

# Biological Nutrient Removal (BNR) Operation in Wastewater Treatment Plants

WATER ENVIRONMENT FEDERATION (WEF)  
AMERICAN SOCIETY OF CIVIL ENGINEERS (ASCE)  
ENVIRONMENTAL AND WATER RESOURCE INSTITUTE (EWRI)

# Contents

Preface .....	xliii
<b>Chapter 1 Introduction .....</b>	<b>.1</b>
<b>Chapter 2 Overall Process Considerations</b>	
Introduction .....	.6
Nutrient Sources .....	.8
Sources of Nitrogen .....	.8
Source of Phosphorus .....	.9
Effects of Nutrients on Receiving Waters .....	.12
Eutrophication .....	.12
Ammonia Toxicity .....	.12
Nitrate in Groundwater .....	.13
Wastewater Characteristics .....	.13
Carbonaceous Materials .....	.13
Nitrogen .....	.16
Phosphorus .....	.20
Solids .....	.21
Temperature .....	.23
pH .....	.24
Alkalinity .....	.24
Variations in Flows and Loads .....	.25
Effect of Recycle Flows .....	.27

## Contents

Review of Recycle Flows .....	27
Management of Return Flows .....	28
Effect of Effluent Permit Requirements .....	29
Technology-Based Permits .....	29
<i>Monthly Average</i> .....	29
<i>Annual Average</i> .....	30
<i>Seasonal Permit</i> .....	30
Water-Quality-Based Permit .....	30
References .....	31

## Chapter 3 Nitrification and Denitrification

Introduction .....	35
Wastewater Characteristics .....	35
Assimilation .....	35
Hydrolysis and Ammonification .....	35
Nitrifier Growth Rate .....	37
Nitrification .....	37
Process Fundamentals .....	37
Stoichiometry .....	37
Nitrification Kinetics .....	38
<i>Biomass Growth and Ammonium Use</i> .....	38
<i>Wastewater Temperature</i> .....	41
<i>Dissolved Oxygen Concentration</i> .....	42
<i>pH and Alkalinity</i> .....	42
<i>Inhibition</i> .....	43
<i>Flow and Load Variations</i> .....	43
Suspended-Growth Systems .....	43
General .....	43
Determining the Target $SRT_{\text{aerobic}}$ .....	50
Example 3.1—Single Sludge Suspended-Growth Nitrification .....	51
Single Sludge Systems .....	52
Separate Sludge Systems .....	53

Attached Growth Systems .....	55
<i>General</i> .....	55
<i>Trickling Filter</i> .....	57
<i>Rotating Biological Contactors</i> .....	62
<i>Biological Aerated Filter</i> .....	65
Coupled Systems .....	67
Denitrification .....	68
Process Fundamentals .....	68
Stoichiometry .....	70
Denitrification Kinetics—Biomass Growth and Nitrate Use .....	71
Example 3.2—Single Sludge Suspended-Growth Postdenitrification ..	73
Carbon Augmentation .....	74
Separate-Stage Denitrification .....	75
<i>Suspended-Growth Systems</i> .....	75
<i>Attached-Growth Systems</i> .....	76
Denitrification Filter .....	76
Moving Bed Biofilm Reactor .....	77
Combined Nitrification and Denitrification Systems .....	78
Basic Considerations .....	78
Suspended-Growth Systems .....	78
<i>Wuhrmann Process</i> .....	79
<i>Modified Ludzack-Ettinger Process</i> .....	79
<i>Bardenpho Process (Four-Stage)</i> .....	82
<i>Sequencing Batch Reactors</i> .....	84
<i>Cyclically Aerated Activated Sludge</i> .....	86
<i>Oxidation Ditch Processes</i> .....	86
<i>Countercurrent Aeration</i> .....	87
Hybrid Systems .....	87
Introduction .....	87
Integrated Fixed-Film Activated Sludge .....	87
<i>Descriptions of Integrated Fixed-Film Activated Sludge Processes</i> .....	88
Rope-Type Media .....	88

