

# ENVIRONMENTAL TOXICANTS

SECOND EDITION

Human Exposures and  
Their Health Effects

*Edited by*

MORTON LIPPMANN

# CONTENTS

<b>Preface</b>	<b>xiii</b>
<b>Contributors</b>	<b>xv</b>
<b>1 Introduction and Background</b>	<b>1</b>
<i>Morton Lippmann, Ph.D.</i>	
Characterization of Chemical Contaminants	2
Human Exposures and Dosimetry	7
Chemical Exposures and Dose-to-Target Tissues	7
Concentration of Toxic Chemicals in Human Microenvironments	8
Inhalation Exposures and Respiratory Tract Effects	11
Ingestion Exposures and GI Tract Effects	18
Skin Exposure and Dermal Effects	19
Absorption through Membranes and Systemic Circulation	20
Accumulation in Target Tissues and Dosimetric Models	21
Indirect Measures of Past Exposures	21
Characterization of Health	23
Exposure-Response Relationships	24
References	27
<b>2 Ambient Particulate Matter</b>	<b>31</b>
<i>Morton Lippmann, Ph.D.</i>	
Sources and Pathways for Human Exposure	32
Ambient Air PM Concentrations	36
Extent of Population Exposures to Ambient Air PM	38
Nature of the Evidence for Human Health Effects of Ambient Air PM	41
Epidemiological Evidence for Human Health Effects of Ambient Air PM	41
Discussion and Current Knowledge on the Health Effects of PM	57
Standards and Exposure Guidelines	59
References	60
<b>3 Asbestos and Other Mineral and Vitreous Fibers</b>	<b>65</b>
<i>Morton Lippmann, Ph.D.</i>	
Important Special Properties of Fibers	65
Exposures to Fibers	68
Fiber Deposition in the Respiratory Tract	71
Fiber Retention, Dissolution, and Translocation	73
Properties of Mineral and Vitreous Fibers Relevant to Disease	81

Asbestos-Related Diseases	81
Review of Biological Effects of Size-Classified Fibers in Animals and Humans	83
Critical Fiber Parameters Affecting Disease Pathogenesis	86
Exposure—Response for Asbestos-Related Lung Cancer and Mesothelioma: Human Experience	95
Risk Assessment Issues: Asbestos	100
Review of Epidemiological Evidence for Health Effects in Workers Exposed to MMMFs	103
Risk Assessment Issues: Man-made Mineral Fibers	106
Key Factors Affecting Fiber Uptake and Toxicity: Recapitulation and Synthesis	108
Acronyms	109
References	110

#### 4 Benzene 121

*Bernard D. Goldstein, M.D., and Gisela Witz, Ph.D.*

Benzene Exposure	122
Uptake	124
Metabolism and Disposition	124
Mechanisms of Toxicity	131
Risk Assessment	138
References	141

#### 5 Carbon Monoxide 151

*Michael T. Kleinman, Ph.D.*

CO Exposure and Dosimetry	151
Mechanisms of CO Toxicity	152
Populations at Risk of Health Effects due to CO Exposure	153
Regulatory Background	154
Health Effects of CO	155
Summary and Conclusions	165
References	166

#### 6 Chromium 173

*Mitchell D. Cohen, Ph.D., and Max Costa, Ph.D.*

Essentiality	173
Environmental Sources and Standards	174
Exposure Scenarios	176
Uptake and Distribution	178
Toxicological Effects	179
Immunotoxicity	180
Carcinogenicity and Teratogenic Effects	182
Genotoxicity and Mutagenicity	183
References	185

