

IMAGE PROCESSING

*Principles and
Applications*

*Tinku
Acharya
and
Ajoy K.
Ray*

Contents

Preface	xix
1 Introduction	1
1.1 Fundamentals of Image Processing	1
1.2 Applications of Image Processing	3
1.2.1 Automatic Visual Inspection System	3
1.2.2 Remotely Sensed Scene Interpretation	4
1.2.3 Biomedical Imaging Techniques	4
1.2.4 Defense surveillance	5
1.2.5 Content-Based Image Retrieval	6
1.2.6 Moving-Object Tracking	6
1.2.7 Image and Video Compression	7
1.3 Human Visual Perception	7
1.3.1 Human Eyes	8
1.3.2 Neural Aspects of the Visual Sense	9
1.4 Components of an Image Processing System	9
1.4.1 Digital Camera	10
1.5 Organization of the book	12
1.6 How is this book different?	14
1.7 Summary	15

References	15
2 Image Formation and Representation	17
2.1 Introduction	17
2.2 Image formation	17
2.2.1 Illumination	17
2.2.2 Reflectance Models	19
2.2.3 Point Spread Function	20
2.3 Sampling and Quantization	22
2.3.1 Image Sampling	23
2.3.2 Image Quantization	25
2.4 Binary Image	26
2.4.1 Geometric Properties	27
2.4.2 Chain code representation of a binary object	29
2.5 Three-Dimensional Imaging	31
2.5.1 Stereo Images	31
2.5.2 Range Image Acquisition	32
2.6 Image file formats	33
2.7 Some Important Notes	34
2.8 Summary	35
References	36
3 Color and Color Imagery	37
3.1 Introduction	37
3.2 Perception of Colors	38
3.3 Color Space Quantization and Just Noticeable Difference (JND)	39
3.4 Color Space and Transformation	40
3.4.1 CMYK space	40
3.4.2 NTSC or YIQ Color Space	41
3.4.3 YC_bC_r Color Space	41
3.4.4 Perceptually Uniform Color Space	41
3.4.5 CIELAB color Space	44
3.5 Color Interpolation or Demosaicing	45
3.5.1 Nonadaptive Color Interpolation Algorithms	46
3.5.2 Adaptive algorithms	48
3.5.3 A Novel Adaptive Color Interpolation Algorithm	53
3.5.4 Experimental Results	57
3.6 Summary	59

References	59
4 Image Transformation	61
4.1 Introduction	61
4.2 Fourier Transforms	62
4.2.1 One-Dimensional Fourier Transform	62
4.2.2 Two-Dimensional Fourier Transform	63
4.2.3 Discrete Fourier Transform (DFT)	64
4.2.4 Transformation Kernels	64
4.2.5 Matrix Form Representation	65
4.2.6 Properties	67
4.2.7 Fast Fourier Transform	68
4.3 Discrete Cosine Transform	70
4.4 Walsh-Hadamard Transform (WHT)	72
4.5 Karhunen-Loeve Transform or Principal Component Analysis	73
4.5.1 Covariance Matrix	75
4.5.2 Eigenvectors and Eigenvalues	75
4.5.3 Principal Component Analysis	76
4.5.4 Singular Value Decomposition	76
4.6 Summary	78
References	78
5 Discrete Wavelet Transform	79
5.1 Introduction	79
5.2 Wavelet Transforms	80
5.2.1 Discrete Wavelet Transforms	82
5.2.2 Gabor filtering	83
5.2.3 Concept of Multiresolution Analysis	85
5.2.4 Implementation by Filters and the Pyramid Algorithm	87
5.3 Extension to Two-Dimensional Signals	89
5.4 Lifting Implementation of the DWT	90
5.4.1 Finite Impulse Response Filter and Z-transform	92
5.4.2 Euclidean Algorithm for Laurent Polynomials	93
5.4.3 Perfect Reconstruction and Polyphase Representation of Filters	94
5.4.4 Lifting	96
5.4.5 Data Dependency Diagram for Lifting Computation	102
5.5 Advantages of Lifting-Based DWT	103
5.6 Summary	103

