More than 300 ways
to squeeze the most from Photoshop!

Raw Power

Cool tricks with Camera Raw,
masks, layers, paths, and more

Contents

.....

Introduction	vii
--------------------	-----

Chapter 1: Optimizing Performance 1

Reducing Startup Time	1
Disabling Plug-ins	1
Managing Fonts	2
Managing Presets	3
Managing Profiles	3
Setting Preferences	4
Cache Settings for Image Cache Levels	5
Pixel Doubling for Faster Screen Redraws	6
Reducing Overheads by Reducing Histories	6
Reducing Palette Thumbnail Size	8
Do You Really Need That Snapshot?	8
The RAM Connection	10
Assigning RAM for Optimal Performance	10
Assigning Scratch Disks	12
Single Scratch Disks vs. RAID	12
16-Bits/Channel vs. 8-Bits/Channel	13
Saving Files	15
Saving Files in 16-Bits/Channel Mode	15
Saving Files in CMYK Mode	15
Reducing Layers and Channels	16
Maximizing File Compatibility	16
Faster Access When Switching Applications	17
Summary	18

Chapter 2: Hacking the Work Area 19

Dealing with Documents	20
Accessing Opened Documents in ImageReady	20
Bringing a Document to the Forefront	20
Closing All Open Documents	21
Finding the Location of the Currently Open Document	21
Opening and Saving with a Mouse Click (Windows)	22
Changing the Canvas Border Color	22
Customizing the Checkerboard Background	23
Lording Over the Rulers	24
Resetting the Zero Origin	25
Specifying Ruler Units in the Document Window	26

Using Guides and Grids	27
Creating	27
Moving	28
Clearing	28
Hiding	28
Locking	29
Customizing	29
Smart Guides	30
Showing/Hiding Extras by Using Keyboard Shortcuts	30
Viewing	31
Viewing Actual Pixels, Not Interpolated	32
Alpha/Spot Channel Info	32
Document Information	33
Using an Action to View Full Screen Mode	35
Using Keyboard Shortcuts to View Full Screen	36
Using the Zoom Tool	36
Using the Hand Tool	37
Working on the Edges of a Document	37
Multiple Views	37
Scrolling and Zooming Multiple Views	37
Tiling Multiple Windows	39
Colorizing and Hiding Menu Items for Easier Scanning	39
Hiding Menu Items	40
Managing the Palettes	40
Regrouping and Docking	40
Reordering in the Palette Well	41
Hiding/Showing Quickly	41
Organizing Content in the Preset Palettes	42
Changing the Location of the Options Bar	43
Entering Values in Text Fields	44
Increasing and Decreasing Values by Using Keys	44
Increasing and Decreasing Values by Scrubbing	44
Working with the Color Picker	45
Selecting a Color Picker	45
Choosing a Color Picker Mode	46
Selecting Colors from Libraries	47
Viewing a Color Gamut Warning	48
Working with Color Samplers	50
Creating, Moving, and Deleting Color Samplers	50
Hiding and Showing Color Samplers	51
Specifying Color Sampler Info Display Option	51
Changing the Quick Mask Color Overlay Options	52
Specifying Tool Cursors	54
Specifying Gamut Warning's Overlay Color and Opacity	55
Noting the Magic Wand Tool and Eyedropper Connection	58
Image Interpolation Methods	58
Setting the Default Image Interpolation Method	59

Resetting Default Settings in Dialog Boxes	60
Resetting All Warnings in Dialog Boxes	60
Resetting Foreground and Background Colors to Default	61
Customizing Keyboard Shortcuts	62
Finding the Install Folder's Location Quickly.	63
Customizing and Saving Your Very Own Workspace	64
Accessing Tutorials, Tips and Tricks from the Welcome Screen	65
Summary.	65

