The world's #1 programming author with
more than 3 million books sold!

Contents

PREFACE	xix
1 Java Fundamentals	1
The Origins of Java	2
How Java Relates to C and C++	3
How Java Relates to C#	4
Java's Contribution to the Internet	5
Java Applets	5
Security	5
Portability	6
Java's Magic: The Bytecode	6
The Java Buzzwords	7
Object-Oriented Programming	8
Encapsulation	9
Polymorphism	10
Inheritance	10
Obtaining the Java Development Kit	12
A First Simple Program	12
Entering the Program	13
Compiling the Program	13
The First Sample Program Line by Line	14

Handling Syntax Errors	17
A Second Simple Program	17
Another Data Type	20
Project 1-1 Converting Gallons to Liters	22
Two Control Statements	23
The if Statement	23
The for Loop	25
Create Blocks of Code	27
Semicolons and Positioning	29
Indentation Practices	29
Project 1-2 Improving the Gallons-to-Liters Converter	30
The Java Keywords	32
Identifiers in Java	32
The Java Class Libraries	33
Module 1 Mastery Check	34
 2 Introducing Data Types and Operators	 35
Why Data Types Are Important	36
Java's Primitive Types	36
Integers	37
Floating-Point Types	38
Characters	40
The Boolean Type	41
Project 2-1 How Far Away Is the Lightning?	43
Literals	44
Hexadecimal and Octal Constants	44
Character Escape Sequences	45
String Literals	45
A Closer Look at Variables	47
Initializing a Variable	47
Dynamic Initialization	48
The Scope and Lifetime of Variables	49
Operators	52
Arithmetic Operators	52
Increment and Decrement	54
Relational and Logical Operators	55
Short-Circuit Logical Operators	57
The Assignment Operator	58
Shorthand Assignments	60
Type Conversion in Assignments	61
Casting Incompatible Types	62
Operator Precedence	64
Project 2-2 Display a Truth Table for the Logical Operators	65

Expressions	66
Type Conversion in Expressions	66
Spacing and Parentheses	68
Module 2 Mastery Check	69
3 Program Control Statements	71
Input Characters from the Keyboard	72
The if Statement	74
Nested ifs	75
The if-else-if Ladder	76
The switch Statement	78
Nested switch Statements	82
Project 3-1 Start Building a Java Help System	83
The for Loop	86
Some Variations on the for Loop	87
Missing Pieces	88
Loops with No Body	90
Declaring Loop Control Variables Inside the for Loop	91
The Enhanced for Loop	92
The while Loop	92
The do-while Loop	94
Project 3-2 Improve the Java Help System	97
Use break to Exit a Loop	100
Use break as a Form of goto	102
Use continue	106
Project 3-3 Finish the Java Help System	109
Nested Loops	112
Module 3 Mastery Check	113
4 Introducing Classes, Objects, and Methods	115
Class Fundamentals	116
The General Form of a Class	116
Defining a Class	117
How Objects Are Created	121
Reference Variables and Assignment	121
Methods	122
Adding a Method to the Vehicle Class	123
Returning from a Method	125
Returning a Value	126
Using Parameters	129
Adding a Parameterized Method to Vehicle	130
Project 4-1 Creating a Help Class	133
Constructors	139
Parameterized Constructors	140
Adding a Constructor to the Vehicle Class	141

The new Operator Revisited	142
Garbage Collection and Finalizers	143
The finalize() Method	144
Project 4-2 Demonstrate Finalization	145
The this Keyword	147
Module 4 Mastery Check	149
5 More Data Types and Operators	151
Arrays	152
One-Dimensional Arrays	152
Project 5-1 Sorting an Array	156
Multidimensional Arrays	158
Two-Dimensional Arrays	158
Irregular Arrays	160
Arrays of Three or More Dimensions	161
Initializing Multidimensional Arrays	161
Alternative Array Declaration Syntax	163
Assigning Array References	164
Using the length Member	165
Project 5-2 A Queue Class	168
The For-Each Style for Loop	172
Iterating Over Multidimensional Arrays	175
Applying the Enhanced for	177
Strings	178
Constructing Strings	178
Operating on Strings	179
Arrays of Strings	181
Strings Are Immutable	182
Using Command-Line Arguments	183
The Bitwise Operators	185
The Bitwise AND, OR, XOR, and NOT Operators	186
The Shift Operators	191
Bitwise Shorthand Assignments	193
Project 5-3 A ShowBits Class	193
The ? Operator	196
Module 5 Mastery Check	198
6 A Closer Look at Methods and Classes	201
Controlling Access to Class Members	202
Java's Access Specifiers	202
Project 6-1 Improving the Queue Class	208
Pass Objects to Methods	209
How Arguments Are Passed	211
Returning Objects	214

Method Overloading	216
Overloading Constructors	222
Project 6-2 Overloading the Queue Constructor	225
Recursion	228
Understanding static	230
Static Blocks	233
Project 6-3 The Quicksort	235
Introducing Nested and Inner Classes	238
Varargs: Variable-Length Arguments	242
Varargs Basics	242
Overloading Varargs Methods	246
Varargs and Ambiguity	247
Module 6 Mastery Check	249
7 Inheritance	251
Inheritance Basics	252
Member Access and Inheritance	255
Constructors and Inheritance	258
Using super to Call Superclass Constructors	260
Using super to Access Superclass Members	266
Project 7-1 Extending the Vehicle Class	267
Creating a Multilevel Hierarchy	270
When Are Constructors Called?	273
Superclass References and Subclass Objects	274
Method Overriding	280
Overridden Methods Support Polymorphism	283
Why Overridden Methods?	285
Applying Method Overriding to TwoDShape	285
Using Abstract Classes	290
Using final	295
final Prevents Overriding	295
final Prevents Inheritance	295
Using final with Data Members	296
The Object Class	298
Module 7 Mastery Check	299
8 Packages and Interfaces	301
Packages	302
Defining a Package	302
Finding Packages and CLASSPATH	304
A Short Package Example	304
Packages and Member Access	306
A Package Access Example	307
Understanding Protected Members	309
Importing Packages	311

