical Vibration and Shock — Hand-Arm Vibration — Method for Measuring the Vibration Transmissibility of Resilient Materials when Loaded by the Hand-Arm System (1998).....	182
7.4.2	ISO 10819: Mechanical Vibration and Shock — Hand-Arm Vibration — Method for the Measurement and Evaluation of the Vibration Transmissibility of Gloves at the Palm of the Hand (1996)	183
7.5	Chapter Summary	185
Chapter 8	European Directives	187
8.1	Introduction	187
8.2	Development of European Directives.....	187
8.3	Legal Position of European Directives.....	188
8.4	The Machinery Safety Directive: Directive 98/37/EC of the European Parliament and of the Council on the Approximation of the Laws of the Member States, Relating to Machinery.....	188
8.4.1	Principles of Safety Integration	189
8.4.2	Reporting of Emission Values for Hand-Transmitted Vibration	190
8.4.3	Reporting of Emission Values for Whole-Body Vibration.....	191
8.4.4	Impact of the Machinery Safety Directive on Occupational Health of Workers	191
8.4.5	Reporting of Emission Values for Noise Exposure.....	191
8.5	The Physical Agents (Vibration) Directive: Directive 2002/44/EC of the European Parliament and of the Council on the Minimum Health and Safety Requirements Regarding the Exposure of Workers to the Risks Arising from Physical Agents (Vibration).....	192

8.5.1	Physical Agents (Vibration) Directive — Section 1: General Provisions	192
8.5.2	Physical Agents (Vibration) Directive — Section 2: Obligation of Employers.....	194
8.5.3	Physical Agents (Vibration) Directive — Section 3: Miscellaneous Provisions	196
8.5.3.1	Health Surveillance.....	196
8.5.3.2	Transitional Periods	197
8.5.3.3	Derogations	197
8.5.4	Physical Agents (Vibration) Directive — Section 4: Final Provisions	198
8.5.5	Review of the Physical Agents (Vibration) Directive	198
8.5.5.1	Financial Costs.....	198
8.5.5.2	Improvements in Product Design.....	199
8.5.5.3	Are the Methods Correct?	199
8.5.5.4	Are the Exposure Limit Values and Exposure Action Values Correct?.....	200
8.6	The Physical Agents (Noise) Directive: Directive 2003/10/EC of the , European Parliament and of the Council on the Minimum Health and Safety Requirements Regarding the Exposure of Workers to the Risks Arising from Physical Agents (Noise)	200
8.7	Chapter Summary	201
