## **Introduction: Train Your Brain for Statistics 1**

The Population and the Sample 3

Descriptive and Inferential Statistics 3

Achieving the Objective of Inferential Statistics: The Necessary Steps 4

Training Your Brain for Statistics 5

1

## **DESCRIBING DATA WITH GRAPHS 7**

1.1 Variables and Data 8

1.2 Types of Variables 10

1.3 Graphs for Categorical Data 11

Exercises 14

1.4 Graphs for Quantitative Data 17

Pie Charts and Bar Charts 17

Line Charts 19

Dotplots 20

Stem and Leaf Plots 20

Interpreting Graphs with a Critical Eye 22

1.5 Relative Frequency Histograms 24

Exercises 29

**Chapter Review 34**

**CASE STUDY: How Is Your Blood Pressure? 50**

2

## **DESCRIBING DATA WITH NUMERICAL MEASURES 52**

2.1 Describing a Set of Data with Numerical Measures 53

2.2 Measures of Center 53

Exercises 57

2.3 Measures of Variability 60

Exercises 65

2.4 On the Practical Significance of the Standard Deviation 66

- 2.5 A Check on the Calculation of  $s$  70  
Exercises 71
- 2.6 Measures of Relative Standing 75
- 2.7 The Five-Number Summary and the Box Plot 80  
Exercises 84  
**Chapter Review 87**  
CASE STUDY: *The Boys of Summer* 96

3

### **DESCRIBING BIVARIATE DATA 97**

- 3.1 Bivariate Data 98
- 3.2 Graphs for Qualitative Variables 98  
Exercises 101
- 3.3 Scatterplots for Two Quantitative Variables 102
- 3.4 Numerical Measures for Quantitative Bivariate Data 105  
Exercises 112  
**Chapter Review 114**  
CASE STUDY: *Do You Think Your Dishes Are Really Clean?* 125

4

### **PROBABILITY AND PROBABILITY DISTRIBUTIONS 127**

- 4.1 The Role of Probability in Statistics 128
- 4.2 Events and the Sample Space 128
- 4.3 Calculating Probabilities Using Simple Events 131  
Exercises 134
- 4.4 Useful Counting Rules (Optional) 137  
Exercises 142
- 4.5 Event Relations and Probability Rules 144  
Calculating Probabilities for Unions and Complements 146
- 4.6 Independence, Conditional Probability, and the Multiplication Rule 149  
Exercises 154
- 4.7 Bayes' Rule (Optional) 158  
Exercises 161
- 4.8 Discrete Random Variables and Their Probability Distributions 163  
Random Variables 163  
Probability Distributions 163  
The Mean and Standard Deviation for a Discrete Random Variable 166  
Exercises 170  
**Chapter Review 172**  
CASE STUDY: *Probability and Decision Making in the Congo* 181

5

**SEVERAL USEFUL DISCRETE DISTRIBUTIONS 183**

- 5.1 Introduction 184
- 5.2 The Binomial Probability Distribution 184
  - Exercises 193
- 5.3 The Poisson Probability Distribution 197
  - Exercises 202
- 5.4 The Hypergeometric Probability Distribution 205
  - Exercises 207
- Chapter Review 208**
- CASE STUDY: A Mystery: Cancers Near a Reactor 218**

6

**THE NORMAL PROBABILITY DISTRIBUTION 219**

- 6.1 Probability Distributions for Continuous Random Variables 220
- 6.2 The Normal Probability Distribution 223
- 6.3 Tabulated Areas of the Normal Probability Distribution 225
  - The Standard Normal Random Variable 225
  - Calculating Probabilities for a General Normal Random Variable 229
  - Exercises 233
- 6.4 The Normal Approximation to the Binomial Probability Distribution (Optional) 237
  - Exercises 243
- Chapter Review 246**
- CASE STUDY: The Long and Short of It 252**

7

**SAMPLING DISTRIBUTIONS 254**

- 7.1 Introduction 255
- 7.2 Sampling Plans and Experimental Designs 255
  - Exercises 258
- 7.3 Statistics and Sampling Distributions 260
- 7.4 The Central Limit Theorem 263
- 7.5 The Sampling Distribution of the Sample Mean 266
  - Standard Error 267
  - Exercises 272
- 7.6 The Sampling Distribution of the Sample Proportion 275
  - Exercises 279
- 7.7 A Sampling Application: Statistical Process Control (Optional) 281
  - A Control Chart for the Process Mean: The  $\bar{x}$  Chart 281
  - A Control Chart for the Proportion Defective: The  $p$  Chart 283
  - Exercises 285

