HANDBOOK OF ADVANCED MAGNETIC MATERIALS

VOLUME 4: PROPERTIES AND APPLICATIONS

 Springer

Contents

Preface	V
List of Contributors	XVI
1 Recent Developments in High-Temperature Permanent Magnet Materials	1
1.1 Introduction	1
1.1.1 Requirement for High-Temperature Permanent Magnet Materials	1
1.1.2 Review of Conventional Permanent Magnet Materials	1
1.2 Candidate Alloy System for High-Temperature Permanent Magnet Materials	4
1.3 New $\text{Sm}_2\text{Co}_{17}$ -Based High-Temperature Permanent Magnet Materials	7
1.3.1 Effects of Compositions on High-Temperature Intrinsic Coercivity of $\text{Sm}_2\text{-TM}_{17}$ Permanent Magnets	7
1.3.2 Magnetic Properties of New $\text{Sm}_2\text{Co}_{17}$ -Based High-Temperature Permanent Magnet Materials	13
1.3.3 Dynamic Characterizations of New High-Temperature Permanent Magnets	16
1.3.4 Long-Term Thermal Stability of New High-Temperature Permanent Magnets	19
1.3.5 Microstructure and Crystal Structure	21
1.3.6 Coercivity in $\text{Sm}_2\text{-TM}_{17}$ -Type Permanent Magnets	23
1.4 New Approach to Calculate Temperature Coefficients of Magnetic Properties	35
1.5 SmCo_7 -Type Permanent Magnets	38
1.6 Temperature Compensated Rare Earth Permanent Magnets and Modeling of Temperature Coefficient of Magnetization	39
1.7 Other High-Temperature Permanent Magnet Materials and Future Perspective	46
References	47
2 New Rare-Earth Transition-Metal Intermetallic Compounds and Metastable Phases for Permanent Magnetic Materials	50
2.1 Introduction	50

X Contents

2.1.1	Overview of Structures	51
2.2	Experimental Processing	54
2.2.1	Melting	54
2.2.2	Mechanical Alloying/Milling	55
2.2.3	Rapid Quenching	55
2.2.4	HDDR	55
2.2.5	Solid-State Reaction	56
2.2.6	Solid-Gas Reaction	56
2.2.7	Sputtering	56
2.3	New Intermetallic Compounds	57
2.3.1	$R(\text{Fe}, \text{T}, \text{X})_{12}$ ($\text{X}=\text{B}, \text{C}$)	57
2.3.2	$\text{R}_2\text{Fe}_{14}\text{BN}_8$	59
2.3.3	$\text{R}_6\text{Fe}_{13-x}\text{M}_{1+x}$	61
2.3.4	$\text{R}_3\text{T}_{29}\text{Si}_4\text{B}_{10}$	61
2.4	Metastable Phases	64
2.4.1	RFe_5	64
2.4.2	RT_7 ($\text{T}=\text{Fe}, \text{Co}, \text{Ti}, \text{etc.}$)	65
2.4.3	RT_7N_8	68
2.4.4	R-Fe-C	72
2.4.5	$\text{Nd}_2\text{Fe}_{14}\text{BN}_8$	74
2.4.6	RFe_{12}	75
2.5	Discussion	76
2.6	Conclusions	79
	References	80

3 Magnetic Properties and Interstitial Atom Effects in the $\text{R}(\text{Fe}, \text{M})_{12}$

Compounds	86	
3.1	Introduction	86
3.2	Interstitial Atom Effects and Intermetallic Compounds	87
3.2.1	Crystallographic Structures	87
3.2.2	Curie Temperature and Saturation Magnetization	93
3.2.3	Magnetocrystalline Anisotropy	95
3.2.4	Hyperfine Interactions	97
3.3	Origin of the Interstitial Atom Effects	101
3.3.1	Crystal Field Effect	101
3.3.2	Band Structures	103
3.4	Novel Permanent Magnets Based on 1 : 12 Nitrides	108
3.4.1	The Domain Structures in Compounds, Nitrides and Carbides	108
3.4.2	Hard Magnetic Properties of Nitrides	111
3.5	Conclusions and Prospect	118
	References	119

