# Detrital THERMOCHRONOLOGY

**Provenance Analysis, Exhumation, and  
Landscape Evolution of Mountain Belts**

Edited by Matthias Bernet and Cornelia Spiegel

# Contents

<b>Introduction: Detrital thermochronology</b>	
Matthias Bernet and Cornelia Spiegel .....	1
<b>1. Characterizing the significance of provenance on the inference of thermal history models from apatite fission-track data—A synthetic data study.</b> .....	7
Andrew Carter and Kerry Gallagher	
<b>2. Fundamentals of detrital zircon fission-track analysis for provenance and exhumation studies with examples from the European Alps.</b> .....	25
Matthias Bernet, Mark T. Brandon, John I. Garver, and Brandi R. Molitor	
<b>3. Toward a comprehensive provenance analysis: A multi-method approach and its implications for the evolution of the Central Alps</b> .....	37
Cornelia Spiegel, Wolfgang Siebel, Joachim Kuhlemann, and Wolfgang Frisch	
<b>4. Miocene siliciclastic deposits of Naxos Island: Geodynamic and environmental implications for the evolution of the southern Aegean Sea (Greece).</b> .....	51
J. Kuhlemann, W. Frisch, I. Dunkl, M. Kázmér, and G. Schmiedl	
<b>5. Detecting provenance variations and cooling patterns within the western Alpine orogen through <math>^{40}\text{Ar}/^{39}\text{Ar}</math> geochronology on detrital sediments: The Tertiary Piedmont Basin, northwest Italy</b> .....	67
B. Carrapa, J. Wijbrans, and G. Bertotti	
<b>6. Siliclastic record of rapid denudation in response to convergent-margin orogenesis, Ross orogen, Antarctica</b> .....	105
John W. Goodge, Paul Myrow, David Phillips, C. Mark Fanning, and Ian S. Williams