## Contents

Sponge-Type Media .....	90
Plastic Media .....	90
Rotating Biological Contactors .....	92
<i>Operational Issues</i> .....	92
Rope-Type Media .....	92
Media Location .....	92
GROWTH .....	92
KINETIC RATE .....	92
Worms .....	93
Media Breakage .....	93
Adequate Dissolved Oxygen Level .....	94
Mixing .....	94
Access To Diffusers .....	94
Odor .....	94
Sponge Media .....	94
Screen Clogging .....	94
Sinking Sponges .....	95
Loss of Sponges .....	95
Taking Tank Out of Service .....	96
Loss of Solids .....	96
Air Distribution System .....	96
Plastic Media .....	96
Startup Procedures .....	96
Growth .....	97
Worms .....	97
Media Breakage .....	97
Media Mixing .....	97
Accumulation of Growth .....	97
SCREEN CLOGGING .....	97
FOAMING .....	98
TAKING TANK OUT OF SERVICE .....	98
Membrane Bioreactor .....	98

Secondary Clarification .....	100
Suspended Growth .....	100
<i>Denitrification</i> .....	101
<i>Flocculation Problem 1</i> .....	101
<i>Flocculation Problem 2</i> .....	101
<i>High Sludge Blanket</i> .....	101
<i>Hydraulic Problem</i> .....	102
Attached Growth .....	102
References .....	102

## Chapter 4 Enhanced Biological Phosphorus Removal

Introduction and Basic Theory of Enhanced Biological Phosphorus Removal .....	106
Phosphorus Removal .....	106
Basic Enhanced Biological Phosphorus Removal Theory .....	107
Basic Enhanced Biological Phosphorus Removal Design Principles .....	108
Operational Parameters .....	113
Influent Composition and Chemical-Oxygen-Demand-to-Phosphorus Ratio .....	113
Solids Retention Time and Hydraulic Retention Time .....	117
Temperature .....	122
Recycle Flows .....	127
<i>Internal Recycles</i> .....	127
<i>Plant Recycles</i> .....	129
Types of Enhanced Biological Phosphorus Removal Systems .....	129
Suspended-Growth Systems .....	130
<i>Anaerobic/Oxic and Anaerobic/Anoxic/Oxic Configurations</i> .....	130
<i>Modified Bardenpho Configuration</i> .....	132
<i>University of Cape Town, Modified University of Cape Town, and Virginia Initiative Process Configurations</i> .....	133
<i>Johannesburg Configuration</i> .....	135
<i>Oxidation Ditches, BioDenipho, and VT2 Configurations</i> .....	136
Hybrid Systems .....	138
<i>PhoStrip Configuration</i> .....	138

## Contents

<i>Biological Chemical Phosphorus and Nitrogen Removal Configuration</i> . . . . .	139
Process Control Methodologies . . . . .	140
Influent Carbon Augmentation . . . . .	140
<i>Volatile Fatty Acid Addition</i> . . . . .	140
<i>Pre-Fermentation</i> . . . . .	140
Solids Separation and Sludge Processing . . . . .	143
Chemical Polishing and Effluent Filtration . . . . .	144
Case Studies . . . . .	146
The Lethbridge Wastewater Treatment Plant, Alberta, Canada . . . . .	146
Durham, Tigard, Oregon, Clean Water Services . . . . .	148
Unique New Designs . . . . .	149
<i>McAlpine Creek Wastewater Management Facility of Charlotte, North Carolina</i> . . . . .	150
<i>Traverse City Regional Wastewater Treatment Plant, Traverse City, Michigan</i> . . . . .	150
References . . . . .	153