References	104
6 Image Enhancement and Restoration	105
6.1 Introduction	105
6.2 Distinction between image enhancement and restoration	106
6.3 Spatial Image Enhancement Techniques	107
6.3.1 Spatial Low-Pass and High-Pass Filtering	107
6.3.2 Averaging and Spatial Low-Pass Filtering	108
6.3.3 Unsharp Masking and Crisping	109
6.3.4 Directional Smoothing	109
6.4 Histogram-based Contrast Enhancement	110
6.4.1 Image Histogram	110
6.4.2 Histogram Equalization	111
6.4.3 Local Area Histogram Equalization	113
6.4.4 Histogram Specification	113
6.4.5 Histogram Hyperbolization	114
6.4.6 Median Filtering	114
6.5 Frequency Domain Methods of Image Enhancement	115
6.5.1 Homomorphic Filter	117
6.6 Noise Modeling	118
6.6.1 Types of Noise in An Image and Their Characteristics	120
6.7 Image Restoration	121
6.7.1 Image Restoration of Impulse Noise Embedded Images	122
6.7.2 Restoration of Blurred Image	123
6.7.3 Inverse Filtering	123
6.7.4 Wiener Filter	124
6.8 Image Reconstruction by Other Methods	127
6.8.1 Image Restoration by Bispectrum	127
6.8.2 Tomographic Reconstruction	128
6.9 Summary	128
References	128
7 Image Segmentation	131
7.1 Preliminaries	131
7.2 Edge, Line, and Point Detection	132
7.3 Edge Detector	135
7.3.1 Robert Operator-Based Edge Detector	135
7.3.2 Sobel Operator-Based Edge Detector	135

7.3.3	Prewitt Operator-Based Edge Detector	136
7.3.4	Kirsch Operator	136
7.3.5	Canny's Edge Detector	137
7.3.6	Operators-Based on Second Derivative	140
7.3.7	Limitations of Edge-Based Segmentation	143
7.4	Image Thresholding Techniques	143
7.4.1	Bi-level Thresholding	144
7.4.2	Multilevel Thresholding	145
7.4.3	Entropy-Based Thresholding	146
7.4.4	Problems Encountered and Possible Solutions	147
7.5	Region Growing	148
7.5.1	Region Adjacency Graph	148
7.5.2	Region Merging and Splitting	149
7.5.3	Clustering Based Segmentation	150
7.6	Waterfall algorithm for segmentation	151
7.7	Connected component labeling	152
7.8	Document Image segmentation	152
7.9	Summary	154
	References	155
8	Recognition of Image Patterns	157
8.1	Introduction	157
8.2	Decision Theoretic Pattern Classification	158
8.3	Bayesian Decision Theory	159
8.3.1	Parameter Estimation	160
8.3.2	Minimum Distance Classification	160
8.4	Nonparametric Classification	162
8.4.1	K -Nearest-Neighbor Classification	162
8.5	Linear Discriminant Analysis	163
8.6	Unsupervised Classification Strategies - clustering	164
8.6.1	Single Linkage Clustering	165
8.6.2	Complete Linkage Clustering	166
8.6.3	Average Linkage Clustering	166
8.7	K -Means Clustering Algorithm	166
8.8	Syntactic Pattern Classification	167
8.8.1	Primitive selection Strategies	168
8.8.2	High-Dimensional Pattern Grammars	169
8.9	Syntactic Inference	169

8.10	Symbolic Projection Method	170
8.11	Artificial Neural Networks	171
8.11.1	Evolution of Neural Networks	172
8.11.2	Multilayer Perceptron	172
8.11.3	Kohonen's Self-Organizing Feature Map	175
8.11.4	Counterpropagation Neural Network	176
8.11.5	Global Features of Networks	178
8.12	Summary	178
	References	179
9	Texture and Shape Analysis	181
9.1	Introduction	181
9.1.1	Primitives in Textures	182
9.1.2	Classification of textures	182
9.2	Gray Level Cooccurrence Matrix	183
9.2.1	Spatial Relationship of Primitives	185
9.2.2	Generalized Cooccurrence	186
9.3	Texture Spectrum	186
9.4	Texture Classification using Fractals	187
9.4.1	Fractal Lines and Shapes	188
9.4.2	Fractals in Texture Classification	189
9.4.3	Computing Fractal Dimension Using Covering Blanket method	189
9.5	Shape Analysis	191
9.5.1	Landmark Points	192
9.5.2	Polygon as Shape Descriptor	192
9.5.3	Dominant points in Shape Description	193
9.5.4	Curvature and Its Role in Shape Determination	193
9.5.5	Polygonal Approximation for Shape Analysis	194
9.6	Active Contour Model	194
9.6.1	Deformable Template	196
9.7	Shape Distortion and Normalization	198
9.7.1	Shape Dispersion Matrix	198
9.7.2	Shifting and Rotating the Coordinate Axes	199
9.7.3	Changing the scales of the bases	200
9.8	Contour-Based Shape Descriptor	201
9.8.1	Fourier based shape descriptor	201
9.9	Region Based Shape Descriptors	203
9.9.1	Zernike moments	203