**Chapter Review 287**

**CASE STUDY: Sampling the Roulette at Monte Carlo 295**

8

**LARGE-SAMPLE ESTIMATION 297**

- 8.1 Where We've Been 298
- 8.2 Where We're Going—Statistical Inference 298
- 8.3 Types of Estimators 299
- 8.4 Point Estimation 300
  - Exercises 305
- 8.5 Interval Estimation 307
  - Constructing a Confidence Interval 308
  - Large-Sample Confidence Interval for a Population Mean  $\mu$  310
  - Interpreting the Confidence Interval 311
  - Large-Sample Confidence Interval for a Population Proportion  $p$  314
  - Exercises 316
- 8.6 Estimating the Difference between Two Population Means 318
  - Exercises 321
- 8.7 Estimating the Difference between Two Binomial Proportions 324
  - Exercises 326
- 8.8 One-Sided Confidence Bounds 328
- 8.9 Choosing the Sample Size 329
  - Exercises 333
- Chapter Review 336**
- CASE STUDY: How Reliable Is That Poll? 341**

9

**LARGE-SAMPLE TESTS OF HYPOTHESES 343**

- 9.1 Testing Hypotheses about Population Parameters 344
- 9.2 A Statistical Test of Hypothesis 344
- 9.3 A Large-Sample Test about a Population Mean 347
  - The Essentials of the Test 348
  - Calculating the  $p$ -Value 351
  - Two Types of Errors 356
  - The Power of a Statistical Test 356
  - Exercises 360
- 9.4 A Large-Sample Test of Hypothesis for the Difference between Two Population Means 363
  - Hypothesis Testing and Confidence Intervals 365
  - Exercises 366
- 9.5 A Large-Sample Test of Hypothesis for a Binomial Proportion 368

- Statistical Significance and Practical Importance 370
- Exercises 371
- 9.6 A Large-Sample Test of Hypothesis for the Difference between Two Binomial Proportions 373
  - Exercises 376
- 9.7 Some Comments on Testing Hypotheses 378
  - Chapter Review 379**
  - CASE STUDY: An Aspirin a Day . . . ? 384

10

## **INFERENCE FROM SMALL SAMPLES 386**

- 10.1 Introduction 387
- 10.2 Student's  $t$  Distribution 387
  - Assumptions behind Student's  $t$  Distribution 391
- 10.3 Small-Sample Inferences Concerning a Population Mean 391
  - Exercises 397
- 10.4 Small-Sample Inferences for the Difference between Two Population Means: Independent Random Samples 399
  - Exercises 406
- 10.5 Small-Sample Inferences for the Difference between Two Means: A Paired-Difference Test 410
  - Exercises 414
- 10.6 Inferences Concerning a Population Variance 417
  - Exercises 423
- 10.7 Comparing Two Population Variances 424
  - Exercises 430
- 10.8 Revisiting the Small-Sample Assumptions 432
  - Chapter Review 433**
  - CASE STUDY: How Would You Like a Four-Day Workweek? 445

11

## **THE ANALYSIS OF VARIANCE 447**

- 11.1 The Design of an Experiment 448
- 11.2 What Is an Analysis of Variance? 449
- 11.3 The Assumptions for an Analysis of Variance 449
- 11.4 The Completely Randomized Design: A One-Way Classification 450
- 11.5 The Analysis of Variance for a Completely Randomized Design 451
  - Partitioning the Total Variation in an Experiment 451
  - Testing the Equality of the Treatment Means 454
  - Estimating Differences in the Treatment Means 456
  - Exercises 459

11.6	Ranking Population Means	462
	Exercises	465
11.7	The Randomized Block Design: A Two-Way Classification	466
11.8	The Analysis of Variance for a Randomized Block Design	467
	Partitioning the Total Variation in the Experiment	467
	Testing the Equality of the Treatment and Block Means	470
	Identifying Differences in the Treatment and Block Means	472
	Some Cautionary Comments on Blocking	473
	Exercises	474
11.9	The $a \times b$ Factorial Experiment: A Two-Way Classification	478
11.10	The Analysis of Variance for an $a \times b$ Factorial Experiment	480
	Exercises	484
11.11	Revisiting the Analysis of Variance Assumptions	487
	Residual Plots	488
11.12	A Brief Summary	490
	<b>Chapter Review</b>	<b>491</b>
	<b>CASE STUDY: "A Fine Mess"</b>	<b>501</b>