## Chapter 5 Combined Nutrient Removal Systems

Combined Nitrogen and Phosphorus Removal Processes . . . . .	162
Flow Sheets for Combined Nutrient Removal . . . . .	162
The Five-Stage Bardenpho Process . . . . .	165
Phoredox (A <sup>2</sup> /O) Process . . . . .	166
The University of Cape Town and Virginia Initiative Processes . . . . .	166
Modified University of Cape Town Process . . . . .	168
Johannesburg and Modified Johannesburg Processes . . . . .	168
Westbank Process . . . . .	169
The Orange Water and Sewer Authority Process . . . . .	171
Phosphorus Removal Combined with Channel-Type Systems . . . . .	171
Cyclical Nitrogen and Phosphorus Removal Systems . . . . .	173
General Remarks about the Various Process Configurations . . . . .	174
Interaction of Nitrates and Phosphorus in Biological Nutrient Removal Plants . . . . .	178
Process Control Methodologies . . . . .	182
Effect of Oxygen . . . . .	182

Temperature Effects .....	183
pH Effects .....	184
Sufficient Dissolved Oxygen in the Aeration Zone .....	185
Chemical Oxygen Demand to Total Kjeldahl Nitrogen Ratio .....	186
Selection of Aeration Device .....	187
Clarifier Selection .....	187
Effect of Chemical Phosphorus Removal on Biological Nutrient Removal Systems .....	189
Primary Clarifiers .....	189
Secondary Clarifiers .....	190
Tertiary Filters .....	190
Process Selection for Combined Nitrogen and Phosphorus Removal ....	192
Effluent Requirements .....	192
Phosphate Removal but No Nitrification .....	192
Phosphate Removal with Nitrification but No Denitrification .....	193
Phosphate Removal with Nitrification Only in Summer .....	194
High-Percentage Nitrogen and Phosphate Removal .....	195
Benefits from Converting to Biological-Nutrient-Removal-Type Operation .....	196
Reliable Operation .....	196
Restoring Alkalinity .....	198
Improving the Alpha Factor .....	199
Improving Sludge Settleability .....	199
Troubleshooting Biological Nutrient Removal Plants .....	202
Plant not Designed for Nitrification but Nitrification in Summer Causes Problems .....	202
<i>Problem</i> .....	203
<i>Correction</i> .....	203
<i>Problem</i> .....	203
<i>Correction</i> .....	203
<i>Problem</i> .....	203
<i>Correction</i> .....	203

## Contents

Plant Designed for Nitrification but No Denitrification . . . . .	203
<i>Problem</i> . . . . .	203
<i>Correction</i> . . . . .	203
<i>Problem</i> . . . . .	203
<i>Correction</i> . . . . .	203

Greenville Utilities Commission Wastewater Treatment Plant, North Carolina .....	221
<i>Facility Design</i> .....	221
<i>Effluent Limits</i> .....	221
<i>Wastewater Characteristics</i> .....	221
<i>Performance</i> .....	222
Virginia Initiative Plant, Norfolk .....	222
<i>Facility Design</i> .....	222
<i>Effluent Limits</i> .....	222
<i>Wastewater Characteristics</i> .....	222
<i>Performance</i> .....	222
References .....	223

## Chapter 6 Models for Nutrient Removal

Introduction .....	227
History and Development of Models for Biological Nutrient Removal ..	227
Description of Models .....	228
Mechanistic Models .....	228
Simulators .....	228
Use of Simulators for Plant Operation .....	230
Ease of Use .....	230
Developing Data for Model Input .....	230
Using Simulators to Troubleshoot .....	231

Reference .....232

## Chapter 7 Sludge Bulking and Foaming

Introduction .....233

Microscopic Examination .....234

Filamentous Bulking .....236

Process Control for Filamentous Bulking Problems .....239

    Dissolved Oxygen .....239

    Nutrient Balance .....240

    pH .....241

    Chemical Addition .....241

*Chlorination* .....241

*Biological Selectors* .....242

*Nonfilamentous Bulking* .....243

Troubleshooting Sludge Bulking Problems .....243

Foaming Problems and Solutions .....243

*Stiff White Foam* .....247

*Excessive Brown Foam and Dark Tan Foam* .....247

*Dark Brown Foam* .....247

*Very Dark or Black Foam* .....247

*Filamentous Foaming* .....247

Conclusion .....248

References .....248

## Chapter 8 Chemical Addition and Chemical Feed Control

Introduction .....256

Carbon Supplementation for Denitrification .....257

    Methanol Addition .....257

*Methanol Addition to Activated Sludge Biological Nutrient Removal Processes* .259

