Suzhou Silk Engineering Institute, China

Contents

Preface	v
Summary of the Weaving Project	1
Chapter 1 The Shedding Movement	5
Section I: Shed	6
Section II: Deformation and Tension on Warp During the Shedding Process	16
Section III: Movement Pattern of the Heald Frame	33
Section IV: Cam and Crank Shedding Units	39
Section V: Dobby Shedding Unit	47
Section VI: Jacquard Shedding Unit	66
Chapter 2 Beating up Movement	91
Section I: Four-Linkage Bar Beating up Unit	91
Section II: Sley Motion	100
Section III: Other Beating up Units	119
Section IV: Beating up and Formation of Fabric	126
Chapter 3 Picking Movement	142
Section I: Shuttle's Movement Through Shed	143
Section II: Picking Unit	161
Section III: Shuttle's Flying Orbit	168
Section IV: Striking Shuttle and Draw Shuttle	175
Chapter 4 Warp Let-off Movement	193
Section I: Beam Brake Type Warp Let-off Unit	194
Section II: Auto-adjust Type Warp Let-off Unit	199
Section III: A Brief Description of Non-Shuttle Warp let-off Movement	220
Chapter 5 Take up Movement	227
Section I: Intermittent Type Active Take-up unit	230
Section II: Continuous Type Active Take-up Unit	238

Section III:	Coordination Between Let-off Unit and Take-up Unit	242
Chapter 6	Multi Coloured Weft Weaving	244
Section I:	Elevation Type Multiple Shuttle Box Device	245
Section II:	Shuttle Segmentation of Multiple Shuttle Box Device	261
Section III:	Arbitrary Picking Unit	269
Section IV:	Leather Belt Displacement System	271
Section V:	Selected Weft System	273
Chapter 7	Automatic Control Devices of Looms	279
Section I:	Electric Press Button Control Device	280
Section II:	Photoelectric Weft detector	286
Section III:	Electronic Warp Protecting Device	299
Section IV:	Rough Weaving	309
Section V:	Warp Severing Autostop Device	317
Section VI:	Weft Sever Autostop Device	320
Chapter 8	Complimentary Units	327
Section I:	Automatic Shuttle Change	327
Section II:	Automatic Cop Change	345
Section III:	Starting and Stopping Units of the Loom and Frame Support	349
Chapter 9	Technological Parameters of Weaving and Productivity	356
Section I:	Loom Mounting Parameters	357
Section II:	Time Coordination between Different Movements of the Loom	365
Section III:	Productivity of the Loom	366
Section IV:	Common Flaws Seen in Fabrics	368
Chapter 10	Pile Looms	376
Section I:	Mounting Process of Double Layer Pile Silk Looms	379
Section II:	Double Layer Pile Silk Looms	381
Chapter 11	Shuttle-less Loom	391
Section I:	Jet Weaving	392
Section II:	Rapier Loom	401
Section III:	Gripper Loom	407
Section IV:	Multi-shed Loom	413
Section V:	Weaving and Knitting Machine	417
Section VI:	The Main Defects in the Performance of the Shuttle-Less Loom	419

Chapter 12	Economizing Electricity, Vibration and Noise of the Loom	421
Section I:	Measures to Economize Power Consumption of the Loom	421
Section II:	Vibration of the Loom and its Prevention	425
Section III:	Noise of the Loom and the Measures to Reduce Noise	428