Chapter 3: The Fine Art of Using Palettes 67

Brushes.	67
Preserving New Brush Presets	68
Previewing a Brush Stroke in Brush Presets	68
Rearranging Brushes in the Brushes Palette	69
Showing the Pop-Up Brushes Palette Temporarily.	70
Channels.	71
Creating Alpha Channels	72
Creating Spot Channels.	72
Saving Selections	73
Combining Selections.	74
Splitting and Merging Channels	75
Color.	75
Cycling through the Available Spectrums	75
Dynamic Color Sliders	76
Curves	76
Working in the Curves Dialog Box	76
Customizing the Dialog Box	77
Awakening the Input and Output Text Fields	78
Placing Anchor Points without Modifying the Curve	78
Cycling through the Anchor Points on a Curve (Mac OS).	79
Moving Anchor Points without Using the Mouse	79
Selecting Anchor Points	79
Deleting Anchor Points.	80
Creating Freeform Curves with the Arbitrary Map Tool.	80
Using the Eyedroppers	80
Undoing Curve Moves	82
Histogram	82
Evaluating Images	82
Viewing Histograms	86
History.	88
Creating a New Snapshot Automatically	89
Allowing Nonlinear History	89
Showing New Snapshot Dialog Box Automatically	90
Making Layer Visibility Changes Undoable	90
Purging Histories	91
Info.	91

Layers	94
Locking and Unlocking Layers	94
Adding Color to Layer Tiles	95
Specifying Palette Thumbnails, Icons, and Masks	96
Levels	97
Input Controls	97
Output Controls	99
Clipping Display	99
Navigator	101
Swatches	102
Tool Presets	103
Defining a New Tool Preset	103
Sorting Saved Tool Presets.	104
Summary	105
Chapter 4: Browsing with Bridge	107
Viewing from Bridge	107
Launching Bridge	108
Viewing Full, Compact, or Ultra-Compact Mode	108
Customizing Thumbnail Views	109
Customizing and Saving Bridge Views	110
Slideshow Mode	111
Managing Files with Bridge	112
Applying Camera Raw Settings	112
Opening Files from Bridge	113
Opening Raw Files in Bridge or Photoshop	114
Rating and Labeling Files for Easier Identification	115
Finding Files and Saving Searches	117
Creating and Applying Keywords to Files.	118
Appending and Replacing Metadata	119
Batch Renaming Files	119
Viewing Quicker Previews from a CD.	121
Deleting the Preferences File.	121
Summary	122
Chapter 5: Hacking Preferences and Documents.	123
Hacking Prefs.	123
Restoring Prefs.	124
Changing Scratch Disks and Plug-Ins at Launch Time	124
Specifying Update Prefs	125
Installing Plug-Ins into a Safe Folder	125
Hacking Documents	126
Specifying Default Resolution for New Preset Documents	126
Specifying Document Width in Columns.	126
Matching New Document to Existing Document	127
Finding the Center of a Document	127
Duplicating Documents in ImageReady on the Fly.	128
Comparing Documents for Differences	128

Opening a Composite Version of a Layered Document	130
Adding Canvas Size	130
Adding Text and Audio Annotations	131
Saving Files	132
Failsafe Way of Including a Background Layer	132
Saving in Large Document Format	133
Password Protecting Files	133
Appending File Extensions Automatically	133
Saving Previews	133
Reverting an Accidentally Saved Document	134
Removing Camera (EXIF) Metadata	135
Summary	136
Chapter 6: Working with Layers	137
Creating Layers	137
Above or Below Current Layer	138
Background Layer from a Normal Layer	138
Single Layer from Multiple Layers	138
Adjustment Layers	139
Groups from Multiple Layers	140
Smart Objects	140
Layer Comps.	142
Managing Layers	144
Showing/Hiding Multiple Layers	144
Renaming Layers	144
Adding Color to Layer Tiles	145
Unlocking a Background Layer	146
Protecting Layer Content	146
Selecting Layers and Groups	146
Selecting Layers Automatically	147
Moving Layers Up and Down the Stack	148
Linking Layers and Groups	148
Unlinking Single Layers	149
Editing Layers	149
Aligning and Distributing Layer Content	150
Rasterizing Layers	151
Changing Fill and Opacity	152
Copying and Pasting All Visible Layers	152
Merging Layers	153
Blending Layers	154
Cycling through the Layer Blend Modes	154
Using the Apply Image Command	155
Using Blend If	157
Excluding Channels when Blending	159
Importing and Exporting	159
Importing Layers from Another Document	160
Exporting Layers as Separate Files	160
Summary	161