*Methanol Addition to Tertiary Denitrification Processes* .....263

*Methanol Feed Control* .....265

            Manual Control .....265

            Flow-Paced Control .....265

## Contents

Feed-Forward Control .....	265
Feed-Forward and Feedback with Effluent Concentration Control ..	266
Alternate Carbon Sources for Denitrification .....	266
Case Studies .....	268
<i>Havelock Wastewater Treatment Plant, Havelock, North Carolina</i> .....	268
<i>Long Creek Wastewater Treatment Plant, Gastonia, North Carolina</i> .....	269
Volatile Fatty Acid Supplementation for Biological Phosphorus Removal	271
Acetic Acid .....	273
Alternate Chemical Volatile Fatty Acid Sources .....	274
Case Study: McDowell Creek Wastewater Treatment Plant, Charlotte, North Carolina .....	274
<i>Effect of Dewatering Filtrate</i> .....	275
<i>Optimization of Chemical Dosages</i> .....	275
Alkalinity Supplementation .....	277
Alkalinity .....	277
Alkalinity Supplementation .....	279
<i>Sodium Hydroxide</i> .....	279
<i>Calcium Hydroxide</i> .....	281
<i>Quicklime</i> .....	281
<i>Magnesium Hydroxide</i> .....	282
<i>Sodium Carbonate</i> .....	282
<i>Sodium Bicarbonate</i> .....	282
Alkalinity Considerations .....	282
<i>Usable Alkalinity</i> .....	282
<i>Volatile Fatty Acids and Other Alkalinity</i> .....	283
<i>Alkalinity Measurement</i> .....	284
<i>High-Purity-Oxygen Activated Sludge</i> .....	284
<i>Phosphorus Precipitation</i> .....	285
Practical Examples .....	285
<i>Example 1</i> .....	285
Step 1 .....	285

Step 2 .....	285
<i>Example 2</i> .....	286
Step 1 .....	286
Step 2 .....	286
<i>Example 3</i> .....	287
Step 1 .....	287
Step 2 .....	287
Phosphorus Precipitation .....	288
Iron Compound Chemical Addition .....	290
Aluminum Compound Chemical Addition .....	297
Lime Addition .....	303
Other Options for Chemical Precipitation of Phosphorus .....	305
Chemical Feed Control .....	306
Case Study: Northwest Cobb Water Reclamation Facility, Cobb County, Georgia .....	306
Chemical Feed System Design and Operational Considerations .....	309
References .....	311

## Chapter 9 Sludge Fermentation

Overview of Fermentation Processes .....	314
Function and Relationship to Biological Nutrient Removal Process ..	314
<i>Hydrolysis</i> .....	317
<i>Acidogenesis</i> .....	317
<i>Acetogenesis</i> .....	318
<i>Methanogenesis</i> .....	318
Primary Sludge Fermentation .....	319
Return Activated Sludge Fermentation .....	320
Primary Sludge Fermenter Configurations .....	322
Activated Primary Sedimentation Tanks .....	322
Complete-Mix Fermenter .....	326
Single-Stage Static Fermenter .....	327
Two-Stage Complete-Mix/Thickener Fermenter .....	328

