# Tunable External Cavity Diode Lasers

# Contents

<i>Preface</i>	vii
1. Introduction	1
1.1 Need for tunable external cavity diode lasers . . . . .	1
1.2 Brief introduction of semiconductor diode lasers . . . . .	2
1.3 Review of tunable diode lasers . . . . .	3
1.3.1 Tunable monolithic semiconductor lasers . . . . .	3
1.3.2 Tunable external cavity diode lasers . . . . .	4
1.3.3 Comparisons of technologies . . . . .	5
2. Basics of Semiconductor Diode Lasers	7
2.1 Principle of diode laser operation . . . . .	7
2.1.1 Absorption, spontaneous emission, and stimulated emission . . . . .	8
2.1.2 Requirements for lasing of semiconductor diode lasers	10
2.2 Semiconductor diode laser structures . . . . .	14
2.2.1 Homojunction lasers . . . . .	14
2.2.2 Double-heterostructure lasers . . . . .	15
2.2.3 Quantum well lasers . . . . .	17
2.2.4 Quantum dots lasers . . . . .	19
2.3 Basic characteristics of diode lasers . . . . .	20
2.3.1 Threshold condition . . . . .	20
2.3.2 Output power . . . . .	24
2.3.3 Beam divergence and astigmatism . . . . .	26
2.3.4 Spectral contents . . . . .	27

3.	Tunable Monolithic Semiconductor Diode Lasers	29
3.1	Introduction . . . . .	29
3.1.1	DBR and DFB lasers . . . . .	29
3.2	Tunable monolithic diode lasers . . . . .	32
3.2.1	Distributed Bragg reflector diode laser . . . . .	33
3.2.1.1	Bragg wavelength control . . . . .	35
3.2.1.2	Phase control . . . . .	36
3.2.1.3	Bragg wavelength and phase control . . . . .	37
3.2.2	Distributed feedback diode laser . . . . .	38
3.2.2.1	Corrugation phase control . . . . .	38
3.2.2.2	Multielectrode . . . . .	38
3.2.3	Summary of tunable monolithic diode laser . . . . .	39
3.3	Widely tunable diode lasers . . . . .	39
3.3.1	DBR-type lasers . . . . .	40
3.3.1.1	Sampled grating DBR (SGDBR) lasers . . . . .	41
3.3.1.2	Superstructure-grating DBR (SSGDBR) lasers .	42
3.3.2	Grating-assisting co-directional coupler (GACC-DBR)	43
3.3.3	Grating-coupled sampled-reflector (GCSR) . . . . .	45
3.3.4	Diode laser arrays . . . . .	48
3.3.5	Vertical-cavity surface-emitting lasers (VCSEL) . .	50
3.3.6	Other widely tunable monolithic diode lasers . . . . .	54
3.3.6.1	Double-ring resonant coupled lasers . . . . .	55
3.3.6.2	Lensless tunable external cavity lasers . . . . .	57
4.	Elements for Tunable External Cavity Diode Lasers	63
4.1	Introduction . . . . .	63
4.2	Optical coupling components . . . . .	64
4.2.1	Optical coating on laser facet . . . . .	65
4.2.2	Diode laser collimators . . . . .	70
4.2.3	Beam expander and shaping . . . . .	72
4.2.4	Optical isolators . . . . .	73
4.3	Electrical control parts . . . . .	74
4.3.1	Peltier cooler . . . . .	74
4.3.2	Temperature sensor . . . . .	75
4.3.3	Temperature and current controller . . . . .	75
4.3.4	Piezoelectrical transducer (PZT) . . . . .	76
4.4	Mechanically tuned mode-selection filters . . . . .	77
4.4.1	Difraction gratings . . . . .	77

