INTRODUCING

Maya[®]

7

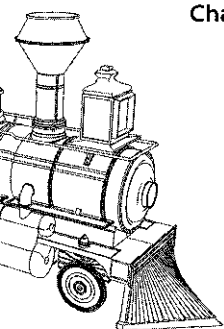

3D for Beginners

The Best-Selling
Maya Book

Contents

Introduction	xi
Chapter 1 ■ Introduction to Computer Graphics and 3D	1
Embrace the Art	2
Computer Graphics	2
The Stages of Production	4
The CG Production Work Flow	8
Core Concepts	12
Basic Film Concepts	22
Summary	28
Chapter 2 ■ The Maya Interface	31
Navigating in Maya	32
A Screen Roadmap	32
Panels and Frequently Used Windows	42
Maya Object Structure	62
Summary	66
Chapter 3 ■ Your First Maya Animation	67
Project Overview: The Solar System	68
The Preproduction Process: Planning	68
Creating a Project	68
The Production Process: Creating and Animating the Objects	70
Using the Outliner	84
Summary	86

Chapter 4 ■ Modeling with Polygons	87
Planning Your Model	88
Polygon Basics	94
Poly Editing Tools	96
Putting the Tools to Use: Making a Simple Hand	99
Creating Areas of Detail on a Poly Mesh (Surface)	105
The Split Edge Ring Tool	107
The Sculpt Geometry Tool	108
Modeling Complex Objects: The Steam Locomotive	109
Suggestions for Modeling Polygons	132
Summary	132
Chapter 5 ■ Modeling with NURBS	133
Ways to Make NURBS	134
Creating an Axe Using NURBS	142
Editing NURBS Surfaces	154
Using NURBS Surfacing to Create Polygons	158
Converting NURBS to Polygons	158
Patch Modeling	160
Using Artisan to Sculpt NURBS	168
Summary	170
Chapter 6 ■ Further Modeling Topics: Deformers and Subdivision Surfaces	173
Modeling with Deformers: The Lattice	174
Subdivision Surfaces	181
Creating a Starfish	181
Building a Teakettle	186
Summary	195

Chapter 7 ■ Maya Shading and Texturing	197
Shader Types	198
Shader Attributes	202
Texturing the Axe	205
Textures and Surfaces	214
UVs, Polygons, and Images: Color My Pear	223
Summary	227
Chapter 8 ■ Introduction to Animation	229
Keyframe Animation—Bouncing a Ball	230
Throwing an Axe	238
Replacing an Object	254
Rigging the Locomotive, Part One	256
Animating a Catapult	258
Summary	264
Chapter 9 ■ Further Animation Practices	267
Skeletons and Kinematics	268
Skeletons: The Hand	280
Inverse Kinematics	293
Basic Relationships: Constraints	297
Basic Relationships: Set Driven Keys	300
Application: Rigging the Locomotive	305
Summary	312
Chapter 10 ■ Maya Lighting	313
Basic Lighting Concepts	314
Maya Lights	318
Light Linking	324
Adding Shadows	324
Lighting Effects	328
Tips for Using and Animating Lights	334
Summary	336

Chapter 11 ■ Maya Rendering	339
The Rendering Setup	340
Previewing Your Render: The Render View Window	349
Reflections and Refractions	351
Using Cameras	353
Motion Blur	358
Batch Rendering	359
Rendering the Wine Bottle	360
Rendering with mental ray for Maya—Final Gather	364
Summary	367
Chapter 12 ■ Maya Dynamics	369
An Overview of Dynamics	370
Rigid and Soft Dynamic Bodies	370
Animating with Dynamics: The Pool Table	374
Particle Dynamics	383
Emitting Particles	384
Animating a Particle Effect: Locomotive Steam	389
Introduction to Paint Effects	396
Summary	401
Where Do You Go from Here?	401
Glossary	403
Index	407