<b>7 Diesel Exhaust</b>	<b>193</b>
<i>Joe L. Mauderly, D.V.M.</i>	
Historical Overview	193
Exposures to Diesel Exhaust	194
Health Effects	199
Current Issues and Research Needs	230
References	232
<b>8 Dioxins and Dioxin-like Chemicals</b>	<b>243</b>
<i>Michael J. De Vito, Ph.D., and Michael A. Gallo, Ph.D.</i>	
Sources	243
Toxicological Effects and Mechanism of Action	249
Mechanism of Action	252
References	258
<b>9 Drinking Water Disinfection</b>	<b>267</b>
<i>Richard J. Bull, Ph.D.</i>	
Chemical Methods of Disinfection	268
Chemical Nature and Occurrence of Disinfectant By-products	269
Associations of Human Disease with Drinking Water Disinfection	276
Toxicology of Disinfectants	279
Summary and Conclusions	298
References	303
<b>10 Environmental Tobacco Smoke</b>	<b>319</b>
<i>Jonathan M. Samet, M.D., M.S., and Sophia S. Wang, Ph.D.</i>	
Exposure to Environmental Tobacco Smoke (ETS)	320
Health Effects of Involuntary Smoking in Children	331
Health Effects of Involuntary Smoking in Adults	345
Respiratory Symptoms and Illnesses in Adults	359
Summary	363
References	363
<b>11 Food Constituents, Additives, and Contaminants</b>	<b>377</b>
<i>Joseph V Rodricks, Ph.D.</i>	
Food-Related Health Risks	377
Legal and Regulatory Framework	380
Toxicity Test Requirements and Safety Criteria	381
Substances Intentionally Added to Food	387
Food Contaminants of Industrial Origin	395
Constituents and Contaminants of Natural Origin	397
Summary and Conclusions	404
Acronyms	405
References	405

<b>12 Formaldehyde and Other Aldehydes</b>	<b>409</b>
<i>George D. Leikauf, Ph.D.</i>	
Background	409
Single-Exposure Health Effects	417
Effects of Multiple Exposures	426
References	434
<b>13 Indoor Bioaerosol Contaminants</b>	<b>449</b>
<i>Mary Kay O'Rourke, Ph.D., and Michael D. Lebowitz, Ph.D.</i>	
Sources	449
Biological Factors	450
Exposure	453
Morbidity Effects	457
Hazard Assessment	461
Controls	468
Summary and Conclusions	470
References	471
<b>14 Lead and Compounds</b>	<b>481</b>
<i>Kathryn R. Mahaffey, Ph.D., James McKinney, Ph.D., and J. Routt Reigart, M.D.</i>	
Physical/Chemical Properties and Behavior of Lead and Its Compounds	482
Lead in the Environment and Human Exposure	484
Absorption	486
Distribution	491
Kinetics	493
Health Effects	500
Biomarkers	502
Some Chemical/Molecular Considerations in Lead Neurotoxicity	506
Treatment of Lead Toxicity	509
Conclusions	511
References	513
<b>15 Human-made Ionizing Radiation and Radioactivity:</b>	
<b>Sources, Levels, and Effects</b>	<b>523</b>
<i>John J. Mauro, Ph.D., and Norman Cohen, Ph.D.</i>	
Source Documents	523
Special Units	524
Sources of Human-made Radioactivity and Radiation	525
Nuclear Fuel Cycle	526
Nuclear Weapons Complex	537
Local, Tropospheric, and Global Fallout	542
Medical Exposures	544
Industrial Uses (Other Than Nuclear Fuel)	546

Consumer Products	548
Exposures to Diffuse, Enhanced Sources of Naturally Occurring Radioactive Material (NORM) and Radiation	548
Overview of Potential Health Impacts of Natural and Human-made Sources of Radioactivity	549
References	556

## **16 Mercury** **563**

*Jesper Bo Nielsen, Ph.D., and Philippe Grandjean, Ph.D.*

Chemistry	563
Sources	563
Environmental Exposures	565
Occupational Exposures	567
Kinetics and Metabolism	566
Health Effects	570
References	573

## **17 Microwaves and Electromagnetic Fields** **577**

*David H. Sliney, Ph.D., and Francis Colville*

Background	578
Philosophical Approaches	579
Standards Development	581
Current OELs and EELs for RF Radiation	582
Lowest Frequencies	585
U.S. Government Activities	586
Alternatives to OELs: Do They Exist?	586
Epidemiological Studies	586
Protective Measures	587
Engineering/Installation/Design Controls	587
Range Controls	588
Conclusions	589
Glossary	590
References	590

## **18 Nitrogen Oxides** **595**

*Richard B. Schlesinger, Ph.D.*

Sources of NO <sub>x</sub>	595
Nitrogen Dioxide	596
Nitric Oxide	612
Nitric/Nitrous Acid	614
Inorganic Nitrates	615
Mixtures of Nitrogen Oxides	616
Summary and Conclusions	621
References	623