Chapter 7: Creating and Applying Layer Styles	163
Creating, Saving, and Organizing Styles	164
Applying, Clearing, and Converting Styles	166
Applying to Another Layer Quickly	166
Applying Same Style to Multiple Layers	167
Applying a Rollover Style	168
Clearing and Hiding Styles	168
Converting Styles into Layers	169
Applying and Creating Custom Contours	169
Defining Default Global Light for All Documents	171
Moving and Repositioning Effects	171
Scaling Layer Styles	172
Summary	173
Chapter 8: Hacking Layer Masks	175
Creating, Viewing, and Applying Masks	176
Grayscale Masks	177
Vector Masks	178
Luminosity-Based Masks	179
Clipping Masks from Layer Transparency	180
Viewing Layer Masks	181
Viewing in the Document Window	181
Applying Existing Masks to Other Layers	182
Editing and Modifying Masks	183
Using Painting Tools	183
Contracting and Spreading Masks	184
Changing the Opacity	185
Via Alpha Channel or Selection	185
Modifying Vector Masks	186
Transforming Masks	186
Importing Elements and Preserving Layer Mask	187
Summary	187
Chapter 9: Hacking Selection Masks	189
Creating and Saving Selection Masks	189
Creating Circles and Squares Using Marquee Tools	190
Color-Based Masks	191
Luminosity-Based Masks	192
Channel-Based Masks	194
Defining a Selection from an Exact Center Point	195
Defining an Aspect Ratio for a Selection	196
Irregular Selections	196
Selection from a Work Path	198
Feathered Selections	198
Saving a Selection with a File	201

Modifying Selections	202
Using Painting Tools and Filters.	202
Warp Command.	204
Preventing Rounded Corners when Expanding	204
Selection Mask Quick Hacks.	206
Summary	209

Chapter 10: Drawing and Painting 211

Drawing Paths	211
Creating a Path from a Selection	215
Converting Individual Path Components to a Selection	215
Avoiding Disappearing Paths	216
Creating Clipping Paths	216
Creating Compound Clipping Paths	216
Previewing How Closely Your Clipping Paths Fit	218
Moving, Transforming, and Stroking Paths	219
Moving Paths	220
Moving a Path in Tandem with Layer Content	221
Combining Path Components.	221
Aligning and Distributing Paths.	222
Transforming Clipping Paths to Fit Resized Layer	223
Stroking Paths	223
Stroking Paths with Gradients or Images	224
Creating and Editing Shapes.	225
Combining Existing Shape Layers	226
Applying Gradients to Shape Layers	227
Drawing Arrow Heads and Tails	228
Painting.	229
Brush Shape Dynamics	229
Creating Brush Tip Shapes	233
Avoiding Jaggy-Edged Brush Strokes	233
Painting Dotted Straight Lines	234
Painting Quick Hacks	235
Summary	236

Chapter 11: Editing, Transforming, and Retouching Images 237

Cropping, Rotating, and Positioning Layer Content.	237
Crop Tool Modes	237
Defining the Crop from the Center of a Document	241
Preventing the Crop Tool from Snapping to the Edge	241
Using the Rectangular Marquee and Trim to Crop	243
Cropping and Straightening Photos Automatically.	243
Straightening Crooked Images	245
Rotating Layer Content Incrementally	249
Matching the Rotation of Two Scans	249
Aligning and Distributing Content on Multiple Layers	251

Centering Layer Content	252
Revealing and Deleting Hidden Data	252
Extracting Image Content from Backgrounds	254
The Eraser Tool	254
The Magic Eraser Tool	255
The Background Eraser Tool	255
The Extract Filter	256
Transforming Images	258
Resizing and Resampling Images	258
Correcting Perspective	259
Warping Layer Content Using Nodal Points	261
Correcting Distortion Caused by a Taking Lens	262
Retouching Images	264
Filling in Dust Spots and Scratch Marks	264
Reducing Color and Luminosity Noise	267
Dodging and Burning Nondestructively	269
Smoothing Skin Tones and Wrinkles	270
Correcting Unwanted Highlights on Faces	271
Sharpening	273
Using Unsharp Mask	273
Using Smart Sharpen	276
A Flexible Method for Sharpening Images	277
An Alternative Method for Sharpening Images	280
Summary	282

