What's New in This Edition?	xix
How This Book Is Organized	xx
What's Special About This Book?	xxi
How to Use This Book	xxi
A <i>Big</i> Thanks	xxii

Chapter 1: The Role and Importance of Research

I

Say Hello to Research!	1
What Research Is and What It Isn't	2
A Model of Scientific Inquiry	4
Asking the Question	6
Identifying the Important Factors	6
Formulating a Hypothesis	7
Collecting Relevant Information	7
Testing the Hypothesis	8
Working with the Hypothesis	8
Reconsidering the Theory	8
Asking New Questions	9
Different Types of Research	9
Nonexperimental Research	9
Experimental Research	12
True Experimental Research	13
Quasi-Experimental Research	13
What Scientific Method to Use When?	14
Basic Research Versus Applied Research	15
Summary	15
Exercises	15
Want to Know More?	16
Further Readings	16
Readings of Other Interest	17
And on the Internet . . .	18

Chapter 2: The Research Process: Coming to Terms

19

From Problem to Solution	19
The Language of Research	21

All About Variables	21
Dependent Variables	22
Independent Variables	22
The Relationship Between Independent and Dependent Variables	24
Other Important Types of Variables	24
Hypotheses	25
The Null Hypothesis	25
The Research Hypothesis	27
Differences Between the Null Hypothesis and the Research Hypothesis	28
What Makes a “Good” Hypothesis?	29
Samples and Populations	30
The Concept of Significance	31
Summary	32
Exercises	32
Want to Know More?	33
Further Readings	33
Readings of Other Interest	34
And on the Internet . . .	35

Chapter 3: Selecting a Problem and Reviewing the Research

37

Selecting a Problem	38
Defining Your Interests	40
Ideas, Ideas, Ideas (and What to Do With Them)	41
From Idea to Research Question to Hypothesis	42
Reviewing the Literature	42
Using General Sources	45
Using Secondary Sources	47
Using Primary Sources	48
Reading and Evaluating Research	55
What Does a Research Article Look Like?	56
Criteria for Judging a Research Study	56
Basic Principles of Ethical Research	58
Protection From Harm	58
Maintenance of Privacy	58
Coercion	58
Informed Consent	59
Confidentiality	61
Debriefing	61
Sharing Benefits	61

Contents

Ensuring High Ethical Standards	62
The Role of Professional Organizations	62
A Summary of Ethical Guidelines	63
Ethics and Children	64
Ethics Regarding On-line Research	64
Using Electronic Tools in Your Research Activities	65
Searching On-line	65
Searching the Web: Great Search Engines	66
More About Google	67
Using Bibliographic Database Programs	71
An Introduction to the Internet and the World Wide Web	72
Research Activities on the Net	73
An Introduction to E-Mail	73
An Introduction to News Groups	75
Using Mailing Lists or ListSers	78
Exploring the WWW	78
A Bit About Home Pages	79
Writing the Literature Review	80
Summary	81
Exercises	81
Want to Know More?	82
Further Readings	82
Readings of Other Interest	83
And on the Internet . . .	83

Chapter 4: Sampling and Generalizability 85

Populations and Samples	85
Probability Sampling Strategies	86
Simple Random Sampling	86
Systematic Sampling	90
Stratified Sampling	91
Cluster Sampling	92
Nonprobability Sampling Strategies	92
Convenience Sampling	93
Quota Sampling	94
Samples, Sample Size, and Sampling Error	94
How Big Is Big?	95
Estimating Sample Size	95
Summary	96
Exercises	96

Want to Know More? 97
Further Readings 97
Readings of Other Interest 98
And on the Internet . . . 98

Chapter 5: Measurement, Reliability, and Validity

99

The Measurement Process 99
Levels of Measurement 100
Nominal 101
Ordinal 102
Interval 102
Ratio 103
Continuous Versus Discrete Variables 104
What Is All the Fuss? 104
Reliability and Validity: Why They Are Very, Very Important 105
A Conceptual Definition of Reliability 106
What Makes Up Error Scores? 107
Increasing Reliability 108
How Reliability Is Measured 109
Types of Reliability 110
Establishing Reliability: An Example 113
Validity 113
A Conceptual Definition of Validity 113
Types of Validity 114
Establishing Validity: An Example 116
The Relationship Between Reliability and Validity 118
A Closing (Very Important!) Thought 118
Summary 119
Exercises 119
Want to Know More? 120
Further Readings 120
Readings of Other Interest 120
And on the Internet . . . 121

Chapter 6: Methods of Measuring Behavior

123

Tests and Their Development 124
Why Use Tests? 124
What Tests Look Like 125

Contents

Types of Tests	126
Achievement Tests	126
Multiple-Choice Achievement Items	128
Attitude Tests	132
Personality Tests	134
Observational Techniques	135
Questionnaires	138
Summary	141
Exercises	141
Want to Know More?	142
Further Readings	142
Readings of Other Interest	143
And on the Internet . . .	143