4	Nanocrystalline Soft Magnetic Materials and Their Applications	124
4.1	Introduction	124
4.2	Magnetic Properties and Microstructure	125
4.2.1	Magnetic Properties	125
4.2.2	Microstructure	133
4.2.3	Origin of Magnetic Softness	136
4.3	Applications	143
4.3.1	Parts for Noise Measures	145
4.3.2	Magnetic Parts for Communications	147
4.3.3	Parts for Pulsed Power	148
4.3.4	Parts for Power Supplies	149
4.3.5	Current Sensors	152
4.3.6	Electromagnetic Shielding, Wave Absorbers	152
4.4	Conclusions	155
	References	155
5	Spin-Density Waves and Charge-Density Waves in Cr Alloys	159
5.1	Introduction	159
5.2	Magnetic Properties of Antiferromagnetic Cr and Cr Alloys	161
5.2.1	Magnetic Phase Diagrams	161
5.2.2	Magnetic Phase Transition	164
5.3	Local Moments in Cr Alloys	168
5.3.1	Magnetic Susceptibility	168
5.3.2	Local Moments in Non-Magnetic Impurities-Local Spin-Density Waves	170
5.3.3	Correlation with Giant Magnetoresistance and Exchange Bias in Cr Alloys	174
5.4	Spin-Glass Phase in Cr-Alloys	177
5.5	Neutrons and X-Ray Scattering: CDW/SW and SDW Domains	180
5.5.1	Technical Antiferromagnetism	180
5.5.2	Neutrons and X-Ray Two Complementary Techniques Used in Studies of Cr Magnetism	182
5.5.3	Aspects of Neutron and X-Ray Scattering in Cr and Cr-Alloys	183
5.5.4	Orbital Moment in Cr and Resonant Scattering	185
5.5.5	Magnetic Q Domains in Cr (001) Face	193
5.5.6	Paramagnetic Critical Fluctuations in Cr and in Cr-0.2at. %V	195
5.6	Ultrasonic Measurements in Cr and Cr-Alloys	197
5.7	Bulk Chromium Properties Relevant for Thin Film Devices	202
5.8	Final Remarks	204
	References	205

XI Contents

6	New Magnetic Recording Media	211
6.1	Introduction	211
6.2	New Media Development by Sputtering	213
6.2.1	Introduction	213
6.2.2	Hexagonal Co-Alloys	215
6.2.3	L1 ₀ Alloys	216
6.2.4	Rare Earth-Transition Metal Compounds	216
6.2.5	Nanocomposite Films	217
6.2.6	AFC Media	218
6.3	Chemical Synthesis	219
6.3.1	Introduction	219
6.3.2	Stabilization of Nanoparticle Dispersion	220
6.3.3	Chemical Synthesis of Monodisperse Nanoparticles	221
6.3.4	Magnetic Nanoparticle Assembly	225
6.3.5	Conclusions	227
6.4	Self-Assembly	228
6.4.1	Introduction	228
6.4.2	Porous Alumina Template Technique	229
6.4.3	Self-Assembled Nanowire/Dot Arrays as Recording Media-Merits and Challenges	235
6.5	Concluding Remarks	235
	References	236
7	Magneto-Optical Properties of Nanostructured Media	241
7.1	Introduction	241
7.2	Electromagnetic Theory of the Magneto-Optical Effect	242
7.2.1	Faraday Rotation	242
7.2.2	Kerr Rotation	244
7.3	Microscopic Models	247
7.3.1	Interband Transitions	247
7.3.2	Intraband Transitions	248
7.4	Magneto-Optical Measurements	250
7.4.1	Experimental Principles	250
7.4.2	Description of the Experimental System	253
7.5	Magneto-Optical Spectra of Magnetic and Non-Magnetic Metals	255
7.5.1	The Magneto-Optical Effect in the Noble Metal Ag	255
7.5.2	Magnetic Granular Films	256
7.5.3	Magnetic Co-Cu Multilayers	263
7.6	Summary	268
	References	268

