Calculations

Piping Calculations Manual

E. SHASHI MENON

- Analyzing the capabilities of existing pipelines
- HP calculations—hydraulic vs. brake
- Optimizing performance and estimating requirements for expanding throughput of pipelines

Contents

Preface xv

Chapter 1. Water Systems Piping	1
Introduction	1
1.1 Properties of Water	1
1.1.1 Mass and Weight	1
1.1.2 Density and Specific Weight	2
1.1.3 Specific Gravity	3
1.1.4 Viscosity	3
1.2 Pressure	5
1.3 Velocity	7
1.4 Reynolds Number	9
1.5 Types of Flow	10
1.6 Pressure Drop Due to Friction	11
1.6.1 Bernoulli's Equation	11
1.6.2 Darcy Equation	13
1.6.3 Colebrook-White Equation	15
1.6.4 Moody Diagram	16
1.6.5 Hazen-Williams Equation	20
1.6.6 Manning Equation	22
1.7 Minor Losses	24
1.7.1 Valves and Fittings	25
1.7.2 Pipe Enlargement and Reduction	28
1.7.3 Pipe Entrance and Exit Losses	30
1.8 Complex Piping Systems	30
1.8.1 Series Piping	30
1.8.2 Parallel Piping	36
1.9 Total Pressure Required	41
1.9.1 Effect of Elevation	42
1.9.2 Tight Line Operation	44
1.9.3 Slack Line Flow	45
1.10 Hydraulic Gradient	45
1.11 Gravity Flow	47
1.12 Pumping Horsepower	50

1.13	Pumps	52
1.13.1	Positive Displacement Pumps	52
1.13.2	Centrifugal Pumps	52
1.13.3	Pumps in Series and Parallel	59
1.13.4	System Head Curve	62
1.13.5	Pump Curve versus System Head Curve	64
1.14	Flow Injections and Deliveries	66
1.15	Valves and Fittings	69
1.16	Pipe Stress Analysis	70
1.17	Pipeline Economics	73
Chapter 2. Fire Protection Piping Systems		81
	Introduction	81
2.1	Fire Protection Codes and Standards	81
2.2	Types of Fire Protection Piping	83
2.2.1	Belowground Piping	83
2.2.2	Aboveground Piping	84
2.2.3	Hydrants and Sprinklers	85
2.3	Design of Piping System	89
2.3.1	Pressure	90
2.3.2	Velocity	92
2.4	Pressure Drop Due to Friction	94
2.4.1	Reynolds Number	95
2.4.2	Types of Flow	96
2.4.3	Darcy-Weisbach Equation	97
2.4.4	Moody Diagram	100
2.4.5	Hazen-Williams Equation	103
2.4.6	Friction Loss Tables	105
2.4.7	Losses in Valves and Fittings	105
2.4.8	Complex Piping Systems	112
2.5	Pipe Materials	121
2.6	Pumps	122
2.6.1	Centrifugal Pumps	123
2.6.2	Net Positive Suction Head	124
2.6.3	System Head Curve	124
2.6.4	Pump Curve versus System Head Curve	126
2.7	Sprinkler System Design	126
Chapter 3. Wastewater and Stormwater Piping		131
	Introduction	131
3.1	Properties of Wastewater and Stormwater	131
3.1.1	Mass and Weight	132
3.1.2	Density and Specific Weight	133
3.1.3	Volume	133
3.1.4	Specific Gravity	134
3.1.5	Viscosity	134
3.2	Pressure	136
3.3	Velocity	138
3.4	Reynolds Number	140
3.5	Types of Flow	141