Chapter 12: Adjusting and Correcting Colors 283

Using Profiles	284
Color Settings and Working Space	285
Creating Custom CMYK Separation Settings	289
Checking Files for Embedded Profiles	290
Viewing Gamut Warnings for Custom Profiles	291
Removing Colorcasts	293
Three Ways to Correct a Colorcast	293
Using Auto Color Manually	297
Correcting Images Exposed under Wrong Light Source	298
Saturating and Desaturating Images	300
Saturating Colors Selectively	300
Ten Ways of Desaturating an Image	301
Replacing and Matching Colors	303
Replacing Selected Colors in an Image	303
Selectively Turning Elements to Black and White	305
Applying a Multitone Effect to an Image	306
Matching Color between Two Images	307
Color Adjusting Quick Hacks	308
Summary	309

Chapter 13: Creating and Editing Type	311
Creating Type.	311
Specifying Paragraph Type Bounding Box Size	312
Exiting Type Mode Gracefully	313
Typing on a Path	314
Enclosing Type Inside a Custom Shape	315
Editing and Modifying Type	316
Changing Type Attributes across Multiple Layers	316
Editing Type Using Keyboard Shortcuts	316
Kerning and Tracking Type	317
Increasing and Decreasing Leading	318
Converting a Font to a Shape	319
Applying Filters to Vector Type	320
Restoring Rotated Type Back to Horizontal	321
Inserting a Picture into Type	322
Centering Type on a Layer	323
Applying Roman Hanging Punctuation.	324
Creating Grungy Type.	324
Type-Related Quick Hacks	326
Summary	327
Chapter 14: Hacking Camera Raw	329
Using the Camera Raw Dialog Box Effectively	330
Camera Raw Preferences and Settings	341
Managing Caches and Sidecar Files.	343
Opening and Saving Raw Files.	344
Using Image Processor to Batch Process Raw Files	345
Camera Raw Quick Hacks	345
Summary	347
Chapter 15: Automating Tasks	349
Creating, Saving, and Playing Actions	349
Creating an Action.	350
Including a Safety Net in a New Action.	355
An Action for All Image Dimensions	356
Including Conditionals (ImageReady).	356
Converting History Steps into Action Steps (ImageReady)	357
Creating Unconventional Actions	358
Saving Custom Actions	358
Saving Actions as Droplets	359
Saving Actions as Text Files	361
Playing Back Actions	361
Playing Actions in Button Mode	362

Playing Automatically	362
Using Actions in Batch Mode	364
Actions versus Scripting	365
Editing and Managing Actions	367
Changing Recorded Values and Adding Steps	367
Editing Droplets	368
Loading	368
Furling/Unfurling Actions the Easy Way	369
Summary	369
Chapter 16: Outputting to Print	371
Preparing Images for Printing	372
Soft Proofing Images in Photoshop	372
Sharpening Images	373
Setting the Shadow and Highlight End Points	374
Avoiding Posterization and Banding	376
Printing Vector Data at Printer Resolution	378
Four-Color Grayscale Printing	379
Using Spot Colors	382
Using a PDF/X Standard Workflow	384
Rotating Images—a Ripping Question	386
Printing from Photoshop	386
Print with Preview	387
Printing Multiple Images on a Single Page	390
Printing Selected Channels	392
Printing a Folder Full of Images	393
Printing Quick Hacks	394
Summary	396
Chapter 17: Outputting to the Web	397
Editing and Preparing Images for the Web	397
Taking the Guesswork Out of Resizing	398
Creating Irregular Shaped Image Maps	398
In-Betweening	400
Copying Hexadecimal Colors	401
Blending GIFs into Backgrounds	402
Applying Weighted Optimization	404
Creating Galleries and QuickTime Movies	406
Web Photo Galleries	406
Flash Photo Galleries	407
QuickTime Movies	407
Outputting to the Web Quick Hacks	408
Summary	412

Chapter 18: Exploiting Filters and Photoshop Flexibility 413

Hacking Filters	413
Applying RGB Filters to CMYK Files	414
Reapplying Filter Settings	415
Filtering a Layer Nondestructively	415
Placing a Lens Flare Precisely	416
Creating Seamless Patterns	417
Working with the Lighting Effects Filter	418
The Smart Way to Find Edges	420
Taking Advantage of Photoshop Flexibility	420
Creating Printable Grids	420
Creating Space Age Grids	421
Creating a Grayscale Step Wedge	422
Creating Backgrounds	424
Creating Fancy Photo Frames	425
Summary	426

Appendix: Troubleshooting 427