4.4.2	Fiber Bragg gratings . . . . .	81
4.4.3	Fabry-Perot interferometer and bandpass interference filter . . . . .	82
4.5	Electronically tuned mode selection filters . . . . .	83
4.5.1	Liquid crystal spatial light modulator . . . . .	83
4.5.1.1	Liquid crystal . . . . .	84
4.5.1.2	Amplitude modulation . . . . .	85
4.5.1.3	Phase modulation . . . . .	86
4.5.2	Birefringence filter . . . . .	87
4.5.3	Acousto-optic tunable filter . . . . .	89
5.	Systems for Tunable External Cavity Diode Lasers	93
5.1	Optical feedback in external cavity diode lasers . . . . .	93
5.1.1	General effects of external optical feedback on diode lasers . . . . .	94
5.1.1.1	Three-mirror laser cavity model . . . . .	94
5.1.1.2	External cavity modes . . . . .	96
5.1.1.3	Dynamical properties . . . . .	99
5.1.2	Implementation of optical feedback . . . . .	102
5.2	Spectral characteristics of ECDLs . . . . .	105
5.2.0.1	Output power . . . . .	106
5.2.0.2	Single-mode tunability . . . . .	107
5.2.0.3	Linewidth . . . . .	108
5.2.0.4	Wavelength dependence of temperature . . . . .	110
5.3	System of tunable external cavity diode lasers . . . . .	111
5.3.1	ECDL configuration . . . . .	112
5.3.2	ECDL design . . . . .	121
5.3.3	ECDL alignment . . . . .	122
5.3.3.1	Threshold current . . . . .	123
5.3.3.2	Output power . . . . .	124
5.4	Geometry for mode-hop suppression . . . . .	125
5.4.1	Littrow configuration . . . . .	125
5.4.2	Littman-Metcalf . . . . .	130
6.	Implementation of Tunable External Cavity Diode Lasers	133
6.1	Widely continuous tunable ECDLs . . . . .	133
6.1.1	Mechanical wide tuning . . . . .	133
6.1.2	Micro-electro-mechanical-system wide tuning . . . . .	136

6.2	Electronically tuning external cavity diode laser . . . . .	140
6.2.1	Wavelength tunability by acousto-optic modulator . .	141
6.2.2	Frequency chirping by electro-optic modulator . . . .	148
6.2.3	Wavelength tunability by liquid crystal display . . . .	159
6.3	Miscellaneous external cavity diode lasers . . . . .	161
6.3.1	Blue-violet external cavity diode lasers . . . . .	162
6.3.2	High power external cavity diode lasers . . . . .	165
6.3.3	Broadly tunable quantum dots lasers . . . . .	169
7.	Frequency Stabilization of Tunable External Cavity Diode Lasers	175
7.1	Introduction . . . . .	175
7.2	Basic concepts of frequency stabilization . . . . .	176
7.3	Frequency stabilization schemes and apparatus . . . . .	178
7.3.1	Interferometers: F-P etalon . . . . .	178
7.3.2	Atomic transition line . . . . .	180
7.3.2.1	Saturated absorption . . . . .	180
7.3.2.2	Dichroic-Atomic-Vapor Laser Lock (DAVLL) .	183
7.3.3	Gas molecular absorption . . . . .	186
7.3.4	Persistent spectral hole burning . . . . .	189
7.4	Other frequency stabilization schemes . . . . .	191
8.	Applications of Tunable External Cavity Diode Lasers	197
8.1	Atomic clocks and magnetometry . . . . .	197
8.1.1	Atomic clock . . . . .	198
8.1.2	Atomic magnetometer . . . . .	199
8.2	High resolution laser spectroscopy . . . . .	201
8.3	Quantum manipulation and engineering . . . . .	206
8.4	Actively mode locked diode lasers . . . . .	208
8.5	Nonlinear frequency conversion . . . . .	221
8.5.1	Second harmonic generation . . . . .	221
8.5.2	Frequency quadrupling . . . . .	226
8.6	Optical telecommunication . . . . .	228
8.6.1	Coherent system and DWDM . . . . .	228
8.6.2	Testing and measurement . . . . .	229
8.7	Other applications . . . . .	230
8.7.1	Gas monitoring sensor . . . . .	231
8.7.2	LIDAR . . . . .	233