## Contents

Unified Fermentation and Thickening Process . . . . .	329
Primary Sludge Fermentation Equipment Considerations . . . . .	329
Sludge Collector Drives . . . . .	329
Primary Sludge Pumping . . . . .	330
<i>Fermented Sludge Pumping</i> . . . . .	330
<i>Sludge Grinders or Screens</i> . . . . .	330
Fermentate Pumping . . . . .	330
Mixers . . . . .	331
Scum Removal . . . . .	331
Odor Control and Covers . . . . .	331
Corrosion and Protective Coatings . . . . .	332
Instrumentation . . . . .	332
<i>Flow Measurement</i> . . . . .	332
<i>Oxidation–Reduction Potential</i> . . . . .	332
<i>Level Measurement</i> . . . . .	333
<i>Sludge Density Meters</i> . . . . .	333
<i>pH Meters</i> . . . . .	333
<i>Headspace Monitoring</i> . . . . .	333
Return Activated Sludge Fermentation . . . . .	333
Configuration . . . . .	333
Equipment . . . . .	334
Control Parameters . . . . .	335
Case Studies . . . . .	337
Kelowna Wastewater Treatment Plant, Canada . . . . .	337
Kalispell, Montana . . . . .	338
South Cary Water Reclamation Facility, North Carolina . . . . .	341
<i>Plant Description</i> . . . . .	341
<i>Fermentation Process Description</i> . . . . .	341
<i>Operating Parameters</i> . . . . .	343
References . . . . .	345

## Chapter 10 Solids Handling and Processing

Introduction .....	350
Issues and Concerns .....	351
Influent Load Variations .....	351
Influent Amenability to Biological Nutrient Removal .....	351
Mean Cell Residence Time .....	352
Struvite Formation .....	352
Sludge Production .....	353
Nutrient Release .....	353
Release Mechanisms .....	353
Sources of Secondary Release .....	354
<i>Primary Clarification</i> .....	354
<i>Final Clarification</i> .....	354
<i>Thickening</i> .....	354
<i>Stabilization</i> .....	355
<i>Dewatering</i> .....	355
Estimating Recycle Loads .....	357
Eliminating or Minimizing .....	
Recycle Loads .....	360
Sidestream Management and Treatment .....	362
Sidestream Management Alternatives .....	365
Recycle Equalization and Semitreatment .....	366
<i>Equalization</i> .....	366
<i>Solids Removal</i> .....	366
<i>Aeration</i> .....	366
<i>Operational Issues</i> .....	367
Sidestream Treatment .....	367
<i>Nitrogen Removal</i> .....	367
<i>Stand-Alone Sidestream Treatment and Full-Centrates Nitrification</i> .....	368
<i>Operational Issues with Separate Recycle Nitrification Process</i> .....	370
Influent Solids .....	370

## Contents

Struvite .....	371
Alkalinity Feed .....	371
Aeration Efficiency .....	372
Reactor Configuration .....	372
Foaming .....	372
<i>Separate Recycle Treatment—Nitrogen Removal (Nitrification and Denitrification)</i> .....	372
<i>Single Reactor System for High Activity Ammonium Removal over Nitrite</i> ....	372
ANAMMOX .....	373
Ammonia Stripping .....	374
Combination Sidestream Treatment and Biological Nutrient Removal Process—Return Activated Sludge Reaeration .....	374
Formation of Struvite and Other Precipitates .....	376
Struvite Chemistry .....	377
Biological Nutrient Removal and Struvite .....	380
Areas Most Susceptible to Struvite Formation .....	382
Struvite Control Alternatives .....	387
<i>Phosphate Precipitating Agents</i> .....	388
<i>Dilution Water</i> .....	389
<i>Cleaning Loops</i> .....	389
<i>Hydroblasting</i> .....	389
<i>Equipment and Pipe Lining Selection</i> .....	389
<i>Magnetic and Ultrasonic Treatment</i> .....	389
<i>Lagoon Flushing</i> .....	391
<i>Controlled Struvite Crystallization (Phosphorus Recovery)</i> .....	391
<i>Facility Design</i> .....	391
<i>Process Design</i> .....	392
Case Studies .....	395
Conclusion .....	395
References .....	396

