

*Integrated Product Design  
and Manufacturing Using  
Geometric Dimensioning  
and Tolerancing*

Robert G. Campbell  
Edward S. Roth

# Contents

<i>Foreword</i>	<i>Ed Boyer</i>	<i>v</i>
<i>Preface</i>		<i>ix</i>
<i>Acknowledgments</i>		<i>xiii</i>
<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>What Are the Techniques?</b>	<b>7</b>
	2.1 Introduction	7
	2.2 Product Definition	8
	2.3 The Language of Concurrent Engineering—Y14.5M	11
	2.4 Concurrent Engineering	13
	2.5 Summary	22
	References	23
<b>3</b>	<b>The Basis of the System</b>	<b>25</b>
	3.1 Introduction	25
	3.2 Y14.5M Concepts	26
	3.2.1 Datum Reference Frames	26
	3.2.2 Tooling and Gage Datum Elements	33
	3.2.3 Interrelated and Interchangeable Features	36
		<b>xv</b>

3.2.4	Boundary and Axial Concepts	37
3.2.5	Taylor's Principle	40
3.2.6	Refinement of Controls	43
3.3	Application Considerations	44
3.3.1	Production Variation	45
3.3.2	Datum Accuracy	45
3.3.3	Interchangeability and Assembleability	46
3.3.4	Verifiable Controls	46
3.3.5	Material Modifiers	47
3.3.6	Basic Interchangeability Gages	51
3.4	Summary	53
	References	54
<b>4</b>	<b>Design Layout</b>	<b>55</b>
4.1	Introduction	55
4.2	Product Architecture	55
4.3	The Six-Step Methodology	58
4.3.1	Design Layout	59
4.3.2	Identification and Removal of Critical Characteristics	61
4.3.3	Mechanical Simulation	65
4.3.4	Consideration of DFA	66
4.3.5	Design of Experiments	67
4.3.6	Physical Prototyping	69
4.3.7	Metrology and Product Development	70
4.4	Summary	72
	References	72
<b>5</b>	<b>A Producibile Component</b>	<b>73</b>
5.1	Introduction	73
5.2	Step One: The Datum Reference Frame	75
5.3	Step Two: The Fixture Layout	78
5.4	Step Three: Gaging and Measurement	83
5.5	Step Four: Fixture Controls	85
5.6	Step Five: Tooling Package	88
5.7	Step Six: Engineering Changes	90
5.8	Summary	91
	References	91
<b>6</b>	<b>First Steps Toward Production</b>	<b>93</b>
6.1	Introduction	93
6.2	Design	95
6.2.1	Datum Specification	95

6.2.2	Setups	96
6.2.3	Datum Selection	96
6.2.4	Datum Qualification	96
6.2.5	Datum Identification	97
6.3	Single Datum Reference Frame Dimensioning	99
6.4	Tolerancing	100
6.4.1	Positional Tolerance Specification	101
6.4.2	The Zero Positional Control	101
6.5	Phantom-Gage Dimensioning	102
6.5.1	Design Layout	103
6.5.2	Part/Gage Design Parameters	104
6.5.3	Defining Functional Gages from the Design Layout	105
6.6	Applications of Phantom Gaging	107
6.7	Conclusions	108
<b>7</b>	<b>Dimensional Measurements</b>	<b>109</b>
7.1	Introduction	109
7.2	Measurement Theory	110
7.2.1	The Measurement Model	110
7.2.2	True Value	110
7.2.3	Error and Uncertainty	114
7.2.4	Precision and Accuracy	114
7.2.5	Precision, Bias, Accuracy—An Illustration	115
7.3	Statistical Techniques	117
7.3.1	Statistical Concepts	117
7.3.2	Random Uncertainties	120
7.3.3	Systematic Uncertainty	122
7.3.4	Uncertainty in Definition	123
7.3.5	Averages and Individuals—An Example	123
7.4	Measurement Planning	127
7.4.1	Functional Representation/Design Intent	128
7.4.2	Derived Geometry	129
7.4.3	Conformance	129
7.4.4	Methods and Procedures	131
7.4.5	Link to System of Units	131
7.5	Summary	132
	References	133
<b>8</b>	<b>Inspection and Verification</b>	<b>135</b>
8.1	Introduction	135
8.2	Process Planning	136
8.2.1	Process Variation	136

