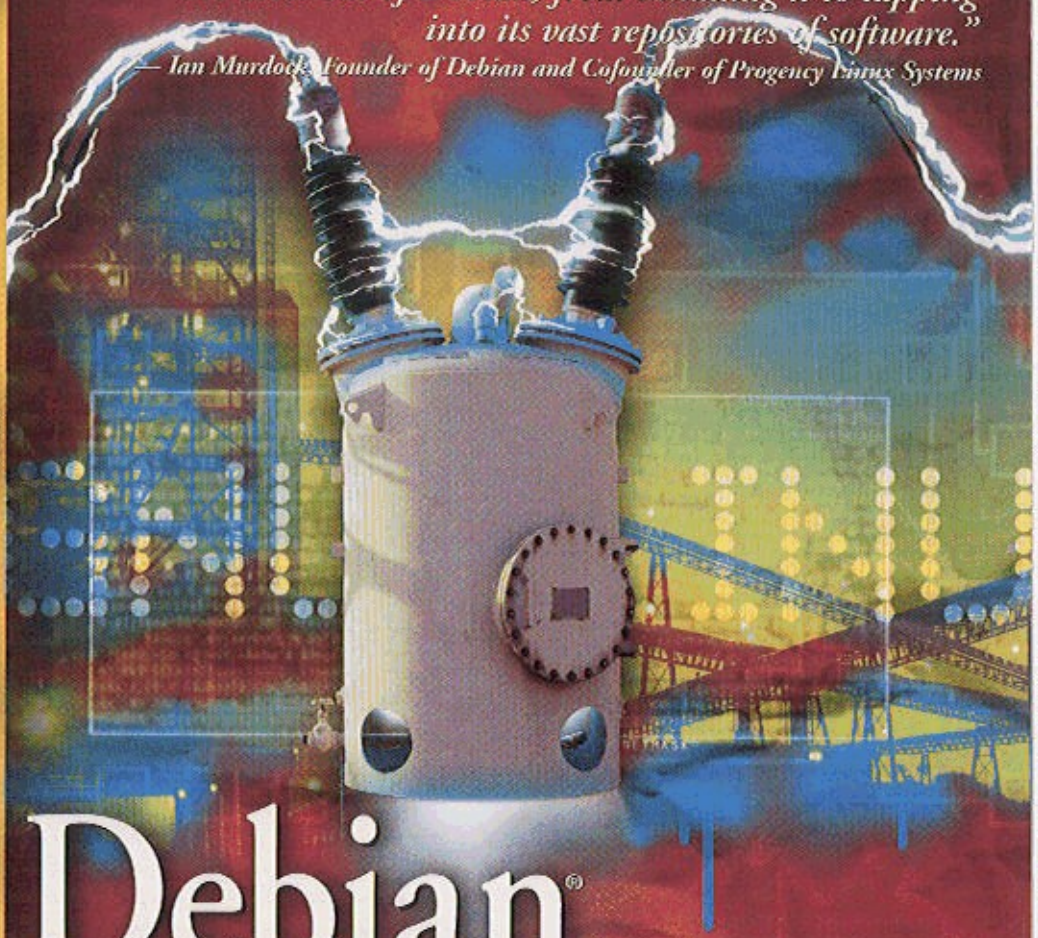
WHAT YOU NEED
ONE HUNDRED PERCENT

Explore the benefits of Debian, the Debian community, and free and Open Source software

Examine Debian's versatility for desktop, Internet, and intranet server use

Experience the Debian environment without installing, using the Knoppix bootable CD

"This book contains everything you need to know to get the most out of Debian, from installing it to tapping into its vast repositories of software."
— Ian Murdock, Founder of Debian and Cofounder of Progeny Linux Systems



Debian® GNU®/Linux® 3.1 Bible

TWO BONUS CD-ROMS

Debian CD includes Debian installer and selected packages to get a basic system up and running.

