# Heat-Transfer Calculations

MYER KUTZ

- Heat-exchanger calculations
- Thermal properties of solid materials
- Conduction heat transfer

---

# Contents

Contributors xiii

Preface xvii

## **Part 1    Introductory Calculations** **1.1**

**Chapter 1. Multiphase Films and Phase Change** **1.3**  
Greg F. Naterer

**Chapter 2. Industrial Heat-Transfer Calculations** **2.1**  
Mohammad G. Rasul

## **Part 2    Steady-State Calculations** **3.1**

**Chapter 3. Heat-Transfer and Temperature Results for a Moving Sheet Situated in a Moving Fluid** **3.3**  
John P. Abraham and Ephraim M. Sparrow

**Chapter 4. Solution for the Heat-Transfer Design of a Cooled Gas Turbine Airfoil** **4.1**  
Ronald S. Bunker

**Chapter 5. Steady-State Heat-Transfer Problem: Cooling Fin** **5.1**  
David R. Dearth

**Chapter 6. Cooling of a Fuel Cell** **6.1**  
Jason M. Keith

**Chapter 7. Turbogenerator Rotor Cooling Calculation** **7.1**  
James T. McLeskey, Jr.

**Chapter 8. Heat Transfer through a Double-Glazed Window** **8.1**  
P. H. Oosthuizen and David Naylor

## **Part 3    Transient and Cyclic Calculations** **9.1**

**Chapter 9. Use of Green's Function to Solve for Temperatures in a Bimaterial Slab Exposed to a Periodic Heat Flux Applied to Corrosion Detection** **9.3**  
Larry W. Byrd

<b>Chapter 10. Lumped-Capacitance Model of a Tube Heated by a Periodic Source with Application to a PDE Tube</b>	
Larry W. Byrd, Fred Schauer, John L. Hoke, and Royce Bradley	10.1
<b>Chapter 11. Calculation of Decoking Intervals for Direct-Fired Gas and Liquid Cracking Heaters</b>	
Alan Cross	11.1
<b>Chapter 12. Transient Heat-Transfer Problem: Tape Pack Cooling</b>	
David R. Dearth	12.1
<b>Chapter 13. Calculation of the Transient Response of a Roof to Diurnal Heat Load Variations</b>	
Jack M. Kleinfeld	13.1
<b>Chapter 14. Transient Heating of a Painted Vehicle Body Panel in an Automobile Assembly Plant Paint Shop Oven</b>	
Thomas M. Lawrence and Scott Adams	14.1
<b>Chapter 15. Thermal System Transient Response</b>	
James E. Marthinuss, Jr., and George Hall	15.1
<b>Chapter 16. Thermal Response of Laminates to Cyclic Heat Input from the Edge</b>	
Wataru Nakayama	16.1
<b>Chapter 17. A Simple Calculation Procedure for Transient Heat and Mass Transfer with Phase Change: Moist Air Example</b>	
Pedro J. Mago and S. A. Sherif	17.1
<b>Chapter 18. A Calculation Procedure for First- and Second-Law Efficiency Optimization of Refrigeration Cycles</b>	
J. S. Tiedeman and S. A. Sherif	18.1
<b>Chapter 19. Transient Analysis of Low Temperature, Low Energy Carrier (LoTEC®)</b>	
Francis C. Wessling	19.1
<b>Chapter 20. Parameter Estimation of Low Temperature, Low Energy Carrier (LoTEC®)</b>	
Francis C. Wessling and James J. Swain	20.1
<b>Part 4 Heat-Transfer-Coefficient Determination</b>	<b>21.1</b>
<b>Chapter 21. Calculation of Convective Heat-Transfer Coefficient Using Semi-infinite Solid Assumption</b>	
Srinath V. Ekkad	21.3

<b>Chapter 22. Determination of Heat-Transfer Film Coefficients by the Wilson Analysis</b>	
Ronald J. Willey	22.1
<b>Part 5 Tubes, Pipes, and Ducts</b>	<b>23.1</b>
<b>Chapter 23. Calculation of Local Inside-Wall Convective Heat-Transfer Parameters from Measurements of Local Outside-Wall Temperatures along an Electrically Heated Circular Tube</b>	
Afshin J. Ghajar and Jae-yong Kim	23.3
<b>Chapter 24. Two-Phase Pressure Drop in Pipes</b>	
S. Dyer Harris	24.1
<b>Chapter 25. Heat-Transfer Calculations for Predicting Solids Deposition in Pipeline Transportation of "Waxy" Crude Oils</b>	
Anil K. Mehrotra and Hamid O. Bidmus	25.1
<b>Chapter 26. Heat Transfer in a Circular Duct</b>	
Nicholas Tiliakos	26.1
<b>Part 6 Heat Exchangers</b>	<b>27.1</b>
<b>Chapter 27. Air Cooling of a High-Voltage Power Supply Using a Compact Heat Exchanger</b>	
Kirk D. Hagen	27.3
<b>Chapter 28. Energy Recovery from an Industrial Clothes Dryer Using a Condensing Heat Exchanger</b>	
David Naylor and P. H. Oosthuizen	28.1
<b>Chapter 29. Sizing of a Crossflow Compact Heat Exchanger</b>	
Dusan P. Sekulic	29.1
<b>Chapter 30. Single-Phase Natural Circulation Loops: An Analysis Methodology with an Example (Numerical) Calculation for an Air-Cooled Heat Exchanger</b>	
Daniel M. Speyer	30.1
<b>Chapter 31. Evaluation of Condensation Heat Transfer in a Vertical Tube Heat Exchanger</b>	
Karen Vierow	31.1
<b>Chapter 32. Heat-Exchanger Design Using an Evolutionary Algorithm</b>	
Keith A. Woodbury	32.1

<b>Part 7 Fluidized Beds</b>	<b>33.1</b>
Chapter 33. Fluidized-Bed Heat Transfer Charles J. Coronella and Scott A. Cooper	33.3
<b>Part 8 Parameter and Boundary Estimation</b>	<b>34.1</b>
Chapter 34. Estimation of Parameters in Models Ashley F. Emery	34.3
Chapter 35. Upper Bounds of Heat Transfer from Boxes Wataru Nakayama	35.1
Chapter 36. Estimating Freezing Time of Foods R. Paul Singh	36.1
<b>Part 9 Temperature Control</b>	<b>37.1</b>
Chapter 37. Precision Temperature Control Using a Thermoelectric Module Marc Hodes	37.3
<b>Part 10 Thermal Analysis and Design</b>	<b>38.1</b>
Chapter 38. Thermal Analysis of a Large Telescope Mirror Nathan E. Dalrymple	38.3
Chapter 39. Thermal Design and Operation of a Portable PCM Cooler R. Letan and G. Ziskind	39.1
Chapter 40. A First-Order Thermal Analysis of Balloon-Borne Air-Cooled Electronics Angela Minichiello	40.1
Chapter 41. Thermal Analysis of Convectively Cooled Heat-Dissipating Components on Printed-Circuit Boards Hyunjae Park	41.1
Chapter 42. Design of a Fusion Bonding Process for Fabricating Thermoplastic-Matrix Composites F. Yang and R. Pitchumani	42.1

**Part 11 Economic Optimization 43.1**

**Chapter 43. Economic Optimization of Heat-Transfer Systems 43.3**  
Thomas M. Adams

**Chapter 44. Turkey Oven Design Problem 44.1**  
Jason M. Keith

**Index follows Chapter 44**
