
Qualitative Methods for Health Research

Judith Green and Nicki Thorogood

SAGE

Contents

Preface		**xiii**
Part 1	**Principles and Approaches in Qualitative Health Research**	**1**
1	**Qualitative Methodology and Health Research**	**3**
	Chapter summary	3
	Introduction: health research	3
	What is qualitative research?	5
	Theoretical approaches	7
	The orientations of qualitative research	18
	The contribution of qualitative research to understanding health and health services	22
	Conclusion	25
	Key points	25
	Exercise	26
	Further reading	26
2	**Developing Qualitative Research Designs**	**27**
	Chapter summary	27
	Introduction	28
	Research questions	28
	Research designs: some examples	34
	Problems with design typologies	39
	Influences on research design	41
	An idealized logic?	42
	Data collection/generation and analysis methods	44
	Practical issues	45
	Multi-method designs: the place of qualitative work in larger health research studies	46
	Conclusion: developing skills in research design	49

	Key points	50
	Exercises	50
	Further reading	50
3	**Responsibilities, Ethics and Values**	**51**
	Chapter summary	51
	Introduction	51
	Values in research	52
	Ethical review and codes of practice	56
	Principle of informed consent	57
	Confidentiality	60
	Responsibilities to research participants	61
	Different models of relationship	69
	Responsibilities to yourself and co-workers	71
	Ethical dilemmas and conflicts	72
	Conclusion	75
	Key points	75
	Exercises	75
	Further reading	76
Part 2	**Generating and Analysing Data**	**77**
4	**In-depth Interviews**	**79**
	Chapter summary	79
	Introduction: terminology	79
	Developing everyday skills: what the research interview does	80
	A word on language	81
	Language in cross-cultural settings	84
	Assumptions about our own language	86
	In-depth interviews: what they can and can't do	87
	Private/public accounts	89
	Cultural factors and interviewing	91
	Social differences in interviews	92
	'Elite' interviewing	93
	Techniques: developing interview skills	94
	Improving reliability	100
	Transcribing interviews	101
	Sampling: how many and who to interview?	102
	Conclusion	104

	Key points	105
	Exercises	105
	Further reading	106
5	**Group Interviews**	**107**
	Chapter summary	107
	Introduction	107
	Different kinds of group interview: an overview	108
	Consensus panels	108
	Community interviews and participatory methods	110
	Focus groups	111
	Natural groups	111
	Advantages of using group interviews	112
	Naturalism	117
	Limitations	120
	Practical issues	121
	Developing appropriate methods for the setting	127
	Conclusion	128
	Key points	129
	Exercise	129
	Further reading	129
6	**Observational Methods**	**131**
	Chapter summary	131
	Aims of observational methods	132
	Participant and non-participant observation	133
	Ethnography and participant observation	135
	Doing ethnography close to home	137
	Overt and covert roles	138
	'Mystery shopping' and pseudo-patient studies	140
	Planning a participant observation study	142
	Rapid ethnographic methods	146
	Non-participant observational methods	148
	Conclusion	153
	Key points	153
	Exercises	154
	Further reading	154
7	**Using Documentary Sources**	**155**
	Chapter summary	155

	Introduction	155
	Why use existing sources?	156
	Public records	157
	Personal documents	160
	Mass media outputs	161
	Research outputs	162
	Methodological issues in using documentary sources	166
	Conclusion	169
	Key points	170
	Exercises	170
	Further reading	171
8	**Analysing Qualitative Data**	**173**
	Chapter summary	173
	Approaches to analysis	173
	Styles of analysis	175
	Relating analysis to the aims of the study	176
	Principles of different approaches	176
	Thematic content analysis	177
	Grounded theory	180
	Framework analysis	184
	Using computer software to help manage data	186
	Rigour in analysis	191
	Rigour is not enough . . .	196
	Generalizability and transferability	197
	Conclusion	199
	Key points	199
	Exercises	199
	Further reading	200
Part 3	**Doing Qualitative Work for Health**	**201**
9	**Collaborating Across Disciplines and Institutions**	**203**
	Chapter summary	203
	Introduction	203
	Different methods for different questions	205
	Multiple methods: to increase understanding or increase validity?	205
	Trans-disciplinary work	209
	Communicating across disciplines	211

	International collaborations	215
	Conclusion	217
	Key points	217
	Exercise	217
	Further reading	218
10	**Writing up Qualitative Work**	**219**
	Chapter summary	219
	Introduction	219
	The writing process	220
	Writing for different audiences	221
	Writing for health journals	222
	Writing for social science colleagues	225
	Writing for and disseminating to non-specialist audiences	227
	Alternatives to written reports	228
	Some practical issues to consider when writing up	229
	Conclusion	233
	Key points	233
	Exercise	234
	Further reading	234
11	**Reading and Appraising Qualitative Work**	**235**
	Chapter summary	235
	Introduction	235
	Reading critically	237
	Appraising empirical work: are criteria possible?	238
	Appraisal criteria	240
	Criteria in ethnography	243
	Conclusion	245
	Key points	245
	Exercise	246
	Further reading	246
