

# ADAPTIVE FILTERING PRIMER with MATLAB®

Alexander D. Pouliarikas  
Zayed M. Ramadan

---

# *Contents*

<b>Chapter 1 Introduction .....</b>	<b>1</b>
1.1 Signal processing.....	1
1.2 An example.....	1
1.3 Outline of the text.....	2
<b>Chapter 2 Discrete-time signal processing.....</b>	<b>5</b>
2.1 Discrete-time signals .....	5
2.2 Transform-domain representation of discrete-time signals .....	5
2.3 The Z -Transform .....	11
2.4 Discrete-time systems.....	13
Problems .....	17
Hints-solutions-suggestions .....	17
<b>Chapter 3 Random variables, sequences, and stochastic processes .....</b>	<b>19</b>
3.1 Random signals and distributions .....	19
3.2 Averages .....	22
3.3 Stationary processes .....	26
3.4 Special random signals and probability density functions .....	29
3.5 Wiener–Khintchin relations.....	32
3.6 Filtering random processes .....	34
3.7 Special types of random processes .....	36
3.8 Nonparametric spectra estimation.....	40
3.9 Parametric methods of power spectral estimations.....	49
Problems .....	51
Hints-solutions-suggestions .....	52
<b>Chapter 4 Wiener filters .....</b>	<b>55</b>
4.1 The mean-square error .....	55
4.2 The FIR Wiener filter.....	55
4.3 The Wiener solution .....	59
4.4 Wiener filtering examples.....	63
Problems .....	73
Hints-solutions-suggestions .....	74

<b>Chapter 5 Eigenvalues of <math>R_x</math> — properties of the error surface .....</b>	77
5.1 The eigenvalues of the correlation matrix.....	77
5.2 Geometrical properties of the error surface .....	79
Problems.....	81
Hints-solutions-suggestions .....	82
<b>Chapter 6 Newton and steepest-descent method.....</b>	85
6.1 One-dimensional gradient search method .....	85
6.2 Steepest-descent algorithm.....	91
Problems.....	96
Hints-solutions-suggestions .....	97
<b>Chapter 7 The least mean-square (LMS) algorithm.....</b>	101
7.1 Introduction .....	101
7.2 Derivation of the LMS algorithm.....	102
7.3 Examples using the LMS algorithm .....	104
7.4 Performance analysis of the LMS algorithm.....	112
7.5 Complex representation of LMS algorithm.....	126
Problems.....	129
Hints-solutions-suggestions .....	130
<b>Chapter 8 Variations of LMS algorithms.....</b>	137
8.1 The sign algorithms.....	137
8.2 Normalized LMS (NLMS) algorithm .....	139
8.3 Variable step-size LMS (VSLMS) algorithm.....	141
8.4 The leaky LMS algorithm.....	142
8.5 Linearly constrained LMS algorithm.....	145
8.6 Self-correcting adaptive filtering (SCAF).....	150
8.7 Transform domain adaptive LMS filtering.....	153
8.8 Error normalized LMS algorithms.....	158
Problems.....	167
Hints-solutions-suggestions .....	167
<b>Chapter 9 Least squares and recursive least-squares signal processing.....</b>	171
9.1 Introduction to least squares.....	171
9.2 Least-square formulation.....	171
9.3 Least-squares approach.....	180
9.4 Orthogonality principle .....	182
9.5 Projection operator.....	184
9.6 Least-squares finite impulse response filter .....	186
9.7 Introduction to RLS algorithm .....	188
Problems.....	197
Hints-solutions-suggestions .....	197

<b>Abbreviations .....</b>	<b>203</b>
<b>Bibliography .....</b>	<b>205</b>
<b>Appendix — Matrix analysis .....</b>	<b>207</b>
A.1 Definitions .....	207
A.2 Special matrices .....	210
A.3 Matrix operation and formulas .....	212
A.4 Eigen decomposition of matrices .....	215
A.5 Matrix expectations .....	217
A.6 Differentiation of a scalar function with respect to a vector .....	217
<b>Index .....</b>	<b>219</b>