## Chapter 11 Laboratory Analyses

Nitrogen .....	400
Types .....	400
Sampling and Storage .....	400
Analyses Methods .....	401
<i>Ammonia-Nitrogen</i> .....	401
Colorimetric Methods .....	401
Titrimetric Methods .....	402
Ion Selective Method .....	402
Ion Chromatography .....	403
<i>Nitrite-Nitrogen</i> .....	404
Colorimetric Method .....	404
Ion Chromatography .....	404
<i>Nitrate-Nitrogen</i> .....	404
Nitrate Electrode Screening Method .....	405
Chromotropic Acid Method .....	406
Ion Chromatography for Nitrite and Nitrate .....	407
<i>Organic Nitrogen</i> .....	408
<i>Kjeldahl Method</i> .....	409
Storage of Samples .....	409
Interference .....	410
Phosphorus .....	411
Types .....	411
Sampling and Storage .....	411
Analyses Methods .....	412
<i>Digestion Methods for Total Phosphorus Analyses</i> .....	412
<i>Methods for Orthophosphate Analysis</i> .....	413
Vanadomolydophosphoric Acid Colorimetric Method .....	413
Ascorbic Acid Method .....	413
Ion Chromatography .....	413

## Contents

Short-Chain Volatile Fatty Acid Analysis .....	415
Analytical Methods for Short-Chain Volatile Fatty Acid Measurement ..	416
References .....	417

## Chapter 12 Optimization and Troubleshooting Techniques

Process Evaluation .....	422
Sampling and Testing .....	422
Sampling Locations and Techniques .....	422
<i>Sampling Plan</i> .....	422
<i>Sample Handling</i> .....	423
In Situ Sampling .....	424
Grab Sampling .....	424
Interval Sampling .....	427
Composite Sampling .....	428
<i>Sample Location</i> .....	428
Mixed Liquor Suspended Solids, Mixed Liquor Volatile Suspended Solids, Return Activated Sludge, and Waste Activated Sludge .....	430
<i>What</i> .....	430
<i>Where</i> .....	431
<i>Why</i> .....	431
<i>When</i> .....	432
<i>How</i> .....	432
Settleability and Sludge Volume Index .....	432
<i>What</i> .....	432
<i>Where</i> .....	433
<i>Why</i> .....	433
<i>When</i> .....	433
<i>How</i> .....	433
pH .....	434
<i>What</i> .....	434
<i>Where</i> .....	434

<i>Why</i> .....	434
<i>When</i> .....	434
<i>How</i> .....	434
Alkalinity .....	435
<i>What</i> .....	435
<i>Where</i> .....	435
<i>Why</i> .....	435
<i>When</i> .....	435
<i>How</i> .....	436
Temperature .....	436
<i>What</i> .....	436
<i>Where</i> .....	436
<i>Why</i> .....	436
<i>When</i> .....	437
<i>How</i> .....	437
Dissolved Oxygen .....	437
<i>What</i> .....	437
<i>Why</i> .....	437
<i>Where and When</i> .....	438
<i>How</i> .....	438
Oxidation–Reduction Potential .....	438
<i>What</i> .....	438
<i>Where</i> .....	439
<i>Why</i> .....	440
<i>When</i> .....	440
<i>How</i> .....	440
Ammonia and Total Kjeldahl Nitrogen .....	440
<i>What</i> .....	440
<i>Where</i> .....	441
<i>Why</i> .....	441
<i>When</i> .....	441

## Contents

<i>How</i> .....	442
Nitrite-Nitrogen .....	442
<i>What</i> .....	442
<i>Where</i> .....	442
<i>Why</i> .....	442

## **Chapter 13 Instrumentation and Automated Process Control**

Introduction .....	505
Online Analyzers .....	506
General Considerations .....	506
<i>Meters Reproducibility and Accuracy</i> .....	506
<i>Instrument Maintenance</i> .....	507
Specific Analyzers .....	508
Basic Instruments .....	508
<i>Total Suspended Solids Meters</i> .....	509
Measuring Method .....	509
Accuracy and Repeatability .....	509
Installation .....	509
Maintenance Requirements .....	510
Application .....	510
<i>Dissolved Oxygen Measurement</i> .....	510
Introduction .....	510
Membrane Technology .....	510
Accuracy and Repeatability .....	511
Maintenance .....	511
Zullig Technology .....	511