9.9.2	Radial Chebyshev Moments (RCM)	204
9.10	Gestalt Theory of Perception	204
9.11	Summary	204
	References	205
10	Fuzzy Set Theory in Image Processing	209
10.1	Introduction to Fuzzy Set Theory	209
10.2	Why Fuzzy Image?	209
10.3	Introduction to Fuzzy Set Theory	210
10.4	Preliminaries and Background	211
10.4.1	Fuzzification	211
10.4.2	Basic Terms and Operations	212
10.5	Image as a Fuzzy Set	213
10.5.1	Selection of the Membership Function	214
10.6	Fuzzy Methods of Contrast Enhancement	215
10.6.1	Contrast Enhancement Using Fuzzifier	216
10.6.2	Fuzzy Spatial Filter for Noise Removal	217
10.6.3	Smoothing Algorithm	218
10.7	Image Segmentation using Fuzzy Methods	219
10.8	Fuzzy Approaches to Pixel Classification	221
10.9	Fuzzy <i>c</i> -Means Algorithm	221
10.10	Fusion of fuzzy logic with neural networks	223
10.10.1	Fuzzy Self Organising Feature Map	224
10.11	Summary	225
	References	225
11	Image Mining and Content-Based Image Retrieval	227
11.1	Introduction	227
11.2	Image Mining	228
11.3	Image Features for Retrieval and Mining	231
11.3.1	Color Features	231
11.3.2	Texture Features	234
11.3.3	Shape features	235
11.3.4	Topology	237
11.3.5	Multidimensional Indexing	239
11.3.6	Results of a Simple CBIR System	241
11.4	Fuzzy Similarity Measure in an Image Retrieval System	242
11.5	Video Mining	245

11.5.1	MPEG7: Multimedia Content Description Interface	246
11.5.2	Content-Based Video Retrieval System	248
11.6	Summary	249
	References	250
12	Biometric And Biomedical Image Processing	253
12.1	Introduction	253
12.2	Biometric Pattern Recognition	254
12.2.1	Feature Selection	254
12.2.2	Extraction of Front Facial Features	254
12.2.3	Extraction of side facial features	256
12.2.4	Face Identification	257
12.3	Face Recognition Using Eigenfaces	257
12.3.1	Face Recognition Using Fisherfaces	258
12.4	Signature Verification	259
12.5	Preprocessing of Signature Patterns	260
12.5.1	Feature Extraction	262
12.6	Biomedical Image Analysis	263
12.6.1	Microscopic Image Analysis	263
12.6.2	Macroscopic Image Analysis	264
12.7	Biomedical Imaging Modalities	264
12.7.1	Magnetic Resonance Imaging (MRI)	264
12.7.2	Computed Axial Tomography	265
12.7.3	Nuclear and Ultrasound Imaging	266
12.8	X-Ray Imaging	267
12.8.1	X-Ray Images for Lung Disease Identification	267
12.8.2	Enhancement of Chest X-Ray	267
12.8.3	CT-scan for Lung Nodule Detection	268
12.8.4	X-Ray Images for Heart Disease Identification	268
12.8.5	X-Ray Images for Congenital Heart Disease	269
12.8.6	Enhancement of Chest Radiographs Using Gradient Operators	270
12.8.7	Bone Disease Identification	271
12.8.8	Rib-cage Identification	271
12.9	Dental X-Ray Image Analysis	272
12.10	Classification of Dental Caries	272
12.10.1	Classification of Dental Caries	273
12.11	Mammogram Image Analysis	274
12.11.1	Breast Ultrasound	275

12.11.2 Steps in Mammogram Image Analysis	275
12.11.3 Enhancement of Mammograms	275
12.11.4 Suspicious Area Detection	276
12.11.5 LESION SEGMENTATION	277
12.11.6 Feature Selection and Extraction	279
12.11.7 Wavelet Analysis of Mammogram Image	280
12.12 Summary	281
References	282
 13 Remotely Sensed Multispectral Scene Analysis	 285
13.1 Introduction	285
13.2 Satellite sensors and imageries	286
13.2.1 LANDSAT Satellite Images	286
13.2.2 Indian Remote Sensing Satellite Imageries	287
13.2.3 Moderate Resolution Imaging Spectroradiometer (MODIS)	287
13.2.4 Synthetic Aperture Radar (SAR)	288
13.3 Features of Multispectral Images	289
13.3.1 Data Formats for Digital Satellite Imagery	289
13.3.2 Distortions and Corrections	289
13.4 Spectral reflectance of various earth objects	291
13.4.1 Water Regions	291
13.4.2 Vegetation Regions	291
13.4.3 Soil	292
13.4.4 Man-made/Artificial Objects	292
13.5 Scene Classification Strategies	293
13.5.1 Neural Network-Based Classifier Using Error Backpropagation	293
13.5.2 Counterpropagation network	294
13.5.3 Experiments and Results	294
13.5.4 Classification Accuracy	295
13.6 Spectral classification—A knowledge-Based Approach	296
13.6.1 Spectral Information of Natural/Man-Made Objects	297
13.6.2 Training Site Selection and Feature Extraction	297
13.6.3 System Implementation	297
13.6.4 Rule Creation	298
13.6.5 Rule-Base Development	299
13.7 Spatial Reasoning	300
13.7.1 Evidence Accumulation	301

13.7.2 Spatial Rule Generation	303
13.8 Other Applications of Remote Sensing	303
13.8.1 Change Detection using SAR Imageries	303
13.9 Summary	305
References	305