8	Magnetoresistive Recording Heads	271
8.1	Introduction	271
8.2	Physics of Magnetoresistance	274
8.3	Magnetoresistive Head Fabrication	280
8.4	Noise in Magnetoresistive Sensors	280
8.5	Future of Magnetic Data Storage; Challenge in Maintaining Rapid Pace of Development	283
	Appendix 8.1 Glossary of Commonly Used Industry Terminology ...	284
	References	288
9	Magnetic Random Access Memories for Computer Data Storage	292
9.1	Introduction	292
9.2	MRAM Using Spin-Valve Effect	293
9.3	EPROM Using Hall Effect	296
9.4	MRAM Using Spin-Dependent Tunneling Effect	297
9.5	Future Perspective	304
	References	305
10	Magnetoresistive Thin Film Materials and Their Device	
	Applications	307
10.1	Introduction	307
10.2	Magnetoresistive Materials	308
10.2.1	AMR Materials	310
10.2.2	Giant Magnetoresistive Materials	312
10.2.3	Tunnel Magnetoresistance	314
10.2.4	Colossal Magnetoresistance	319
10.2.5	Advanced Magnetoresistive Materials	320
10.3	Magnetoresistive Devices	321
10.3.1	Magnetic Field Sensors	322
10.3.2	Magnetic Field Gradient Sensors	324
10.3.3	Electrical Current Sensors	324
10.3.4	Integrated Magnetic Sensors	325
10.3.5	Galvanic Isolators	326
10.3.6	Advanced Magnetoresistive Devices	329
10.3.7	Applications of Magnetic Field Sensors	331
	References	333
11	Nano-Structural Magnetoelastic Materials for Sensor Applications	339
11.1	Introduction	339
11.2	Metallic Glass Preparation and Properties	341
11.2.1	Preparation of Metallic Glasses	341
11.2.2	Summary of Physical and Magnetic Properties of	

XV Contents

	Metallic Glasses	342
11.2.3	Tailoring of Metallic Glasses for Sensor Applications	346
11.3	Sensor Applications	348
11.3.1	Induction Sensors with Metallic Glass Cores	349
11.3.2	Giant Magneto-Impedance / Stress-Impedance Sensors	354
11.3.3	Magnetostrictive Delay Line Sensors	356
11.3.4	Magnetoelastic Resonance Sensors	359
11.3.5	Magneto-Surface-Acoustic-Wave Sensors	368
11.3.6	Gyro-Magnetic Sensors with Metallic Glass Cores	369
11.4	Conclusions	371
	References	372
12	Soft Magnetic Films and Wires for Magnetic Field Sensors	380
12.1	Introduction	380
12.2	Linear Magneto-Impedance	383
12.3	Electrodynamic Problems of Linear Magneto-Impedance	392
12.4	Nonlinear Magnetization Reversal Induced by ac Current	397
12.5	Manufacturing of Magneto-Impedance Units for Magnetic Field Sensors	404
12.6	Magneto-Impedance Sensors of Magnetic Field	408
12.7	Some Concluding Remarks	409
	References	410
13	Microwave Permeability of Magnetic Films	414
13.1	Introduction	414
13.2	High Frequency Permeability of a Single Domain Ellipsoid	415
13.2.1	Landau-Lifshitz Equation and Frequency Dispersion of Permeability	415
13.2.2	Snoek's Law	417
13.2.3	Relation Between the Static Permeability and the Resonance Frequency in Thin Films	418
13.2.4	The Effect of Damping	420
13.2.5	Integral Relations	421
13.3	Models of Microwave Permeability of Actual Thin Films	424
13.3.1	The Effect of Out-of-Plane Anisotropy	424
13.3.2	The Effect of Stripe Domain Structure	425
13.3.3	The Effect of Finite Film Thickness	427
13.3.4	Account for the Eddy Currents	428
13.3.5	Permeability of Patterned and Granular Films	430

13.4	Experimental Data on the Permeability of Thin Films	431
13.4.1	Permeability Measurement Techniques	431
13.4.2	Experimental Microwave Magnetic Spectra	433
13.5	Microwave Applications for High Permeable Materials	440
13.6	Conclusions	442
	References	443
