

SECOND EDITION

# Fundamentals of **Soil Ecology**

David C. Coleman  
D. A. Crossley, Jr.  
Paul F. Hendrix

# Contents

Preface to the Second Edition xi  
Preface to the First Edition xiii

## 1 Historical Overview of Soils and the Fitness of the Soil Environment 1

The Historical Background of Soil Ecology 1  
Water as a Constituent of Soil 4  
Elemental Constitution of Soil 9  
How Soils Are Formed 9  
Profile Development 11  
Soil Texture 13  
Clay Mineral Structure 15  
Soil Structure 16  
Soils as Suppliers of Ecosystem Services 20  
Summary 20

## 2 Primary Production Processes in Soils: Roots and Rhizosphere Associates 23

Introduction 23  
The Primary Production Process 23  
Methods of Sampling 25  
    *Destructive Techniques* 25  
        The Harvest Method 25  
        Isotope-Dilution Method 28  
        Root-Ingrowth Technique 28  
    *Nondestructive Techniques* 30  
Additional Sources of Primary Production 34  
Symbiotic Associates of Roots 34  
Mycorrhizal Structure and Function 36

<b>Ecosystem-Level Consequences of ECM Function</b>	<b>37</b>
<b>Actinorhiza</b>	<b>38</b>
<b>Carbon Allocation in the Root/Rhizosphere</b>	<b>38</b>
<b>Carbon Allocation Costs of Development and Maintenance of Symbiotic Associations with Roots</b>	<b>42</b>
<b>Future Directions for Research on Roots and Mycorrhizal Function and Biodiversity</b>	<b>44</b>
<b>Summary</b>	<b>46</b>

### **3 Secondary Production: Activities of Heterotrophic Organisms—Microbes 47**

<b>Introduction</b>	<b>47</b>
<b>Compounds Being Decomposed</b>	<b>48</b>
<b>Microbial Activities in Relation to Catabolism in Soil Systems</b>	<b>48</b>
<i>Microbial Abundance and Distribution in Soil</i>	<i>53</i>
<b>Techniques for Measuring Microbial Communities</b>	<b>57</b>
<i>Direct Measures of Numbers and Biomass</i>	<i>57</i>
<i>Indirect Measures of Biomass</i>	<i>59</i>
<b>Chemical Methods</b>	<b>59</b>
The Chloroform Fumigation and Incubation (CFI) Technique	59
The Chloroform Fumigation and Extraction (CFE) Technique	60
Physiological Methods: SIR Technique	61
Additional Physiological Methods of Measuring Microbial Activity	61
Enzyme Assays and Measures of Biological Activities in Soils	63
<i>Direct Methods of Determining Soil Microbial Activity</i>	<i>66</i>
<b>Soil Sterilization and Partial Sterilization Techniques</b>	<b>67</b>
<b>Conceptual Models of Microbes in Soil Systems</b>	<b>67</b>
<i>Root-Rhizosphere Microbe Models and Experiments</i>	<i>67</i>
<i>Soil Aggregation Models</i>	<i>69</i>
<i>Models: Organism and Process-Oriented</i>	<i>74</i>
<b>Summary</b>	<b>77</b>

### **4 Secondary Production: Activities of Heterotrophic Organisms—The Soil Fauna 79**

<b>Introduction</b>	<b>79</b>
<b>The Microfauna</b>	<b>83</b>

<b><i>Methods for Extracting and Counting Protozoa</i></b>	<b>86</b>
<b><i>Distribution of Protozoa in Soil Profiles</i></b>	<b>87</b>
<b><i>Impacts of Protozoa on Ecosystem Function</i></b>	<b>87</b>
<b>The Mesofauna</b>	<b>89</b>
<b><i>Rotifera</i></b>	<b>89</b>
Features of Body Plan and General Ecology	89
<b><i>Nematoda</i></b>	<b>90</b>
Nematode Feeding Habits	90
Nematode Zones of Activity in Soil	93
Nematode Extraction Techniques	94
<b><i>Tardigrada</i></b>	<b>95</b>
<b><i>Microarthropods</i></b>	<b>98</b>
Collembola	101
Families of Collembola	103
Population Growth and Reproduction	107
Collembolan Feeding Habits	107
Collembolan Impacts on Soil Ecosystems	108
<b><i>Acari (Mites)</i></b>	<b>109</b>
Oribatid Mites	111
Abundance and Diversity of Oribatid Mites	114
Population Growth	116
Oribatid Feeding Habits	116
Oribatid Impacts on Soil Ecosystems	119
Prostigmatic Mites	119
Mesostigmatic Mites	122
Astigmatic Mites	124
<b><i>Other Microarthropods</i></b>	<b>128</b>
Protura	128
Diplura	129
Microcoryphia	130
Pseudoscorpionida	130
Symphyla	131
Pauropoda	133
<b><i>Enchytraeidae</i></b>	<b>133</b>
<b>The Macrofauna</b>	<b>141</b>
<b><i>Macroarthropods</i></b>	<b>141</b>
Importance of the Macroarthropods	141
Isopoda	143
Diplopoda	145
Chilopoda	146
Scorpionida	147
Araneae	149
Opiliones	151
Solifugae	152