8.2.2	Measurement Quality	140
8.2.3	Plan Content	141
8.3	Inspection Process Uncertainty	142
8.4	Tolerance Characteristics and Modeling	144
8.5	Setup	147
8.5.1	Datum Planes	147
8.5.2	Point Contact	148
8.5.3	Axis Angularity	148
8.6	Temperature Changes	150
8.7	Equipment Inaccuracies	151
8.8	Operator-Induced Uncertainty	153
8.8.1	Bias	153
8.8.2	Observation	154
8.8.3	Computation	154
8.8.4	Setup	154
8.9	Free-State Variation	154
8.10	Recording Inspection Results	155
8.10.1	Recording Setup	155
8.10.2	Recording Hole Axis Angularity	157
8.10.3	Recording Tolerances	157
8.11	Conclusion	157
	References	158
<b>9</b>	<b>Functional Gaging</b>	<b>159</b>
9.1	Introduction	159
9.2	Functional Gaging Principles	161
9.3	Feature Relation Gages	162
9.3.1	Internal Feature Patterns	162
9.3.2	External Feature Patterns	169
9.4	Design Principles for Feature Location and Relation Gaging	172
9.4.1	Critical (RFS) Part Datum Features	172
9.4.2	Critical (MMC) Part Datum Features	176
9.4.3	Independent Hole Patterns	179
9.4.4	Two Critical Datum Features	180
9.4.5	Multiple Datum Features, with Independent Hole Pattern	182
9.4.6	Datum Features Related to Primary Datum Plane	184
9.4.7	Three-Hole Pattern and External Datum Feature	186
9.4.8	Three-Hole Pattern and Internal Datum Feature	187
9.4.9	Cylindrical Part with Two-Pin Patterns	188
9.4.10	Two Radial Patterns of Pins and Slots	190
9.5	Review of Principles and Applications	191

<b>10</b>	<b>Functional Gage Tolerancing</b>	<b>193</b>
10.1	Introduction	193
10.2	Gaging Element Size and Material Modifiers	194
10.3	Workpiece Example	195
10.4	Zero Positional Tolerance at LMC	197
10.4.1	LMC Gage Pin at True Position	198
10.4.2	MMC Gage Pin at True Position	198
10.4.3	MMC Gage Pin with Maximum Positional Error	199
10.5	Results	200
10.6	Alternate Form of Analysis	202
10.7	Fits and Allowances	204
10.8	Building the Gage	204
10.8.1	Machine Tool Capabilities	204
10.8.2	Single-Setup Gage Feature Manufacture	206
10.8.3	Gage Assembly Operations	208
10.9	Summary	209
	References	210
	Appendix 10.A	211
<b>11</b>	<b>Functional Inspection Techniques</b>	<b>219</b>
11.1	Introduction	219
11.2	Functional Gaging with Surface Plates	220
11.2.1	Gaging Positional Tolerances	220
11.2.2	Gaging Form and Orientation Tolerances	224
11.3	Functional Gaging with Coordinate Measuring Machines	226
11.3.1	Functional CMM Programming	227
11.3.2	Hypothetical Conversion	228
11.3.3	Examples	229
11.4	Functional Gaging with Optical Comparators	232
11.4.1	Applications	233
11.4.2	Profile Tolerancing	233
11.5	Paper Layout Gaging	236
11.5.1	Application	237
11.5.2	Parts That Can Be Paper Gaged	239
11.5.3	Paper Gaging Procedure	240
11.5.4	Inspection Results Layout	241
11.5.5	Tolerance Layout	243
11.5.6	Combining Layouts	244
11.5.7	Allowance Factors	245
11.5.8	Analyzing Results	247
11.5.9	Paper Gages Compared to Other Functional Gages	248

11.6	Summary	249
	References	249
<b>12</b>	<b>Functional Workholding and Fixturing</b>	<b>251</b>
12.1	Introduction	251
12.2	Functional Fixtures	253
12.3	Functional Fixturing Principles	253
12.4	Fixture Design Concepts	254
12.5	Design Details	260
	12.5.1 Functional Versus Process Frame	260
	12.5.2 Number of DRFs	261
	12.5.3 Location of the Fixture	263
	12.5.4 Design of Datum Feature Simulators	264
12.6	Application Issues	267
12.7	A Practical Example	268
	12.7.1 Traditional Processing of Part	270
	12.7.2 Single-Setup Processing of Part	276
12.8	Summary	279
	References	280
<b>13</b>	<b>Does It All Work?</b>	<b>281</b>
13.1	Introduction	281
13.2	The Initial Situation	282
13.3	Component Definition	285
13.4	The Six-Step Process	286
13.5	The Results	294
<b>14</b>	<b>Implementation and Process Improvement</b>	<b>297</b>
14.1	Introduction	297
14.2	Why Focus on the Definition?	298
	14.2.1 Management Tool	298
	14.2.2 Communication	298
	14.2.3 Education	299
	14.2.4 Problem Solving	299
	14.2.5 A Benchmark	300
14.3	Stages of Implementation	301
	14.3.1 Audit Existing Design Process	301
	14.3.2 Education in Documentation Principles	303
	14.3.3 Senior Management's Support	304
	14.3.4 Require a Structured Design	305
	14.3.5 Core Implementation Group	305
	14.3.6 Training Issues	305

<b>Contents</b>	<b>xxi</b>
14.3.7 Identification of an Advocate	306
14.3.8 Management Support	307
14.3.9 Controlled Implementation	308
14.3.10 Upgrade Metrology/Inspection Capabilities	309
14.3.11 Review and Critique	310
14.3.12 Expand Training	312
14.3.13 Require Use	313
14.4 Conclusion	313