3.6	Pressure Drop Due to Friction	142
3.6.1	Manning Equation	142
3.6.2	Darcy Equation	143
3.6.3	Colebrook-White Equation	145
3.6.4	Moody Diagram	146
3.6.5	Hazen-Williams Equation	150
3.7	Minor Losses	152
3.7.1	Valves and Fittings	153
3.7.2	Pipe Enlargement and Reduction	155
3.7.3	Pipe Entrance and Exit Losses	158
3.8	Sewer Piping Systems	158
3.9	Sanitary Sewer System Design	159
3.10	Self-Cleansing Velocity	169
3.11	Storm Sewer Design	175
3.11.1	Time of Concentration	175
3.11.2	Runoff Rate	176
3.12	Complex Piping Systems	177
3.12.1	Series Piping	178
3.12.2	Parallel Piping	183
3.13	Total Pressure Required	188
3.13.1	Effect of Elevation	190
3.13.2	Tight Line Operation	191
3.13.3	Slack Line Flow	192
3.14	Hydraulic Gradient	193
3.15	Gravity Flow	194
3.16	Pumping Horsepower	196
3.17	Pumps	198
3.17.1	Positive Displacement Pumps	198
3.17.2	Centrifugal Pumps	198
3.18	Pipe Materials	199
3.19	Loads on Sewer Pipe	200
Chapter 4. Steam Systems Piping		203
	Introduction	203
4.1	Codes and Standards	203
4.2	Types of Steam Systems Piping	204
4.3	Properties of Steam	204
4.3.1	Enthalpy	205
4.3.2	Specific Heat	206
4.3.3	Pressure	206
4.3.4	Steam Tables	207
4.3.5	Superheated Steam	207
4.3.6	Volume	213
4.3.7	Viscosity	222
4.4	Pipe Materials	223
4.5	Velocity of Steam Flow in Pipes	223
4.6	Pressure Drop	226
4.6.1	Darcy Equation for Pressure Drop	227
4.6.2	Colebrook-White Equation	229
4.6.3	Unwin Formula	231

4.6.4	Babcock Formula	232
4.6.5	Fritzche's Equation	233
4.7	Nozzles and Orifices	237
4.8	Pipe Wall Thickness	245
4.9	Determining Pipe Size	246
4.10	Valves and Fittings	247
4.10.1	Minor Losses	248
4.10.2	Pipe Enlargement and Reduction	249
4.10.3	Pipe Entrance and Exit Losses	251
 Chapter 5. Compressed-Air Systems Piping		253
	Introduction	253
5.1	Properties of Air	253
5.1.1	Relative Humidity	258
5.1.2	Humidity Ratio	259
5.2	Fans, Blowers, and Compressors	259
5.3	Flow of Compressed Air	260
5.3.1	Free Air, Standard Air, and Actual Air	260
5.3.2	Isothermal Flow	264
5.3.3	Adiabatic Flow	271
5.3.4	Isentropic Flow	272
5.4	Pressure Drop in Piping	273
5.4.1	Darcy Equation	273
5.4.2	Churchill Equation	279
5.4.3	Swamee-Jain Equation	279
5.4.4	Harris Formula	282
5.4.5	Fritzsche Formula	283
5.4.6	Unwin Formula	285
5.4.7	Spitzglass Formula	286
5.4.8	Weymouth Formula	287
5.5	Minor Losses	288
5.6	Flow of Air through Nozzles	293
5.6.1	Flow through a Restriction	295
 Chapter 6. Oil Systems Piping		301
	Introduction	301
6.1	Density, Specific Weight, and Specific Gravity	301
6.2	Specific Gravity of Blended Products	305
6.3	Viscosity	306
6.4	Viscosity of Blended Products	314
6.5	Bulk Modulus	318
6.6	Vapor Pressure	319
6.7	Pressure	320
6.8	Velocity	322
6.9	Reynolds Number	325
6.10	Types of Flow	326
6.11	Pressure Drop Due to Friction	327
6.11.1	Bernoulli's Equation	327
6.11.2	Darcy Equation	329