Knoppix Live CD lets you preview a full Debian environment without installing.

Benjamin Mako Hill,
David B. Harris,
and Jaldhar Vyas

Contents at a Glance

Preface vii
Acknowledgments xi

Part I: The Fundamentals 1
Chapter 1: The Debian Project 3
Chapter 2: Installing Debian 21
Chapter 3: Using the Shell and Filesystem 33
Chapter 4: Software Management 71
Chapter 5: Basic System Administration 103
Chapter 6: Performing Backups 125

Part II: The Linux Desktop 163
Chapter 7: Configuring Graphics and Sound 165
Chapter 8: The KDE and GNOME Desktop Environments 177
Chapter 9: Internet Applications 207
Chapter 10: Publishing 225
Chapter 11: Digital Photography and Multimedia 239
Chapter 12: Games 255

Part III: The Internet Server 275
Chapter 13: Network Security 277
Chapter 14: E-Mail Servers 303
Chapter 15: Web Serving 335
Chapter 16: File Transfer Services 365
Chapter 17: The Domain Name System 393
Chapter 18: Remote Access 409

Part IV: The Intranet Server 425
Chapter 19: Workstation Network and Internet Access 427
Chapter 20: File Serving and Sharing 435
Chapter 21: OpenLDAP 459
Chapter 22: Intranet E-Mail Servers 475
Chapter 23: Printing Services 489
Chapter 24: Database Servers 513

Part V: The Developer 529
Chapter 25: The Debian Community 531
Chapter 26: Building Packages 545
Chapter 27: Debian Archives 583

Appendix A: What's on the CD-ROMs? 593
Appendix B: Debian Constitution 597

Index 611

Contents

Preface vii

Acknowledgments xi

Part I: The Fundamentals 1

Chapter 1: The Debian Project 3

The Components of a Software Distribution 4
Packages 4
The kernel 5
Other components 6
Architectures 7
Distributions and Releases 8
What Does Debian Do? 10
Linux and Its Pedigree 11
The Debian Project and Debian Community 13
The wider Free Software/Open Source community 13
The Debian Project's goals and people 14
Custom Debian distributions 16
Reasons for Choosing Debian 17
The breadth of software 17
The ease of administration 18
Your independence 19
Summary 20

Chapter 2: Installing Debian 21

A Quick Walk-Through of the Debian Installer 22
Configuring Your System 29
Installing Software 29
Summary 31

Chapter 3: Using the Shell and Filesystem 33

Filesystem Structure 34
Namespaces and trees 34
Flat namespaces versus trees 34
The GNU/Linux filesystem tree 35
Filesystem object types, permissions, and ownership 36
Users, groups, and ownership 38

Getting Started with Your Shell 41
Running commands 42
Using tab-completion 43
Reading documentation in the shell: manpages 44
Navigation and Pathnames 46
The current working directory 46
Relative pathnames 47
Virtual directories 48
Examining the Filesystem 49
Listing files and directories 49
Excruciating detail with stat 51
Shell Quoting and Escaping 51
Quoting 52
Escaping 52
Shell Wildcards and Globbing 53
Asterisks and question marks 54
Sequences 55
Character ranges and lists 56
Filesystem Manipulation 57
Creating directories 57
Removing files and directories 58
Moving and renaming files 58
Intermediate Shell Usage 61
Variables and variable substitution 62
Aliases 65
Command substitution 65
Redirection 66
Personalizing Your Shell 68
Summary 70

Chapter 4: Software Management 71

The Anatomy of a Software Package 71
Common package properties 71
Debian's packages 73
Package repositories 76
Package Management Tools 76
Finding and Examining Packages 77
Listing installed packages 78
Showing package details 82
Searching with apt-cache 83
Searching with aptitude 83
Searching using the Debian package Web site 84
Installing Packages 85
Installing packages using apt-get 85
Installing packages using aptitude 86

