

*Third Edition*

*An Introduction to* **VIDEO**  
*and* **AUDIO** *Measurement*

*Peter Hodges*

# CONTENTS

Preface	ix
Acknowledgements	xi
Introduction	xiii
<b>Part One: The Foundation</b>	<b>1</b>
<b>1. Circuits and signals</b>	<b>3</b>
Sending signals	3
Source and destination	6
Receiving a signal	7
Terminating the cable	7
Creating a standard	9
Cable and wireless circuits	10
Where next?	12
<b>2. Time and the complex signal</b>	<b>14</b>
Converting to an electric signal	18
The concept of time	19
Bandwidth	22
How about digitising?	26
<b>3. What is video?</b>	<b>28</b>
Sending pictures	28
The video system	30
The timebase	36
The video waveform	37
<b>4. Measuring video</b>	<b>41</b>
Black level	44
The waveform monitor	45
Timing and system sync	48
Scopes versus WFMs	54
New display methods	56
Using the WFM	57
<b>5. Adding colour</b>	<b>58</b>
Colour components	58
Colour bars	61

Transmitting pictures and composite video	64
The colour burst	65
Colour and vectors	65
NTSC and PAL	70
Phase errors	70
The vectorscope	71
The end of PAL and NTSC?	72
<b>6. New technology</b>	<b>75</b>
Two-circuit component	75
The component standard	75
What is digital?	76
4:2:2 ... and all that!	78
Why digital?	79
The synchroniser	79
Sending digits	80
Measurement of digital video	83
Compression	84
JPEG and MPEG	85
The quest for quality	86
<b>Part Two: In Practice</b>	<b>89</b>
<b>7. First steps—the camera</b>	<b>91</b>
Terminations	91
Camera colour bars	96
The picture	102
Colour balance	107
Sensitivity and exposure	109
Adjustments and simple checks	112
Menus and digital cameras	114
A footnote ...	115
<b>8. The studio</b>	<b>118</b>
Signal levels	118
Timing	119
Composite colour timing	123
Mixer timing procedure	126
Installing a remote camera	131
The greyscale	132
Light level	133
Camera control	134
Engineering	136
And the digital studio?	137
Digital timing	138

<b>9. Recording</b>	140
Analogue and generation loss	140
Setting up to edit	142
Examples of digital tape standards	147
<b>10. Distortions and test signals</b>	149
Linearity and phase distortion	150
DC errors	152
Frequency distortion	154
Pulse and bar	156
Further points about test signals	156
Calibration	159
Comparing signal to signal	159
<b>11. Digital specialities</b>	163
Bowtie and lightning	163
Checking gamut with arrowhead	163
Eye display—the circuit tester	164
EDH and CRC	166
Portable instrumentation	166
<b>12. Using the picture</b>	168
Setting up the picture	168
Using the picture	169
Measuring with Vical	170
The in-picture waveform	171
<b>13. More on pictures</b>	173
The Good Picture	173
Screen appeal	173
Contrast and gamma, and beyond	174
Measuring the screen	175
Screen types	178
More on colour bars	180
Video is like film	181
How big is the picture?	182
A story of lost colour	184
The bad picture	185
<b>14. Introducing audio</b>	186
VU versus PPM	188
Tone, the audio test signal	189
Equalisation and compression	195
Microphones	197
Audio connectors	198
Sound levels	199

<b>15. Hints, tips and hang-ups</b>	<b>200</b>
A simple meter	200
Using headphones	200
Digital dithers	200
Domestic bliss	202
Brain teasers	202
<b>And Finally ...</b>	<b>204</b>
Appendix	205
Glossary	220
Bibliography	226
Index	227