6.11.3	Colebrook-White Equation	332
6.11.4	Moody Diagram	333
6.11.5	Hazen-Williams Equation	338
6.11.6	Miller Equation	342
6.11.7	Shell-MIT Equation	344
6.11.8	Other Pressure Drop Equations	346
6.12	Minor Losses	347
6.12.1	Valves and Fittings	347
6.12.2	Pipe Enlargement and Reduction	351
6.12.3	Pipe Entrance and Exit Losses	353
6.13	Complex Piping Systems	353
6.13.1	Series Piping	353
6.13.2	Parallel Piping	358
6.14	Total Pressure Required	364
6.14.1	Effect of Elevation	366
6.14.2	Tight Line Operation	367
6.15	Hydraulic Gradient	368
6.16	Pumping Horsepower	370
6.17	Pumps	371
6.17.1	Positive Displacement Pumps	372
6.17.2	Centrifugal Pumps	372
6.17.3	Net Positive Suction Head	375
6.17.4	Specific Speed	377
6.17.5	Effect of Viscosity and Gravity on Pump Performance	379
6.18	Valves and Fittings	380
6.19	Pipe Stress Analysis	382
6.20	Pipeline Economics	384
Chapter 7. Gas Systems Piping		391
	Introduction	391
7.1	Gas Properties	391
7.1.1	Mass	391
7.1.2	Volume	391
7.1.3	Density	392
7.1.4	Specific Gravity	392
7.1.5	Viscosity	393
7.1.6	Ideal Gases	394
7.1.7	Real Gases	398
7.1.8	Natural Gas Mixtures	398
7.1.9	Compressibility Factor	405
7.1.10	Heating Value	411
7.1.11	Calculating Properties of Gas Mixtures	411
7.2	Pressure Drop Due to Friction	413
7.2.1	Velocity	413
7.2.2	Reynolds Number	414
7.2.3	Pressure Drop Equations	415
7.2.4	Transmission Factor and Friction Factor	422
7.3	Line Pack in Gas Pipeline	433
7.4	Pipes in Series	435
7.5	Pipes in Parallel	439
7.6	Looping Pipelines	447

7.7	Gas Compressors	449
7.7.1	Isothermal Compression	449
7.7.2	Adiabatic Compression	450
7.7.3	Discharge Temperature of Compressed Gas	451
7.7.4	Compressor Horsepower	452
7.8	Pipe Stress Analysis	454
7.9	Pipeline Economics	458
Chapter 8. Fuel Gas Distribution Piping Systems		465
	Introduction	465
8.1	Codes and Standards	465
8.2	Types of Fuel Gas	466
8.3	Gas Properties	467
8.4	Fuel Gas System Pressures	468
8.5	Fuel Gas System Components	469
8.6	Fuel Gas Pipe Sizing	470
8.7	Pipe Materials	482
8.8	Pressure Testing	482
8.9	LPG Transportation	483
8.9.1	Velocity	484
8.9.2	Reynolds Number	486
8.9.3	Types of Flow	488
8.9.4	Pressure Drop Due to Friction	488
8.9.5	Darcy Equation	488
8.9.6	Colebrook-White Equation	491
8.9.7	Moody Diagram	492
8.9.8	Minor Losses	495
8.9.9	Valves and Fittings	496
8.9.10	Pipe Enlargement and Reduction	499
8.9.11	Pipe Entrance and Exit Losses	501
8.9.12	Total Pressure Required	501
8.9.13	Effect of Elevation	502
8.9.14	Pump Stations Required	503
8.9.15	Tight Line Operation	506
8.9.16	Hydraulic Gradient	506
8.9.17	Pumping Horsepower	508
8.10	LPG Storage	510
8.11	LPG Tank and Pipe Sizing	511
Chapter 9. Cryogenic and Refrigeration Systems Piping		519
	Introduction	519
9.1	Codes and Standards	520
9.2	Cryogenic Fluids and Refrigerants	520
9.3	Pressure Drop and Pipe Sizing	523
9.3.1	Single-Phase Liquid Flow	523
9.3.2	Single-Phase Gas Flow	552
9.3.3	Two-Phase Flow	578
9.3.4	Refrigeration Piping	584
9.4	Piping Materials	598

Chapter 10. Slurry and Sludge Systems Piping	603
Introduction	603
10.1 Physical Properties	603
10.2 Newtonian and Nonnewtonian Fluids	607
10.2.1 Bingham Plastic Fluids	609
10.2.2 Pseudo-Plastic Fluids	609
10.2.3 Yield Pseudo-Plastic Fluids	610
10.3 Flow of Newtonian Fluids	612
10.4 Flow of Nonnewtonian Fluids	615
10.4.1 Laminar Flow of Nonnewtonian Fluids	615
10.4.2 Turbulent Flow of Nonnewtonian Fluids	625
10.5 Homogenous and Heterogeneous Flow	633
10.5.1 Homogenous Flow	633
10.5.2 Heterogeneous Flow	638
10.6 Pressure Loss in Slurry Pipelines with Heterogeneous Flow	641
Appendix A. Units and Conversions	645
Appendix B. Pipe Properties (U.S. Customary System of Units)	649
Appendix C. Viscosity Corrected Pump Performance	659
References	661
Index	663