Removing and Purging Packages 89
Removing and purging packages using apt-get 89
Removing and purging packages using aptitude 90
Configuring and Configuration Files 91
Configuring packages using debconf 91
Configuration file handling 92
Upgrading Packages 94
Upgrading using apt-get 94
Upgrading using aptitude 95
Integrity-Checking Packages 95
Package Repositories and /etc/apt/sources.list 96
apt Pinning 96
Using selected packages from another release 97
/etc/apt/sources.list 97
apt-cache policy 97
/etc/apt/preferences 98
Installing from multiple distributions 99
Installing from a specific site 100
Installing (or keeping) a specific version 100
Summary 101

Chapter 5: Basic System Administration 103

User, Group, and root Account Management 104
The root account 104
Adding users and groups 109
Removing users and groups 111
Managing group membership 114
Basic Networking 115
The Internet Protocol 116
Mapping computer names to computer addresses 117
Network interfaces 120
Summary 123

Chapter 6: Performing Backups 125

Analyzing Backup Needs 126
Designing Your Backup Strategy 127
What to back up 127
Where to back up 129
When to back up 138
Testing your backup 139
Backup Fundamentals 139
Compression 140
Incremental backups 140
Network backups 141
Backing up in-use files 141

Backup Software 142
Using tar 142
Backing up to a hard drive with rsync 145
Using rdiff-backup 145
Using Amanda 149
Backing up with rsnapshot 151
Backing up with backuppc 155
File synchronization backups with Unison 160
Other software 162
Summary 162

Part II: The Linux Desktop 163

Chapter 7: Configuring Graphics and Sound 165

Introducing XFree86 166
Preparing to install XFree86 166
Installing and configuring XFree86 169
Testing and troubleshooting XFree86 172
Installing and Configuring Sound Drivers 174
Installing and configuring ALSA 174
Setting volume levels 175
Testing and troubleshooting sound drivers 175
Summary 176

Chapter 8: The KDE and GNOME Desktop Environments 177

The GNOME Desktop Environment 178
Installing GNOME 178
Using the GNOME desktop 183
Personalizing GNOME 191
The K Desktop Environment 196
Installing KDE 196
Using the K Desktop Environment 197
Personalizing the K Desktop Environment 202
Summary 206

Chapter 9: Internet Applications 207

Browsing the Web 207
Installing and using Epiphany 209
Installing and using Firefox 212
Installing and using Konqueror 215
Sending and Receiving E-Mail 217
Installing and configuring Evolution 218
Installing and configuring KMail 219
Installing and configuring Thunderbird 222

Instant Messaging with Gaim 223
Installing Gaim 223
Configuring Gaim 223
Using Gaim 224
Summary 224

Chapter 10: Publishing 225

Using Markup Languages 225
groff 226
TeX and LaTeX 227
HTML, SGML, and XML 227
Word Processing with OpenOffice.org 228
Installing OpenOffice.org 228
Using OpenOffice.org Writer 229
Exchanging documents with OpenOffice.org 232
Desktop Publishing with Scribus 233
Web Authoring with Quanta+ 234
Scanning and OCR 236
Installing SANE 237
Some SANE front ends 237
Summary 238

Chapter 11: Digital Photography and Multimedia 239

Using Digital Cameras with gPhoto2 239
The gPhoto2 shell 241
Graphical front ends for gPhoto2 242
Using Graphics Applications in Debian 243
The GIMP 243
Vector graphics with Inkscape 245
Using Debian for Sound 246
Applications requiring direct sound card access 247
Troubleshooting 248
The XMMS media player 248
MIDI 249
Using Debian for Video 250
The xine video player 251
Watching TV 252
Burning CDs and DVDs 252
Making videos of your own 253
Summary 254

Chapter 12: Games 255

Classic UNIX Games 255
Rogue-like games 256
Adventure games and interactive fiction 258