Uropygi	152
The Pterygote Insects	153
Coleoptera	154
Hymenoptera	159
Diptera	161
Isoptera	162
Other Pterygota	166
Gastropoda	167
Sampling Techniques for Gastropods	168
<i>Oligochaeta—Earthworms</i>	169
Earthworm Distribution and Abundance	170
Biology and Ecology	171
Influence on Soil Processes	176
Earthworm Management	178
Earthworm Sampling and Identification	179
General Attributes of Fauna in Soil Systems	181
Faunal Feedbacks on Microbial Community Composition and Diversity	182
Summary	184
<b>5</b>	<b>Decomposition and Nutrient Cycling</b>
	<b>187</b>
Introduction	187
Integrating Variables	188
Resource Quality, Climate, and Litter Breakdown	190
Dynamics of Litter Breakdown	192
Direct Measurement of Litter Breakdown	194
Patterns of Mass Loss During Decomposition	201
Effects of Fauna on Litter Breakdown Rates	204
Nutrient Movement During Decomposition	206
Nutrient Cycling Links in Soil Systems	215
Role of Soil Fauna in Organic Matter Dynamics and Nutrient Turnover	216
Faunal Impacts in Applied Ecology—Agroecosystems	220
Applied Ecology in Forested Ecosystems	222
Summary	225
<b>6</b>	<b>Soil Food Webs: Detritivory and Microbivory in Soils</b>
	<b>227</b>
Introduction	227
Physiological Ecology of Soil Organisms	229

---

<b>Energy Available for Detrital Food Chains and Webs</b>	<b>231</b>
<b>Arenas of Interest</b>	<b>236</b>
<b>A Hierarchical Approach to Organisms in Soils</b>	<b>237</b>
<b>Future Research Prospects</b>	<b>241</b>
<b>Summary</b>	<b>246</b>

## **7 Soil Biodiversity and Linkages to Soil Processes 247**

<b>Introduction</b>	<b>247</b>
<b>Biodiversity in Soils and Its Impacts on Terrestrial Ecosystem Function</b>	<b>247</b>
<b>Heterogeneity of Carbon Substrates and Effects on Soil Biodiversity</b>	<b>259</b>
<b>Impacts of Species Richness on Ecosystem Function</b>	<b>259</b>
<b>Models, Microcosms, and Soil Biodiversity</b>	<b>263</b>
<b>Experimental Additions and Deletions in Soil Biodiversity Studies</b>	<b>265</b>
<b>Problems of Concern in Soil Biodiversity Studies</b>	<b>266</b>
<b>Why Is Soil Diversity So High?</b>	<b>269</b>
<b>Biogeographical Trends in Diversity of Soil Organisms</b>	<b>269</b>

## **8 Future Developments in Soil Ecology 271**

<b>Introduction</b>	<b>271</b>
<b>Roles of Soils in Carbon Sequestration</b>	<b>271</b>
<b>Roles of Soils in the Global Carbon Cycle</b>	<b>275</b>
<b>Problems in Modeling Soil Carbon Dynamics</b>	<b>279</b>
<b>Biological Interactions in Soils and Global Change</b>	<b>281</b>
<b>Ecology of Invasive Species in Soil Systems: An Increasing Problem in Soil Ecology</b>	<b>285</b>
<b>Soils and "Gaia": Possible Mechanisms for Evolution of "the Fitness of the Soil Environment?"</b>	<b>289</b>
<b>Soil Ecology in the Third Millennium</b>	<b>293</b>

## **9 Laboratory and Field Exercises in Soil Ecology 299**

<b>Introduction</b>	<b>299</b>
<b>Minirhizotron Studies</b>	<b>299</b>
Principle	299

Description of a Minirhizotron	299
Installation of the Minirhizotrons	300
Observation and Recording	300
Getting Data from the Videotape	300
Tracing Technique	300
Automated Root Length Measures	301
<b>Soil Respiration Studies</b>	<b>301</b>
Principle	301
Materials and Supplies Needed	301
Procedure	302
Calculations	302
<b>Litter Decomposition Studies</b>	<b>303</b>
Principle	303
Litterbag Construction	304
Calculations	305
<b>Analyses for Soil Microbial Biomass</b>	<b>305</b>
<i>The Chloroform-Fumigation <math>K_2SO_4</math>-Extraction Method</i>	<b>305</b>
Principle	305
Preparation and Handling of Potassium Sulfate	306
Sample Preparation	306
Potassium Sulfate Extractions	306
Chloroform Fumigation	306
Chloroform Removal	307
Calculations	307
<b>Sampling and Enumeration of Nematodes</b>	<b>308</b>
Principle	308
Sampling Considerations	308
Sampling Tool and Precautions	309
<i>Nematode Extraction: Baermann Funnel Method</i>	<b>309</b>
Principle	309
Materials and Supplies Needed	310
Procedure	310
<i>Killing and Fixing Nematodes with Hot and Cold Formalin (5%)</i>	<b>311</b>
Materials and Supplies Needed	311
Procedure	311
<b>Sampling and Enumeration of Microarthropods</b>	<b>311</b>
Principle	311
<i>Methods for the Study of Microarthropods</i>	<b>312</b>
Sampling	312
Extraction of Microarthropods from Samples	313
Sample Sorting and Identification	315

**Sampling and Enumeration of Macroarthropods 317**

Principle 317

***Methods for Sampling Macroarthropods 317***

Sampling 317

Berlese or Tullgren Extraction 318

Flotation 318

Emergence Traps 318

Pitfall Trapping 318

**Sampling and Enumeration of Earthworms 320**

Principle 320

***Collection of Earthworms 320***

Passive Techniques 320

Behavioral Techniques 320

Indirect Techniques 323

***Identification of Earthworms 323*****Sampling and Enumeration of Enchytraeids 323**

Principle 323

***Collection of Enchytraeids 324******Identification of Enchytraeids 325*****References 327****Index 375**