Java's Class Library Is Contained in Packages	314
Interfaces	315
Implementing Interfaces	316
Using Interface References	320
Project 8-1 Creating a Queue Interface	322
Variables in Interfaces	328
Interfaces Can Be Extended	329
Module 8 Mastery Check	330
9 Exception Handling	333
The Exception Hierarchy	334
Exception Handling Fundamentals	334
Using try and catch	335
A Simple Exception Example	336
The Consequences of an Uncaught Exception	339
Exceptions Enable You to Handle Errors Gracefully	340
Using Multiple catch Statements	342
Catching Subclass Exceptions	343
Try Blocks Can Be Nested	344
Throwing an Exception	346
Rethrowing an Exception	346
A Closer Look at Throwable	348
Using finally	350
Using throws	352
Java's Built-in Exceptions	354
Creating Exception Subclasses	356
Project 9-1 Adding Exceptions to the Queue Class	359
Module 9 Mastery Check	362
10 Using I/O	365
Java's I/O Is Built upon Streams	366
Byte Streams and Character Streams	366
The Byte Stream Classes	367
The Character Stream Classes	367
The Predefined Streams	367
Using the Byte Streams	370
Reading Console Input	370
Writing Console Output	372
Reading and Writing Files Using Byte Streams	373
Inputting from a File	374
Writing to a File	376
Reading and Writing Binary Data	378
Project 10-1 A File Comparison Utility	382
Random Access Files	384

Using Java's Character-Based Streams	387
Console Input Using Character Streams	388
Console Output Using Character Streams	391
File I/O Using Character Streams	393
Using a FileWriter	393
Using a FileReader	394
Using Java's Type Wrappers to Convert Numeric Strings	396
Project 10-2 Creating a Disk-Based Help System	399
Module 10 Mastery Check	406
11 Multithreaded Programming	407
Multithreading Fundamentals	408
The Thread Class and Runnable Interface	409
Creating a Thread	410
Some Simple Improvements	413
Project 11-1 Extending Thread	415
Creating Multiple Threads	418
Determining When a Thread Ends	421
Thread Priorities	424
Synchronization	428
Using Synchronized Methods	428
The synchronized Statement	431
Thread Communication Using notify(), wait(), and notifyAll()	434
An Example That Uses wait() and notify()	435
Suspending, Resuming, and Stopping Threads	440
Project 11-2 Using the Main Thread	444
Module 11 Mastery Check	446
12 Enumerations, Autoboxing, and Static Import	447
Enumerations	448
Enumeration Fundamentals	449
Java Enumerations Are Class Types	452
The values() and valueOf() Methods	452
Constructors, Methods, Instance Variables, and Enumerations	454
Two Important Restrictions	456
Enumerations Inherit Enum	456
Project 12-1 A Computer-Controlled Traffic Light	458
Autoboxing	464
Type Wrappers	465
Autoboxing Fundamentals	467
Autoboxing and Methods	468
Autoboxing/Unboxing Occurs in Expressions	470
A Word of Warning	471
Static Import	472

Metadata	476
Module 12 Mastery Check	479
13 Generics	481
Generics Fundamentals	482
A Simple Generics Example	483
Generics Work Only with Objects	487
Generic Types Differ Based on Their Type Arguments	487
A Generic Class with Two Type Parameters	488
The General Form of a Generic Class	490
Bounded Types	490
Using Wildcard Arguments	494
Bounded Wildcards	498
Generic Methods	501
Generic Constructors	504
Generic Interfaces	505
Project 13-1 Create a Generic Queue	508
Raw Types and Legacy Code	513
Erasure	516
Ambiguity Errors	517
Some Generic Restrictions	519
Type Parameters Can't Be Instantiated	519
Restrictions on Static Members	520
Generic Array Restrictions	520
Generic Exception Restriction	522
Continuing Your Study of Generics	522
Module 13 Mastery Check	522
14 Applets, Events, and Miscellaneous Topics	525
Applet Basics	526
Applet Organization and Essential Elements	530
The Applet Architecture	530
A Complete Applet Skeleton	531
Applet Initialization and Termination	532
Requesting Repainting	533
The update() Method	534
Project 14-1 A Simple Banner Applet	535
Using the Status Window	539
Passing Parameters to Applets	540
The Applet Class	542
Event Handling	544
The Delegation Event Model	544
Events	544
Event Sources	545

Event Listeners	545
Event Classes	545
Event Listener Interfaces	546
Using the Delegation Event Model	548
Handling Mouse Events	548
A Simple Mouse Event Applet	549
More Java Keywords	552
The transient and volatile Modifiers	552
instanceof	553
strictfp	553
assert	553
Native Methods	554
What Next?	555
Module 14 Mastery Check	556
A Answers to Mastery Checks	557
B Using Java's Documentation Comments	603
The javadoc Tags	604
@author	605
{@code}	605
@deprecated	605
{@docRoot}	606
@exception	606
{@inheritDoc}	606
{@link}	606
{@linkplain}	606
{@literal}	606
@param	607
@return	607
@see	607
@serial	607
@serialData	608
@serialField	608
@since	608
@throws	608
{@value}	608
@version	609
The General Form of a Documentation Comment	609
What javadoc Outputs	609
An Example that Uses Documentation Comments	610
Index	613