12

## **LINEAR REGRESSION AND CORRELATION 502**

12.1	Introduction	503
12.2	A Simple Linear Probabilistic Model	503
12.3	The Method of Least Squares	506
12.4	An Analysis of Variance for Linear Regression	509
	Exercises	511
12.5	Testing the Usefulness of the Linear Regression Model	514
	Inferences Concerning $\beta$ , the Slope of the Line of Means	514
	The Analysis of Variance $F$ Test	518
	Measuring the Strength of the Relationship: The Coefficient of Determination	518
	Interpreting the Results of a Significant Regression	519
	Exercises	520
12.6	Diagnostic Tools for Checking the Regression Assumptions	522
	Dependent Error Terms	523
	Residual Plots	523
	Exercises	524
12.7	Estimation and Prediction Using the Fitted Line	527
	Exercises	531
12.8	Correlation Analysis	533
	Exercises	537

**Chapter Review 540**

**CASE STUDY: Is Your Car “Made in the U.S.A.”? 550**

13

**MULTIPLE REGRESSION ANALYSIS 551**

13.1 Introduction 552

13.2 The Multiple Regression Model 552

13.3 A Multiple Regression Analysis 553

The Method of Least Squares 554

The Analysis of Variance for Multiple Regression 555

Testing the Usefulness of the Regression Model 556

Interpreting the Results of a Significant Regression 557

Checking the Regression Assumptions 558

Using the Regression Model for Estimation and Prediction 559

13.4 A Polynomial Regression Model 559

Exercises 562

13.5 Using Quantitative and Qualitative Predictor Variables  
in a Regression Model 566

Exercises 572

13.6 Testing Sets of Regression Coefficients 575

13.7 Interpreting Residual Plots 578

13.8 Stepwise Regression Analysis 579

13.9 Misinterpreting a Regression Analysis 580

Causality 580

Multicollinearity 580

13.10 Steps to Follow when Building a Multiple Regression Model 582

**Chapter Review 582**

**CASE STUDY: “Made in the U.S.A.”—Another Look 592**

14

**ANALYSIS OF CATEGORICAL DATA 594**

14.1 A Description of the Experiment 595

14.2 Pearson’s Chi-Square Statistic 596

14.3 Testing Specified Cell Probabilities: The Goodness-of-Fit Test 597

Exercises 599

14.4 Contingency Tables: A Two-Way Classification 602

The Chi-Square Test of Independence 602

Exercises 608

14.5 Comparing Several Multinomial Populations: A Two-Way  
Classification with Fixed Row or Column Totals 610

Exercises 613

- 14.6 The Equivalence of Statistical Tests 614
- 14.7 Other Applications of the Chi-Square Test 615

**Chapter Review 616**

CASE STUDY: **Can a Marketing Approach Improve Library Services?** 628

15

**NONPARAMETRIC STATISTICS 629**

- 15.1 Introduction 630
- 15.2 The Wilcoxon Rank Sum Test: Independent Random Samples 630
  - Normal Approximation for the Wilcoxon Rank Sum Test 634
  - Exercises 637
- 15.3 The Sign Test for a Paired Experiment 639
  - Normal Approximation for the Sign Test 640
  - Exercises 642
- 15.4 A Comparison of Statistical Tests 643
- 15.5 The Wilcoxon Signed-Rank Test for a Paired Experiment 644
  - Normal Approximation for the Wilcoxon Signed-Rank Test 647
  - Exercises 648
- 15.6 The Kruskal-Wallis  $H$  Test for Completely Randomized Designs 650
  - Exercises 654
- 15.7 The Friedman  $F_r$  Test for Randomized Block Designs 656
  - Exercises 659
- 15.8 Rank Correlation Coefficient 660
  - Exercises 664
- 15.9 Summary 666
  - Chapter Review 667**
  - CASE STUDY: **How's Your Cholesterol Level?** 677

**APPENDIX I 679**

- Table 1 Cumulative Binomial Probabilities 680
- Table 2 Cumulative Poisson Probabilities 686
- Table 3 Areas under the Normal Curve 688
- Table 4 Critical Values of  $t$  691
- Table 5 Critical Values of Chi-Square 692
- Table 6 Percentage Points of the  $F$  Distribution 694
- Table 7 Critical Values of  $T$  for the Wilcoxon Rank Sum Test,  $n_1 \leq n_2$  702
- Table 8 Critical Values of  $T$  for the Wilcoxon Signed-Rank Test,  $n = 5(1)50$  704

Table 9 Critical Values of Spearman's Rank Correlation Coefficient  
for a One-Tailed Test 705

Table 10 Random Numbers 706

Table 11 Percentage Points of the Studentized Range,  $q_\alpha(k, df)$  708

**DATA SOURCES 712**