Emulators . . . 259
Sinclair Spectrum . . . 260
Atari 2600 . . . 261
Nintendo Entertainment System . . . 261
Commodore computers . . . 261
DOS games . . . 261
Windows games . . . 262
Games Designed for Linux . . . 266
Games for kids . . . 266
Puzzles and logic games . . . 268
Board games . . . 269
Strategy games . . . 270
Pydance . . . 271
Shoot-'em-ups . . . 271
A few more games . . . 272
Commercial Linux Games . . . 272
Summary . . . 273

Part III: The Internet Server 275

Chapter 13: Network Security . . . 277

A Theoretical Overview . . . 278
Granting Access: Identification, Authentication, Authorization, and Auditing . . . 278
Making sure the worst doesn't happen . . . 281
Making sure the worst isn't so bad . . . 283
Making sure you can recover . . . 284
Border security versus pervasive security . . . 284
Types of Attacks . . . 285
Security Tactics . . . 288
Isolation . . . 288
Fault tolerance . . . 290
Getting help . . . 290
Example Security Procedures . . . 293
The first line of defense: Your baseline system software and exemplary planning practices . . . 293
The second line of defense: Your firewall . . . 294
The third line of defense: Your daemons . . . 299
Summary . . . 302

Chapter 14: E-Mail Servers . . . 303

E-Mail Basics . . . 303
Standard e-mail composition . . . 304
E-mail transmission and reception . . . 308

The Exim Mail Transport Agent . . . 314
Configuring Exim . . . 315
The Exim configuration file . . . 319
Mail delivery with Exim . . . 328
Using virtual domains with Exim . . . 332
Other Mail Transport Agents . . . 333
Sendmail . . . 333
Postfix . . . 333
ssmtp . . . 334
Summary . . . 334

Chapter 15: Web Serving . . . 335

Apache . . . 335
Installing and Configuring Apache 1.3 . . . 337
Installing Apache 1.3 . . . 337
Configuring Apache 1.3 . . . 337
Installing and Configuring Apache 2.0 . . . 346
Installing Apache 2.0 . . . 346
Configuring Apache 2.0 . . . 348
Apache and Perl, Python, and PHP . . . 352
Using Perl with Apache . . . 352
Using Python with Apache . . . 355
Using PHP with Apache . . . 357
Serving Static Content with Boa . . . 360
Installing Boa . . . 361
Configuring Boa . . . 362
Summary . . . 364

Chapter 16: File Transfer Services . . . 365

Running an FTP Server . . . 365
Providing FTP Services with vsftpd . . . 368
Installing vsftpd . . . 368
Configuring vsftpd . . . 369
Running an FTP Server on ProFTPD . . . 375
Installing ProFTPD . . . 376
Configuring ProFTPD . . . 379
Examining the default configuration . . . 380
Advanced ProFTPD configuration . . . 384
Using Secure FTP . . . 390
Using SSH's sftp-server . . . 390
Summary . . . 391

Chapter 17: The Domain Name System . . . 393

DNS and BIND . . . 394
Primary and secondary DNS servers . . . 395
Surveying your network . . . 396

Installing BIND 397
Creating zone files 398
The secondary DNS server 403
Modifying resolv.conf 406
Testing your setup 407
Maintenance 407
Summary 408

Chapter 18: Remote Access 409

Remote Access in the Past 410
SSH—Secure Shell 411
Getting started 411
Authentication 413
Transferring files 415
The exciting world of port forwarding 416
X-Forwarding 420
General X-forwarding 421
Secure X-forwarding with SSH 422
VNC Graphical Remote Access 422
Summary 424

Part IV: The Intranet Server 425

Chapter 19: Workstation Network and Internet Access 427

Assigning Addresses with DHCP 427
Installing DHCP 428
Providing static IP addresses 429
Providing dynamic IP addresses 429
Assigning Addresses with radvd 430
Using Web Proxies to Speed Up Surfing 430
Virtual Private Networks 432
Using PPTP 432
Using IPsec 433
Summary 434