## Contents

Fluorescent and Luminescent Dissolved Oxygen .....	512
<i>pH Measurement</i> .....	512
Principles of Operation .....	513
Accuracy and Repeatability .....	514
In-Tank Or Open-Channel Installation .....	514
Flow-Through Installation .....	514
Maintenance Requirements .....	515
<i>Oxidation–Reduction Potential</i> .....	515
Introduction .....	515
Principle of Operation .....	515
Accuracy and Repeatability .....	515
Installation .....	516
Maintenance Requirements .....	516
Application .....	516
Advanced Instruments .....	516
<i>Ammonia and Ammonium</i> .....	517
Measurement .....	517
Accuracy and Repeatability .....	518
<i>Nitrate and Nitrite</i> .....	518
Principle of Operation .....	518
Accuracy and Repeatability .....	519
<i>Phosphorus and Orthophosphate</i> .....	519
Orthophosphate .....	519
Total Phosphorus .....	519
<i>Installation of Ammonia and Nutrient Analyzers</i> .....	520
Maintenance Requirements .....	520
Applications .....	521
Process Parameters for Optimization and Automatic Control .....	521
General Considerations .....	521
Selecting Optimum Set Points .....	523
Basic Automatic Control .....	523

<i>Excess Sludge Flow Control</i> .....	523
Improved Calculation Methods .....	526
Selecting Sludge Age Target .....	526
Maintaining Optimum Sludge Age .....	527
<i>Case Studies</i> .....	528
Oxnard Trickling Filter Solids Contact Activated Sludge System ....	528
Toronto Main Wastewater Treatment Plant .....	528
Santa Clara/San Jose Water Pollution Control Plant .....	529
<i>Dissolved Oxygen Control for Biological Nutrient Removal Plants</i> .....	532
The Need for Good Dissolved Oxygen Control .....	532
Challenges .....	533
Control Strategies .....	534
<i>Control of Chemical Addition</i> .....	536
<b>Advanced Control</b> .....	537
Ammonia Control .....	537
Control of Denitrification .....	537
Respirometry .....	538
Intermittent Aeration .....	539
Sequencing Batch Reactors .....	540
COST Model for Control Strategy Development .....	541
<b>Supervisory Control and Data Acquisition System Requirements</b> .....	541
General Considerations .....	541
Supervisory Control and Data Acquisition Functions .....	541
<i>Continuous Process Control</i> .....	542
Programmable Logic Controller and Logic Program .....	542
Programmable Logic Controller Programming Software .....	543
<i>Data Acquisition</i> .....	543
Input/Output Software .....	543
Data Highways and Ethernet Communications .....	543
Redundancy .....	544
Network Mapping and Monitoring .....	544

## Contents

<i>Supervisory Control</i> .....	544
Supervisory Control and Data Acquisition Engine (Core) .....	544
Supervisory Control and Data Acquisition Database .....	545
Graphics .....	545
Real-Time Trending .....	545
Data Integrity .....	546
Data Distribution .....	546
<i>Distributed Alarming</i> .....	546
<i>Historical Collection</i> .....	547
Historian Software .....	547
Historical Trend Charts .....	547
Historical Metric Charts .....	548
<i>Information Systems</i> .....	548
Reporting .....	548
Automated Alarm Notification .....	548
Thin Client Software .....	549
Server Emulation Sessions .....	549
<i>Security</i> .....	549
Comprehensive Supervisory Control and Data Acquisition System Summary .....	550
References .....	551
<b>Glossary</b> .....	<b>557</b>
<b>Index</b> .....	<b>585</b>