Chapter 7: Data Collection and Descriptive Statistics

145

Getting Ready for Data Collection	145
The Data Collection Process	146
Constructing Data Collection Forms	146
Coding Data	148
The Ten Commandments of Data Collection	149
Getting Ready for Data Analysis	150
Descriptive Statistics	151
Distributions of Scores	151
Comparing Distributions of Scores	152
Measures of Central Tendency	152
Measures of Variability	155
The Range	155
The Standard Deviation	155
Understanding Distributions	157
The Normal (Bell-Shaped) Curve	157
The Mean and the Standard Deviation	158
Standard Scores: Computing and Using z Scores	160
What z Scores Really, Really Mean	161
Summary	162
Exercises	162
Want to Know More?	163
Further Readings	163
Readings of Other Interest	164
And on the Internet . . .	164

Chapter 8: Introducing Inferential Statistics 165

- Say Hello to Inferential Statistics 165
 - How Inference Works 165
 - The Role of Chance 166
 - The Central Limit Theorem 166
- The Idea of Statistical Significance 169
- Tests of Significance 171
 - How a Test of Significance Works 171
 - t-Test for Independent Means 172
 - How to Select the Appropriate Test 174
 - Some Other Tests of Significance 175
 - Working With More Than One Dependent Variable 178
- Significance Versus Meaningfulness 179
- Meta-Analysis 180
 - How Meta-Analyses Are Done 181
- Summary 182
- Exercises 182
- Want to Know More? 183
 - Further Readings 183
 - Readings of Other Interest 184
 - And on the Internet . . . 184

Chapter 9: Nonexperimental Research: Descriptive and Correlational Methods

185

- Descriptive Research 186
 - Survey Research 186
- Correlational Research 191
 - The Relationship Between Variables 192
 - What Correlation Coefficients Look Like 193
 - Computing the Pearson Correlation Coefficient 195
- Summary 198
- Exercises 198
- Want to Know More? 199
 - Further Readings 199
 - Readings of Other Interest 199
 - And on the Internet . . . 200

Chapter 10: Nonexperimental Research: Qualitative Methods

201

- Conducting Qualitative Research 201
- Research Sources 202

Contents

Documentation	202
Archival Records	202
Physical Artifacts	203
Direct Observation	203
Participant Observation	203
Focus Groups	203
Case Studies	205
Some Advantages of the Case Study Method	205
Some Disadvantages of the Case Study Method	206
Ethnographies	207
Historical Research	207
Conducting Historical Research	208
The Steps in Historical Research	209
Sources of Historical Data	210
Primary or Secondary Sources: Which Are Best?	211
Authenticity and Accuracy	212
The Limitations of Historical Research	213
Qualitative Research Tools	213
Summary	214
Exercises	214
Want to Know More?	214
Further Readings	214
Readings of Other Interest	215
And on the Internet . . .	215

Chapter 11: Pre- and True Experimental Research Methods

217

Experimental Designs	218
Pre-Experimental Designs	219
True Experimental Designs	220
Internal and External Validity and Experimental Design	223
Threats to Internal Validity	223
Threats to External Validity	225
Increasing Internal and External Validity	226
Internal or External Validity: A Trade-Off?	227
Controlling Extraneous Variables	227
Matching	228
Use of Homogeneous Groups	229
Analysis of Covariance	229
Summary	229
Exercises	229
Want to Know More?	230

Further Readings	230
Readings of Other Interest	231
And on the Internet . . .	231

Chapter 12: Quasi-Experimental Research: A Close Cousin to Experimental Research

233

The Quasi-Experimental Method	233
Quasi-Experimental Designs	235
The Nonequivalent Control Group Design	235
The Static Group Comparison	236
Single-Subject Design	236
Multiple Baseline Designs	238
Evaluating Single-Subject Designs	239
Developmental Research	240
The Utility of Follow-up Studies	241
The Role of Age in Studying Development	243
Summary	243
Exercises	244
Want to Know More?	244
Further Readings	244
Readings of Other Interest	245
And on the Internet . . .	245

Chapter 13: Writing a Research Proposal

247

The Format of a Research Proposal	247
Appearance	248
Evaluating the Studies You Read	249
Criteria for Judging a Research Study	250
Planning the Actual Research	251
Selecting a Dependent Variable	253
Reviewing a Test	254
Basic Information	254
General Test Information	254
Design and Appearance	255
Reliability	255
Validity	255
Norms	255
Evaluation	255
Selecting a Sample	255
Data Collection and Analysis	257

Contents

Selecting an Inferential Statistic	257
Protecting Human Subjects	258
Summary	258
Exercises	258
Want to Know More?	258
Further Readings	258
Readings of Other Interest	259
And on the Internet . . .	259

Chapter 14: Writing a Research Manuscript 261

What a Manuscript Looks Like	261
Title Page	262
The Abstract	262
Introduction	263
Method	263
Results	263
Discussion	264
References	264
Appendices	264
Author Notes	264
Footnotes	264
Table Captions	265
Tables	265
Figure Captions	265
Figures	265
Nuts and Bolts	265
References	266
Summary	266

Appendix A: An Introduction to SPSS 13.x* 283

Appendix B: Sample Data Set 285

Appendix C: Answers to Exercises 291

References 301

Glossary 305