Chapter 20: File Serving and Sharing 435

Understanding Distributed Filesystems 435
Windows Networking with Samba 436
Installing Samba 437
Configuring Samba 437
Sharing Directories with Samba 441
UNIX File Repositories with NFS 445
Understanding NFS 446
Configuring the NFS server 448

Configuring an NFS client 454
Example NFS client 457
Summary 457

Chapter 21: OpenLDAP 459

What is OpenLDAP? 460
The OpenLDAP Data Model 461
Creating an OpenLDAP Server 462
Testing the installation 465
Adding entries to the database 466
Connecting to the Directory Server from Linux Systems 469
Using a Global Address Book 470
Summary 473

Chapter 22: Intranet E-Mail Servers 475

Providing E-Mail Services 475
Creating an IMAP E-Mail Server 478
Installing an IMAP4 server 478
Configuring an IMAP4 server 479
Configuring Exim to use Maildir 482
Testing the IMAP server 483
Setting Up a POP3 E-Mail Server 485
Installing a POP3 server 486
Testing the POP3 server 487
Summary 488

Chapter 23: Printing Services 489

What Are Printing Services? 489
Choosing a print service 490
Inside print spooling 490
Setting Up lpd and lpr 492
Configuring lpd and lpr 492
Testing your printer 493
Installing and Configuring CUPS 494
Using CUPS via the Web interface 494
Adding a printer from the Web interface 495
Using CUPS from the command line 499
Still not working? 501
Managing Printing 501
Starting and stopping the printer queues 502
Granting and restricting access to the printer 502
Accepting/rejecting print jobs 503
Making the printer the default printer 503
Setting the printer quota 503

Inside Printer Classes 505
Client Configuration 505
Automatic setup 506
Manual setup 506
Single-server printing 507
Multiple-server printing 507
Relay printing 508
Additional CUPS Configuration 508
Changing the directive 508
Modifying the client configuration 511
Summary 511

Chapter 24: Database Servers 513

Choosing a Server 514
Using PostgreSQL 514
Installing PostgreSQL 515
Creating databases and users 515
Configuring access rules 516
Testing access 519
Removing databases and users 520
Upgrading PostgreSQL 520
Backing up PostgreSQL 521
Using MySQL 521
Installing MySQL 521
Configuring MySQL 522
Creating databases 523
Interactive queries 523
Configuring users 523
Removing databases 526
Backing up databases 526
Client-Side Tools 527
Summary 527

Part V: The Developer 529

Chapter 25: The Debian Community 531

A Brief History of Debian 531
The Organization of the Debian Project 537
The project leader, delegates, and other officers 537
Software in the Public Interest, Inc. 537
Cathedrals and bazaars 537
Debian as a platform 538
Debian policy 539
Debian Developers 539
Bug Reporting 541
Summary 544

Chapter 26: Building Packages 545

Essential Tools 545
Non-Debian Packages 547
Packaging the Kernel 548
Rebuilding an Existing Package 552
Starting a Package from Scratch 554
Some additional packages 555
Creating the package infrastructure 555
The Debian Directory 556
The control file 556
The rules file 559
The changelog file 570
The copyright file 572
The compat file 573
Package scripts 573
The README.Debian file 573
The dirs file 574
The docs file 574
The menu file 574
The watch file 575
The Manpage 576
doc-base 576
conffiles 576
Other minor files 576
Building the Package 577
Signing the package 579
Quality control 579
Putting it all together 581
Creating Dummy Packages 581
Summary 582

Chapter 27: Debian Archives 583

Hosting an Open Source Project 583
SourceForge 584
Alioth 585
Mentors.debian.net 586
Savannah 586
BerliOs 586
Setting Up a Package Archive 586
A simple archive 587
A complex archive 588
A Debian-style archive 589
The Release file 590
Announcing Your Packages 592
Summary 592

Appendix A: What's on the CD-ROMs? 593

Appendix B: Debian Constitution 597

Index 611