<b>19 Noise: Its Effects and Control</b>	<b>639</b>
<i>Daniel L. Johnson, Ph.D.</i>	
Human Auditory System	639
Measurement of Sound	642
Direct Physical Effects	643
General Effects of Noise	645
Control of Noise	649
Summary	652
References	653
<b>20 Ozone</b>	<b>655</b>
<i>Morton Lippmann, Ph.D.</i>	
Background	661
Effects of Single Exposures to Ozone	668
Effects of Multiple-Day and Ambient Episode Exposures	698
Summary and Conclusions	707
References	710
<b>21 Pesticides</b>	<b>725</b>
<i>Philip J. Landrigan, M.D., M.Sc., Luz Claudio, Ph.D., and Rob McConnell, M.D.</i>	
Evolving Patterns of Pesticide Use	726
Exposure	726
Epidemiology of Acute Pesticide Poisoning	728
Toxicity of Pesticides	729
Fumigants and Nematocides	733
Other Pesticides	734
Inert Ingredients	734
Pesticides and Endocrine/Reproductive Toxicity	735
Conclusion: Issues for the Future	736
References	738
<b>22 Radon and Daughters</b>	<b>741</b>
<i>Naomi H. Harley, Ph.D.</i>	
Effects of Radon Exposure	741
Units of Radon Exposure	742
Outdoor Radon	743
Indoor Radon	745
Underground Mine Radon Epidemiology	751
Environmental Epidemiology	752
Lung Dosimetry	754
Lung Cancer Models for Humans	757
NIH Model	760
Childhood Exposure	764
Animal Studies	764

Smoking and Radon	765
Summary	766
References	766
<b>23 Sulfur Oxides: Acidic Aerosols and SO<sub>2</sub></b>	<b>771</b>
<i>Morton Lippmann, Ph.D.</i>	
Sources and Exposures	772
Health Effects	776
References	803
<b>24 Trace Elements: Aluminum, Arsenic, Cadmium, and Nickel</b>	<b>811</b>
<i>Max Costa, Ph.D.</i>	
Aluminum	811
Arsenic	817
Cadmium	824
Nickel	829
References	837
<b>25 Ultraviolet Radiation</b>	<b>851</b>
<i>Colin M. H. Driscoll, Ph.D., and Nigel A. Cridland, D.Phil.</i>	
Radiation Emissions	851
Pathways to Human Exposure	853
Biological Mechanisms Leading to Health Effects	854
Populations at Special Risk	865
Applicable Standards and Exposure Guidelines	867
Risk Assessment and Education Policy	877
Summary	882
References	883
<b>26 Volatile Organic Compounds and the Sick Building Syndrome</b>	<b>889</b>
<i>Lars Møylave, M.D.</i>	
Toxic Effects	889
Prevalence of Exposures to Volatile Organic Compounds	889
Health and Volatile Organic Compounds	892
Prevalence of the Sick Building Syndrome	894
Dose-Response for Health Effects Caused by Low-Level VOC Exposure	896
Guidelines for Volatile Organic Compounds in Nonindustrial Indoor Environments	898
References	901
<b>27 Perspectives on Individual and Community Risks</b>	<b>905</b>
<i>Arthur C. Upton, M.D.</i>	
Nature of Risk	905
Identification and Quantification of Risks	906

Risk Communication 911  
Risk Reduction 914  
References 918

**28 Reducing Risks: An Environmental Engineering Perspective 921**

*Raymond C. Loehr, Ph.D.*

Historical Perspective 921  
Pollution Control Process 923  
Environmental Risk Assessment and Management 923  
Applications and Use 929  
Conclusions 922  
References 943

**29 Clinical Perspective on Respiratory Toxicology 945**

*Mark J. Utell, M.D., and Jonathan M. Samet, M.D.*

Concepts of Exposure 946  
Tools for Studying Animals 947  
Tools for Studying Populations 955  
Limitations of Clinical and Epidemiological Assessments of the  
Effects of Inhaled Agents 960  
Advice and Counseling of Patients 961  
Summary 963  
References 964

**30 Industrial Perspectives: Translating the Knowledge Base  
into Corporate Policies, Programs, and Practices for Health  
Protection 969**

*Fred D. Hoerger, Ph.D., Larry W. Rampy, Ph.D., Douglas  
A. Rausch, Ph.D., and James S. Bus, Ph.D.*

Life Cycle of a Chemical 969  
Knowledge Base for the Identification of Hazard Control Strategies 970  
Industrial Hygiene and Occupational Health Programs 972  
Product Stewardship 975  
Responsible Care 978  
Concluding Perspective 980
